

Erratum

Erratum/Correction of Cameriere R, et al. The precision and reliability of the pulp/tooth area ratio (RA) of the second molar as indicator of adult age." J Forensic Sci 2004;49(6):1319–1323

Table 3 should be

	Age		Total
	<18	≥18	
RA > RA*	86	20	106
RA ≤ RA*	5	201	206
Total	91	221	312

se = 0,909502 Sensitivity.
sp = 0,945055 Specificity.
VVP = 0,975728 Positive predictive value.
VVN = 0,811321 Negative predictive value.
E = 0,919872 Total correct classification.

Rather than

	Age		Total
	<18	≥18	
RA > RA*	86	20	106
RA ≤ RA*	5	201	206
Total	91	221	312

se = 0,850679 Sensitivity.
sp = 0,945055 Specificity.
VVP = 0,974093 Positive predictive value.
VVN = 0,722689 Negative predictive value.
E = 0,878205 Total correct classification.

Another error is in reference to the sentence on page 3: "The proportion of individuals with a correct classification was 92% (Table 4)." It should be: "The proportion of individuals with a correct classification was 92% (Table 3)."

The Journal regrets this error. Note: Any and all future citations of the above-referenced paper should read: The precision and reliability of the pulp/tooth area ratio (RA) of the second molar as indicator of adult age. [Published erratum appears in J Forensic Sci 2005 Mar;50(2)] J Forensic Sci 2004;49(6):1319–1323.
