

**THE THIRD INTERNATIONAL CONFERENCE ON NEW FRONTIERS FOR HAZARDOUS WASTE MANAGEMENT, PITTSBURGH, SEPTEMBER 10-13, 1989**

The Third International Conference on New Frontiers for Hazardous Waste Management is scheduled for September 10-13, 1989 in Pittsburgh, Pennsylvania. Two world renowned organizations – the United Nations Environmental Programme (UNEP) and the World Federation of Engineering Organizations (WFEO) – have teamed with the U.S. Environmental Protection Agency, the American Academy of Environmental Engineers, and NUS Corporation to organize and promote this 1989 event.

“We plan,” says NUS conference director Lynne Casper, “to present 65 scientists and engineers who will speak to a multinational audience of 800 to 1000 individuals directly responsible for handling hazardous waste problems. We want to arm them with the information they need to make informed technical and cost-effective decisions”.

“The conference speakers are involved in patenting new hazardous waste treatment processes, investigating the use of chemical and biological additives, and perfecting concepts to physically alter wastes while taking into consideration economics and feasibility”.

To receive more information about attending or exhibiting at the conference, contact Lynne Casper or Marilyn Diethorn at (800) 245-2730. In PA call (412) 788-1080. Or write to NUS Corporation, Park West Two, Pittsburgh, PA, 15275, U.S.A.
