

Subject Index

- Azacrowns
 - complexation of metal ions 259
- Azacryptands
 - synthesis of 289
 - transportability of 289
- Book review 95
- Calix[4]arenes
 - amide and phosphine oxide substituted 137
 - azabenzocrown derivative 99
 - calixcrown 187
 - photosensitive azo modified 153
 - water soluble chromophoric derivative 109
 - water soluble derivative 353
- Calix[5]arene
 - complex with DMF 175
- Clathrate hydrate
 - cage occupancy of N₂ clathrate 65
 - compressibility of N₂ clathrate 65
- Crowns
 - conductance study 15
 - synthetic methods 221
 - stability constants 15
- Cryptands
 - synthesis of 283, 289
- Cucurbituril
 - complexes with dye molecules 167
- Cyclodextrin – *beta*
 - complexes with
 - dye molecules 167
 - methyl substituted phenols 79
 - hemolytic properties of derivatives 57
- Cyclodextrin – *hydroxypropyl beta*
 - complex with salicylic acid 119
- Cyclophane host 323
- Dianilinegossypol
 - complex with
 - dioxane/dichloroethane 23
 - DMSO 23
 - dimorphs of 23
- Dibenzo-13-crown-4 309
 - Fluorescence studies 119
- Glycophanes 341
- Gossypol
 - monoamino derivatives 33
 - sorption of amines by 33
- Hemolytic properties of CDs 57
 - Isosteric heats of sorption 1, 41
- Liquid membranes 197, 289
- Mass spectrometry 269
- MM calculations 79
- Polymer inclusion membrane 247
- Pyrimidinocrowns 301
- Selective ion extraction 197
- Selective ion transport 247
- Solid phase extraction 197
- Sorption equilibria 33, 41
- Stilbite 1
- Supercryptands
 - synthesis of 283
- Werner clathrates 41
- Zeolite Stilbite 1
