

#### EDITORIAL NOTE

Contributors and readers of the Journal will be aware of the unacceptably long publication times being experienced by papers currently being published. The Editors and the members of the Editorial Board have expressed their concern to the publisher about these delays and the detrimental effect such long publication times have for the reputation of the Journal.

We are pleased to announce that the publisher has agreed that the first issues of 1991 will be enlarged issues, in order to remove the backlog of papers. This move will enable the Journal to return to competitive publication times and to maintain its status as the primary publication in the area of molecular recognition and inclusion.
