

Contents Volume 33

VOLUME 33, No. 1 – SEPTEMBER 2005

H.-L. Li and J.-F. Tsai / Treating Free Variables in Generalized Geometric Global Optimization Programs	1–13
X.L. Sun, F.L. Wang and D. Li / Exact Algorithm for Concave Knapsack Problems: Linear Underestimation and Partition Method	15–30
A. Sóbester, S.J. Leary and A.J. Keane / On the Design of Optimization Strategies Based on Global Response Surface Approximation Models	31–59
M. Sun and A.W. Johnson / Interval Branch and Bound with Local Sampling for Constrained Global Optimization	61–82
I. Papamichail and C.S. Adjiman / Proof of Convergence for a Global Optimization Algorithm for Problems with Ordinary Differential Equations	83–107
S. Onn, U.G. Rothblum and Y. Tangir / Edge-Directions of Standard Polyhedra with Applications to Network Flows	109–122
S. Yan, D.-S. Juang, C.-R. Chen and W.-S. Lai / Global and Local Search Algorithms for Concave Cost Transshipment Problems	123–156

VOLUME 33, No. 2 – OCTOBER 2005

L. Liberti / Linearity Embedded in Nonconvex Programs	157–196
G. Isac and S.Z. Németh / Duality in Multivalued Complementarity Theory by Using Inversions and Scalar Derivatives	197–213
T. Kuno / A Revision of the Trapezoidal Branch-and-Bound Algorithm for Linear Sum-of-Ratios Problems	215–234
M. Laguna and R. Martí / Experimental Testing of Advanced Scatter Search Designs for Global Optimization of Multimodal Functions	235–255
Y. Xu, C. Liu and D. Li / Generalized Nonlinear Lagrangian Formulation for Bounded Integer Programming	257–272

G.M. Lee, D.S. Kim and P.H. Sach / Characterizations of Hartley Proper Efficiency in Nonconvex Vector Optimization	273–298
K.M. Anstreicher and S. Burer / D.C. Versus Copositive Bounds for Standard QP	299–312

 VOLUME 33, No. 3 – NOVEMBER 2005

R. Cambini and C. Sodini / Decomposition Methods for Solving Nonconvex Quadratic Programs via Branch and Bound	313–336
F.H. Chang and F.K. Hwang / Supermodularity in Mean-Partition Problems	337–347
L. Narain and P.C. Bagga / Flowshop/No-idle Scheduling to Minimize Total Elapsed Time	349–367
S.-C. Fang, J. Han, Z.-H. Huang and Ş.İ. Birbil / On the Finite Termination of an Entropy Function Based Non-Interior Continuation Method for Vertical Linear Complementarity Problems	369–391
A. Marín / Uncapacitated Euclidean Hub Location: Strengthened Formulation, New Facets and a Relax-and-cut Algorithm	393–422
E. Alvoni and P.L. Papini / Perturbation of Sets and Centers	423–434
Y. Zhu and T. Kuno / A Global Optimization Method, QBB, for Twice-Differentiable Nonconvex Optimization Problem	435–464
M. Bjørndal and K. Jørnsten / The Deregulated Electricity Market Viewed as a Bilevel Programming Problem	465–475

 Volume 33, No. 4 – DECEMBER 2005

J.-L. Li and J.B. Jian / A Superlinearly Convergent SSLE Algorithm for Optimization Problems with Linear Complementarity Constraints	477–510
J. Nie and J.W. Demmel / Minimum Ellipsoid Bounds for Solutions of Polynomial Systems via Sum of Squares	511–525
N. Gadhi, M. Laghdir and A. Metrane / Optimality Conditions for D.C. Vector Optimization Problems Under Reverse Convex Constraints	527–540
H. Schichl and A. Neumaier / Interval Analysis on Directed Acyclic Graphs for Global Optimization	541–562
C. Shi, G. Zhang and J. Lu / The Kth-Best Approach for Linear Bilevel Multi-follower Programming	563–578

CONTENTS VOLUME 33	627
L.-J. Lin / Existence Results for Primal and Dual Generalized Vector Equilibrium Problems With Applications to Generalized Semi-Infinite Programming	579–595
H.D. Sherali and J. Desai / A Global Optimization RLT-based Approach for Solving the Fuzzy Clustering Problem	597–615
V. Kreinovich and R.B. Kearfott / Beyond Convex? Global Optimization Is Feasible Only for Convex Objective Functions: A Theorem	617–624
Volume Contents	625–627
List of Contributors	629
