

CONTENTS

Special Issue: 2004 Mary Kay O'Connor Process Safety Center Symposium

Foreword

M.S. Mannan (College Station, TX, USA)	vii
Sensor fault diagnosis for nonlinear processes with parametric uncertainties S. Rajaraman, J. Hahn and M.S. Mannan (College Station, TX, USA)	1
Lessons learned from process incident databases and the process safety incident database (PSID) approach sponsored by the Center for Chemical Process Safety A.L. Sepeda (Plano, TX, USA)	9
Updated hazard rate equation for single safeguards M. Rothschild (Croydon, PA, USA)	15
Evaluation of lower flammability limits of fuel–air–diluent mixtures using calculated adiabatic flame temperatures M. Vidal, W. Wong, W.J. Rogers and M.S. Mannan (Texas, USA)	21
IEC 61511 and the capital project process—A protective management system approach A.E. Summers (Houston, TX, USA)	28
Harnessing data mining to explore incident databases S. Anand, N. Keren, M.J. Tretter, Y. Wang, T.M. O'Connor and M.S. Mannan (College Station, TX, USA)	33
Potential use of advanced process control for safety purposes during attack of a process plant J.R. Whiteley (Stillwater, OK, USA)	42
Decomposition of energetic chemicals contaminated with iron or stainless steel S. Chervin, G.T. Bodman and R.W. Barnhart (Rochester, NY, USA)	48
Database management systems for process safety W.F. Early (Houston, TX, USA)	53
Managing industrial risk—Having a tested and proven system to prevent and assess risk S. Heller (Houston, TX, USA)	58
Case study: Flame arresters and exploding gasoline containers L.C. Hasselbring (Houston, TX, USA)	64
Accident investigation: Keep asking “why?” T.A. Kletz (Texas, TX, USA)	69
Effects of heating rate, temperature and iron catalysis on the thermal behaviour and decomposition of 2-nitrobenzoyl chloride S.D. Lever and M. Papadaki (Leeds, UK)	76
Kinetics of acid-catalyzed cleavage of cumene hydroperoxide M.E. Levin, N.O. Gonzales, L.W. Zimmerman and J. Yang (Houston, TX, USA)	88
Application of the API/NPRA SVA methodology to transportation security issues D.A. Moore (San Francisco, CA, USA)	107
Utilizing the Human, Machine, and Environment Matrix in investigations D. Curry and J.M. McKinney (Naperville, IL, USA)	122
Avoiding pitfalls in assembling an equipment failure rate database for risk assessments M. Moosemiller (Stafford, TX, USA)	128
Relationship of safety culture and process safety C. Olive, T.M. O'Connor and M.S. Mannan (College Station, TX, USA)	133
Global kinetic model: A case study on the <i>N</i> -oxidation of alkylpyridines J. Gao and M. Papadaki (Leeds, UK)	141
LNG decision making approaches compared R. Pitblado, J. Baik and V. Raghunathan (Houston, TX, USA)	148
Assessment of the effects of release variables on the consequences of LNG spillage onto water using FERC models Y. Qiao, H.H. West, M.S. Mannan (College Station, TX, USA), D.W. Johnson and J.B. Cornwell (Norman, OK, USA)	155
Thermal decomposition hazard evaluation of hydroxylamine nitrate C. Wei, W.J. Rogers and M.S. Mannan (College Station, TX, USA)	163
Improvement in the incident reporting and investigation procedures using process excellence (DMAI ² C) methodology E.N. Miles (New Brunswick, NJ, USA)	169
Near and far field contamination modeling in a large scale enclosure: Fire Dynamics Simulator comparisons with measured observations N.L. Ryder, C.F. Schemel and S.P. Jankiewicz (Columbia, MD, USA)	182
