### Erratum to: J Incl Phenom Macrocycl Chem DOI 10.1007/s10847-008-9418-4

Unfortunately, the structures of figures 6 and 7 are not matched. There is also a small mistake in the caption of figure 7. Please find the corrected figure 7 and its caption below.

Furthermore, all mention of “AL and AR”, “armchair lines”, and “A lines” in the section **Optical resolution of single-walled carbon nanotubes by chiral diporphyrin nanotweezers** should be replaced by “ZL and ZR”, “zigzag lines”, and “Z lines”, respectively.

**Fig. 7** Definition of *M* (left-handed) and *P* (right-handed) of SWNTs. Three arrows and dashed line indicate zigzag lines (Z lines) and SWNT axis, respectively
