National Center for State Courts

The National Center for State Courts is conducting a study of the problems encountered by judges, attorneys, and expert witnesses in the use of scientific and other technical evidence in litigation. As part of that study we seek your thoughts both on any problems you have encountered and ideas you may have about possible ways to remedy those problems. Your letters (signed or anonymous) would be most welcome. Direct them to:

Richard Van Duizend
National Center for State Courts
2030 M St. N.W.
Suite 401
Washington, D.C. 20036
