

Forthcoming Event

Lecture Series — Unconfined Gas Explosions, von Karman Institute for Fluid Dynamics, Rhode-Saint-Genèse, Belgium, February 7–11, 1983

In a one week lecture series an up-to-date review of current knowledge of gas cloud combustion will be presented; topics will include conditions of ignition, effect of cloud size and shape, turbulence, concentration gradient, flame acceleration, and transition to pseudo-detonation. Both experimental and numerical aspects will be considered. The fee for the lecture series is B.F. 13000. A detailed outline is available on request from the von Karman Institute for Fluid Dynamics, Chaussée de Waterloo 72, 1640 Rhode-Saint-Genèse, Belgium; telephone (02) 358.19.01.
