Forthcoming papers

Identités de Fierz et formes bilinéaires dans les espaces spinoriels
  L.-S. Randriamihamison

The local embedding problem for optical structures
  E. Musso

Monodromy in two degrees of freedom integrable systems
  M. Zou

Lie pseudogroups and differential sequences: new perspectives in two-dimensional conformal geometry
  S. Lazzarini and J.-F. Pommaret

On a connection governing parallel transport along 2×2 density matrices
  J. Dittmann and G. Rudolph

Topological manifolds and vector bundles with applications to crystal physics
  N. Cotfas
