

Fourth Forum on Innovative Hazardous Waste Treatment Technologies: Domestic and International, The Westin - St. Francis, San Francisco, CA, USA, November 17-19, 1992

Aims and Scope

Using technical paper and poster presentations, this three-day conference will introduce and highlight innovative treatment technologies having actual performance results. It will show case results of selected international technologies, the U.S. EPA Superfund Innovative Technology Evaluation (SITE) program technologies, CAL-EPA field demonstration program, and case studies from those using innovative technologies. The overall objective is to increase the awareness of the user community of technologies ready for application at clean-up sites.

The Conference is sponsored by U.S. EPA's Technology Innovation Office and Risk Reduction Engineering Laboratory, and California Environmental Protection Agency.
