The Journal of Fluorescence has made many changes in the last 5 or so years during my tenure. These changes have resulted in the Journal being indexed on PubMed as well as a significant growth in the Journals' impact number, currently at ≈ 2.6 . These important milestones have subsequently led to an increased volume of manuscripts currently being submitted to the Journal of Fluorescence. To address the increased volume, the Journal of Fluorescence is happy to announce that Professors Martin Hof (Prague, Czech Republic) and Trevor Smith (Melbourne, Australia) will now serve as regional editors, both coordinating manuscripts as well as promoting the Journal in their respective regions of the world. As renowned fluorescence

spectroscopists, both make a notable addition to the Journals' editorial structure.

Please join me in welcoming both Professors Hof and Smith.

Kind Regards

Dr. Chris D. Geddes
