

## Keyword index to Volume 20

- 7-ACA 344  
7-ADCA 344
- acetate 75  
acid extraction 251  
*Acromonium chrysogenum* 344  
*Actinomadura* 373  
actinomycete 55  
adaptation 227  
adenovirus 317  
*ADH2* 192  
*Alcaligenes eutrophus* 61  
alcohol 75  
alginate 171  
alginate beads 28  
alkaline xylanase 210  
alkaliphile 210  
*Alternaria* 53  
aminopeptidase 287  
ammonium perchlorate 126  
anaerobic sludge 45  
antifouling paint 275  
aromatic 364  
aromatic polyester 328  
arsenic 1  
*Aspergillus niger* 34  
atrazine 153  
attenuation 259  
*Azotobacter vinelandii* 171
- $\beta$ -carotene 82  
 $\beta$ -galactosidase 215, 291  
*Bacillus licheniformis* 166  
*Bacillus licheniformis* CC01 251  
*Bacillus smithii* 220  
*Bacillus subtilis* 48  
bacteria 251  
bacterial plasmids 1  
bacterial regrowth 354  
bacterial spores 69  
batch fermentation 171  
benzoic acid 259  
bioaccumulation 116  
bioavailability 61  
biocide 109  
biocorrosion 39  
biodegradation 28, 232, 369  
biofilm(s) 39, 109, 126  
biofiltration 101  
bioleaching 268  
biomass 132, 281  
biomass recycle reactor 232  
biomining 268  
biooxidation 268  
bioreactor 28  
biosensor 61  
biosurfactant 48  
biosynthesis 309  
biotechnology 95  
brass 39  
*Brevibacterium* sp 116
- C:N ratio 333  
cadmium 1, 116  
calcium 304  
*Candida shehatae* 339  
carbon concentration 333  
carbonyl compounds 180  
castor oil 304  
catabolic repression 238  
catechol 2,3-dioxygenase 90  
ceiling tiles 53  
cell immobilization 45, 166  
cephalosporin C 344  
chemical mutagenesis 360  
chemostat 339  
chitosan 45  
chlorophyte 200  
chromated copper arsenate (CCA) 251  
*cis/trans* isomers 82  
*Colletotrichum coccodes* 333  
commercial hydrogels 244  
compactin 150, 373  
conidiation 333  
continuous culture 291  
cooling water 39  
copper 275  
cyanates 28  
cyanides 28  
*czc* 61
- d-xylose 339  
deacetoxycephalosporin C 344  
denitrification 354  
*Desulfovibrio* 13  
diacid 328  
diol 328  
disc centrifugation 317  
dissimilatory metal reduction 13  
dissolved oxygen 109  
docosapentaenoic acid 187  
drinking water 354  
*Dunaliella salina* 82  
*Dunaliella tertiolecta* 200
- E. coli* KO11 281  
emergency shower 139  
emulsifier 205  
endophyte 259  
enology 20  
enzymatic synthesis 328  
enzyme expression 291  
enzyme production 215  
*Escherichia coli* 69, 265  
ethanol 132, 281  
ethanol tolerance 132, 227  
exopolysaccharide 205  
expandase/hydroxylase 344  
eyewash stations 139
- fatty acids 144  
fed-batch fermentation 215  
fermentation 132, 281
- fluidized bed 354  
fouling-release 121  
free fatty acids 180  
fungal inocula 244  
furfural 75
- gene duplication 360  
genetic resources 95  
genetically engineered microorganisms (GEMs) 90  
glucoamylase 160  
grape skin-contact 144  
graywater 232
- Halomonas marina* 121  
heat transfer resistance 109  
heavy metal resistance 61  
hydrocarbons 101  
hydrolysis 304  
hydroxylase 373
- immobilization 28, 75  
immobilized cells 13, 116  
immunosuppressant(s) 299, 309  
indigo 177  
indole 177  
inductor/induction 238  
industrial wastewater 153  
inhibitors 75, 364  
insertional cloning 360  
intellectual property right (IPR) protection 95  
intrinsic fluorescence spectroscopy 265
- kinetics 171  
*Kluyveromyces lactis* 291
- lactase 215  
*Lactobacillus bulgaricus* 180  
LCST 121  
lead 116  
*Legionella* 139  
*Leptospirillum* 268  
lignocellulose 132, 281  
lignocellulosic biomass 364  
lignosulfonate 45  
linear replicon fusion 360  
lipase 304, 328  
lipids 187
- malaria 192  
material transfer agreement 95  
Maximum principle 160  
mercury 1  
microalgae 82  
microbial biofilms 275  
microbial strain data 86  
microbial transformation 373  
*Micrococcus* sp 210  
microencapsulation 82  
mixed sugars 339

- modified Robbins device (MRD) 275  
Monod kinetics 339  
must 20  
mutagenicity 101  
mycelial fragments 244  
mycoherbicide 333  
mycotoxin 53
- N-terminal methionine 287  
*Neurospora crassa* 238  
nitrile hydratase 220  
NMR 75  
novel yeast 323
- Oenococcus oeni* 144  
One Atmosphere Uniform Glow  
  Discharge Plasma 69  
optimization 150  
ore decomposition 268  
organotin 200
- particle size distribution 317  
patent law 95  
PCR 90, 139  
pectate/pectin lyase 238  
pectic enzymes 238  
pectinase production 34  
*Penicillium* 150  
pentose 75  
*Periconia* sp 259  
petrochemical oxidation 369  
pH 339  
*PHO* regulatory system 160  
photobiotransformation 177  
physiological state 232  
phytoplankton 200  
*Pichia stipitis* 364  
polyesterification 328  
polygalacturonase 238  
polyketide 299  
polymer membranes 166
- Poly(*N*-isopropylacrylamide) 121  
polyunsaturated fatty acids 187  
post treatment 354  
pravastatin 373  
prehydrolysate 364  
preservative 251  
process development 323  
process errors 281  
process upsets 281  
prolylrapamycin 309  
protozoa 139  
*Pseudomonas* 153  
*Pseudomonas aeruginosa* 304  
*Pseudomonas putida* 28, 90  
purification 304  
*Pythium acanthicum* 187
- rapamycin 309  
recombinant human growth hormone 287  
recombinant protein 287  
regression analysis 150  
relational database 86  
rheology 205  
*Rhodobacter sphaeroides* 177  
*Saccharomyces* 192  
*Saccharomyces cerevisiae* 20, 144, 160  
salt 153  
shikimic acid 299  
siderophore 61  
smart polymers 121  
solid state fermentation 34  
soybean hulls 369  
specific ethanol production 227  
*Sphaerotilus natans* 109  
spray-drying 82  
*Staphylococcus aureus* 69  
steam explosion 251  
sterilization 69  
*Streptococcus salivarius* subsp  
  *thermophilus* 215  
*Streptococcus thermophilus* 180  
*Streptomyces hygrosopicus* 309
- streptomycetes 299  
stuck and sluggish fermentation 20  
suspected endocrine disruptor 126
- taxol 259  
TBV25H 192  
temperature-sensitive *pho80<sup>ts</sup>* mutant 160  
*Thermomonospora* 55  
thermophile 220  
thermophilic 48  
thermostable  $\alpha$ -amylase 166  
thermotolerance 323  
*Thiobacillus* 268  
thiocyanates 28  
toxic metal resistances 1  
toxicity 101  
transmission electron microscopy 200  
transposon mutagenesis 360  
tributyltin (TBT) 275  
triphenyltin 200  
tryptophan 177
- up-flow anaerobic fixed bed reactor 126
- VBNC bacteria 265  
viability 227  
viable but nonculturable bacteria 265  
volatile organic compounds 101
- wastewater treatment 153  
wine 20  
*Wolinella succinogenes* HAP-1 126
- xylan 55  
*xylE* 90  
xylose 75, 132, 281  
xylosidase 55
- yeast 20, 75  
yogurt 180
