

Subject Index Volume 79

- Ab initio method 77
Activated sludge process 173
Activation energy 77
Adsorption 117
Ageing 287
Airblast 31
Airburst 31
Alternative disinfectant 89
Analysis 301
Auto-reaction 77
- Biodegradation 173
Bituminization 241
Blast curve 41
Bottom ash 287
- Catalyst deactivation 103
Cause investigation 241
Characterisation 215
Characterization 63
Chlorophenols 271
ClO₂ 89
Cloud shape 41
Compliance test 63
Cyclone 151
- Damage 31
DBPs 89
Desorption 117
Dissociated and non-dissociated species 271
Dissolution 159
- Ecotoxicity 215
Effectiveness factor 103
Electro-kinetics 133
Electro-migration 133
Endothermic 117
Explosion 31
Explosives 1, 31
- Flame dynamics 41
Flue gas desulfurization 159
Fuel 77
- HAAs 89
Halogen 77
Hazardous materials 1
Heavy metals 229
High energetic materials 1
Hydrogen sulphide 103
- Impulse 31
Incineration residues 215
Incompatibility 19
Interfacial reaction 241
Isokinetics sampling 229
Isotherm 117
- Kinetic rate constants 271
- Limestone 159
- Materials modification 301
Metal finishing sludges 63
MSWI 287
Municipal solid waste incinerator 229
- Nitrate migration 133
Nitrates 1
- Optical technique 151
Organic precursors 89
Overpressure 31
Oxygen transfer 173
Ozonation 271
- Particle counter–sizer–velocimeter 151
Particles 229
Perchlorates 1
pH gradient 133
pH leaching behaviour 63
Plasma 301
Porous media modelling 103
- Radioactive wastes 241
Reactivity 19
Reduced explosion model 41
Regeneration 117

Segregation of chemical hazard 19
Self-heating ignition 241
Shock wave 31
Stripping 173
Sulphur production 103

Thermolysis 1
THMs 89

TNT equivalence 31
Total collection efficiency 151

Vapor cloud explosions 41
Volatile organic compound 173

Waste treatment 301
Weathering 287
