ARTICLE INFO

Article history:

Available online 12 June 2009

This article has been retracted at the request of the Editor-in-Chief.

This article has been retracted at the request of the Editor and approved by the R&R panel as it duplicates significant parts of a paper that had already appeared in Journal of Environmental Management, 2008, doi:10.1016/j.jenvman.2006.12.024.

The authors of the article published in Journal of Hazardous Materials, 2008, doi:10.1016/j.jhazmat.2007.11.033, have directly copied significant amounts of text and references, two tables, and one figure, which were previously published in the Journal of Environmental Management, without permission from the authors or publisher and without citation to the original article. As such, this article represents a severe abuse of the scientific publishing system and a clear violation of publishing ethics. We regret that this was not detected before the article was accepted for publication in the journal.

DOI of original article:10.1016/j.jhazmat.2007.11.033.
