

Announcements

The 1990 SO₂ Control Symposium, New Orleans, LA, U.S.A., May 8-11, 1990

Scope

The 1990 SO₂ Control Symposium is the twelfth in a series of forums that provide for the exchange of technical and regulatory information on flue gas desulfurization (FGD) for utility and industrial boilers. Wet and dry scrubbers, new and emerging processes, and international developments in clean coal/acid rain technologies will be the major topics.

The thrust of the meeting is to educate and inform without "sales" presentations. Operating experience, equipment and process testing, pilot and demonstration results, international developments, and regulatory changes will be emphasized. The audience will include utility and industrial users of the technology, consultants, engineering firms, equipment manufacturers, process suppliers, representatives of the government, academia, and R&D firms.

Topics

Papers will deal with all facets of flue gas desulfurization technology, the science on which this technology is based, and the regulations that influence the use of the technology. Candidate authors are encouraged to confine their papers to current and new information not presented at

previous symposia. Specific topics planned:

- Acid Rain Legislative Activities (Federal & State)
- Status of U.S. Commercial FGD Applications
- Progress in International FGD Applications
- Clean Coal/Acid Rain Research
- Current FGD Economics
- Strategies for Retrofit Installations
- FGD Additives
- FGD Operation and Maintenance
- Spray Dryer FGD
- New and Emerging Technologies
- Reliability Improvement/Materials of Construction
- FGD By-Product Disposal Utilization
- Integrated Environmental Controls
- Industrial FGD Applications
- Fundamental Chemistry & Physics of SO₂ Removal
- In-Furnace Dry SO₂ Technologies
- Post-Combustion Dry SO₂ Technologies
- Combined SO_x/NO_x Control
- Waste-to-Energy FGD Applications

European Energy Week/Coal & Power Technology 90 Conference and Exhibition, Amsterdam, The Netherlands, May 21-23, 1990

General information

- To meet the needs of European primary energy producers and consumers in the huge European energy market RAI Gebouw bv is to present a new combined group of exhibitions and conferences under the overall title of 'European Energy Week'.
- Location of these seven 'European Energy Week' events — the PetroTech 90 Exhibition, the Seventh European Petroleum and Gas Conference, Conference on Procurement and Maintenance in the Oil and Gas Industry, Energy Economy 90 Exhibition, Energy Economy 90 Conference, Coal & Power Technology Conference 90, Coal & Power Technology 90 Exhibition, — will be the RAI International Exhibition and Congress Centre, Amsterdam.
- For the first time in its long experience of staging energy events RAI is including the economics and tech-

nology of European electricity generation and supply in its programme. These topics will be given special emphasis in the Coal & Power Technology 90 exhibition and conference programme.

Coal & Power Technology 90

- As the European power industry prepares for a new era of huge investment in reconstruction and new building, the Coal & Power Technology 90 Conference and Exhibition will demonstrate and examine how demand for electrical power in Europe will be met up to and beyond the year 2000.
