

## Subject Index Volume 103

- Activated carbon, 141  
Acute risk, 25  
Adsorption, 43, 141  
Advanced oxidation process, 247  
Algae, 65  
Anodic oxidation, 247  
AOP processes, 233  
Arsenic, 93
- Beach sands, 79  
Biological wastewater treatment, 263
- Cadmium, 141  
Cause-effect, 181  
Cd, 125  
Cementitious waste, 125  
Chlorpyrifos, 93  
Chronic risk, 25  
Clofibric acid, 233  
Continuous releases, 205  
Copper(II), 263  
Copper, 153
- Diamond electrodes, 247  
Drugs, 233
- EDTA recycling, 153  
Electrocoagulation, 65  
Electronic packaging material, 107  
Electrooxidation, 65
- Fenton's reagent, 79
- Heavy gas dispersion, 1, 205, 217  
Heavy metals, 25  
Humic substances, 93  
Hydrogen peroxide photolysis, 233  
Hydroxyl radical, 65
- Instantaneous releases, 217  
Integral models, 1  
Integrated risk analysis, 25
- Kinetics, 107, 233
- Leaching parameters, 125
- Lead, 43, 153  
Lime, 43
- Mechanism, 107  
Metal precipitation, 153  
Mineralization, 247  
Minimum ignition energy, 11  
Model comparison, 1
- Ozonation, 233
- Pb, 125  
Pesticides, 93  
Petroleum, 79  
Premixed gases, 11  
Pyrolysis, 107
- Quenching distance, 11
- Rice husk, 263  
Risk analysis, 181  
Risk assessment, 181, 205, 217  
Risk management, 181  
Risk terminology, 181
- Sequencing batch reactor, 263  
Shallow layer model, 1  
Shallow layer modelling, 205, 217  
Simultaneous adsorption and biodegradation, 263  
Slopes, 205, 217  
Soil flushing, 153  
Soil remediation, 153  
Sorbent, 43  
Spill, 79  
Sulphurisation, 141  
Sulfur, 43
- Theoretical expression, 11  
Thermogravimetric analysis, 107  
Toxic chemicals, 25  
Toxicity characteristic leaching procedure, 125  
Toxicity, 93
- Wastewater, 65  
Water treatment, 247  
Width of flame front, 11
