

Journal of Hazardous Materials

Scope

Environmental control technology, risk assessment, impact and management

The *Journal of Hazardous Materials* publishes full length research papers, reviews, project reports, case studies and short communications which improve our understanding of the hazards and risks certain materials pose to people and the environment or deal with ways of controlling the hazards and associated risks. To limit the scope the following areas are excluded: work place health & safety, drugs, and nuclear related topics. The Journal is published in two parts:

Part A: Risk Assessment and Management

- Characterization of the harmful effects of hazardous materials
- Impact assessment methods and models – acute and chronic effects of hazardous chemical releases
- Approaches to risk assessment and management, including legislation
- Incident case histories and lessons for risk management

Part B: Environmental Technologies

- Pollution control processes
- Inherently safer and cleaner technologies
- Treatment and disposal of solid, liquid and gaseous hazardous wastes
- Remediation of contaminated soil and groundwater
