

ANNOUNCEMENT

FOURTH INTERNATIONAL SYMPOSIUM ON  
INCLUSION PHENOMENA

THIRD INTERNATIONAL SYMPOSIUM ON CYCLODEXTRINS

*University of Lancaster, Great Britain*  
*20–25 July 1986*

The meeting will be concerned with the complete range of inclusion compounds formed by organic hosts (e.g., urea, thiourea,  $\beta$ -quinol, crown ethers, cryptands, cyclophanes, cyclodextrins), inorganic hosts (e.g., graphite, layer silicates, zeolites, transition metal dichalcogenides) and organometallic hosts (e.g., Hofmann and Werner complexes, cyclidene complexes, porphyrins). The meeting will also be concerned with all the main aspects of these compounds, *viz*, preparation, structural characterisation, selectivity studies, and their applications as molecular receptors, catalysts, sensors, reagents, enzyme mimics, pharmaceutical and chromatographic applications, etc.

The following speakers have indicated their willingness to present Plenary Lectures: J.E. Baldwin (Oxford); R. Breslow (Columbia); D.H. Busch (Ohio); J. Dale (Oslo); K. Koga (Tokyo); J.M. Lehn (Strasbourg); D.N. Reinhoudt (Twente); J.J. Stezowski (Stuttgart); I.O. Sutherland (Liverpool); J.M. Thomas (Cambridge); D.H. Williams (Cambridge).

Further details can be obtained from:
