

Keyword index to Volume 23

- 2-aminomuconate 138
 2-aminophenol 138
 2-chlorodibenzofuran 353
 2-keto-L-gulonate 106
 248-trichlorodibenzofuran 359
 27-dichlorodibenzofuran 359
 3-chlorodibenzofuran 353
 6-chloro-2-methyl-4*H*-chromen-4-one 359
 68-dichloro-2-methyl-4*H*-chromen-4-one 359
 7-chloro-2-methyl-4*H*-chromen-4-one 359
- α -galactosidase 661
 α -ketoglutarate-dependent dioxygenase 336
 β -aryl ether cleavage 364
 β -galactosidase 91
 γ -hexachlorocyclohexane 380
- ABC transporter 425
 abietane 374
 acetic acid bacteria 106
 actinomycete diversity 178
 activated sludge 261
 adherence 713
 aerobic stability 218
 alginate 155
 alpha-4 Proteobacteria 261
 alternansucrase 656
 amino acids 97
 anthracyclines 647
 antibiotic resistance 647
 antibiotic-biosynthetic genes 118
 antitumor drug 647
 aromatic 303
 aromatic compound 273
Aspergillus 209
 astaxanthin production 133, 691
 azo dyes 341, 476, 686
- Bacillus* 149
Bacillus thuringiensis 497
Bacillus circulans 188
 bacteria 112, 653
 bacterial growth 188
 baculovirus system 103
 batch process 143
 bioaugmentation 326
 biocatalysis 138
 biocontrol 641
 biodegradation 127, 294, 314, 332, 341, 347, 353, 380, 391, 686
 biofilms 112
 biofungicide 223
 biological control 223
 biological treatment 374
 biopolymer 442
 bioremediation 314, 347
 biosensor 668
 biosorption 686
 biosynthesis 647
 biotransformation 359
 biphenyl 284, 294
 biphenyl degradation 314, 347, 364
Bjerkandera sp 86
Brettanomyces 198
 BSA 155
- Ca-alginate entrapped lactobacilli 79
- cadmium 204
 canola meal 149
 capsule 436
 carbohydrates 97
 carotenoids 697
Caulobacter subvibrioides 476
 ceiling tiles 209, 653
 characterization 682
 cheese whey 86, 91
 chemical structure 408
 chemostat 701
 chemotaxonomy 242
Chlorella protothecoides 503
 chloropicolinic acid 347
cis-dihydrodiol 284
 coliphage 166
 community composition 127
 complement activation 414
 complex polysaccharide 123
 compost 149
Cryptocodium cohnii 508
 curdlan production 143
 cytotoxicity 653
- daunorubicin 647
 dechlorination 232
 deep subsurface 273
 degradation 232, 403
 dehalogenase 380
 dehydration 79
 dehydrogenase 138
 delta-endotoxin 497
 dextran 656
 dextransucrase 656
 DhA-33 374
 DhA-95 374
 diclofop-methyl 332
 diffusion 155
 dimorphism 436
 dioxygenase(s) 138, 284, 391
 docosahexaenoic acid 508
 drilling fluid 442
 dynamic model 133
- E. coli* 668
E. coli KO11 701
 enantioselectivity 336
 enzymatic reduction 686
 enzyme production 188, 709
 esterase 188
 ethanol 701
 ether lipids 489
 exopolysaccharide 436, 489
 extracellular DNase 709
- fatty acid composition 242, 508
 feathers 149
 fermentation 456
 fish meal 497
Flavobacterium 320, 697
 floc structure 261
 fluorescent *in situ* hybridization (FISH) 261
 freeze-drying 97
 fresh-cut vegetables 484
 fruits 223
 fungi 641
 fuzzy logic 456
- gamma-linolenic acid 456
 gene expression 103, 214
 gene probes 261
 genetic algorithms 456
 glucan 656
 glucose repression 123
 glucosyltransferase 656
 glucuronidation 194
 glycolipid 414
 glycosidases 198
 glycosides 198
 glycosphingolipid 408
 GM-CSF 103
 grape phenolics 198
 graywater 127
 growth 97
 growth modelling 484
 gruel 497
- Haematococcus pluviialis* 133, 691
Haloarcula 489
 herbicide 332
 heterotrophic culture 503
 heterotrophic production 508
Humicola sp 661
 hybridization 374
 hydrolytic enzymes 123
- ice-nucleating activity 514
 immobilization 668
 inactivation 166
 industrial fermentation 647
 intracellular 661
 intracellular localisation 204
 ion exchange 166
- keratinase 149
 kinetic model 691
Kluyveromyces marxianus 91
- L-sorbose dehydrogenase 106
 L-sorbosone dehydrogenase 106
 lactic acid bacteria 198
Lactobacillus buchneri 218
Lactobacillus plantarum 218
 latex film 668
Leuconostoc mesenteroides 656
Leuconostoc oenos 447
 LIF 103
 light irradiance 691
 lignin degradation 364
 lignocellulosic 701
 luciferase 668
 lutein production 503
- macromolecule transport 425
 magnesium 204
 malolactic fermentation 447
 manganese peroxidase 86
 marine 268
 medium design 456
 medium optimization 456
 membrane fluidity 514
 membrane transport 400
 mercury 668
 metabolite overproduction 647
 metal ions 709

- microalgae 508
 microbial survival 326
 mixotrophic culture 133, 691
 modified solid state fermentation 173
 molecular markers 677
 molybdenum 112
 motility 436
 mycinose 118
 mycotoxin 209
- naphthalene 284, 294, 303
 naphthalenesulfonic acids 391
 neural networks 456
 nitrophenols 232
- O-demethylation 364
 oil exploration 442
 oligotroph 268
 optimal pH profile 143
 outer membrane 408, 414
 oxygen-insensitive azoreductase 476
 ozone 166
- p*-cresol 303
Paecilomyces fumosoroseus 97
 PCR 252
 pentachlorophenol (PCP) 232, 320, 326
 periplasmic enzymes 400
Phaffia 677
 phenanthrene 294
 phenoxyalkanoic acid 332
 phenoxyalkanoic acid herbicides 336
 phylogeny 178, 268, 320, 408
 pigments 697
 pit 425
 plasmid 273
 polar lipid profiles 242
 polyamine patterns 242
 polycationic antibiotics 414
 polycyclic aromatic hydrocarbons 284
 polyethylene glycol 400
 polyhydroxybutyrate 489
 polymers 713
 polysaccharidases 123
 polysaccharide 656
 polysaccharide lyase 425
 porins 414
 postharvest diseases 223
 potable water 112
 potassium 204
 process operations 484
- proteases 497
 protective solutes 79
Proteus mirabilis 686
 protoanemonin pathway 353
 protocatechuate 45-cleavage pathway 364
Pseudomonas 138, 353
Pseudomonas aeruginosa 713
Pseudomonas syringae 514
 purification 661
- quinone 314
- raloxifene 194
 recombinant 701
 reconstituted membranes 414
 regulation 303
 resin acid 374
 reverse osmosis 166
 review 447
 rheological properties 442
Rhizopus oryzae 173
 RNA:DNA ratio 374
 rRNA 178
- S. stygia* 273
S. subterranea 273
Saccharomyces cerevisiae 198, 204
 salinity 508
 screening 106
 shelf-life extension 484
 silage 218
 sodium acetate 497
 sodium chloride 497
 soil 252
 sphingolipid analysis 252
 sphingomonads 400
Sphingomonas 232, 242, 252, 268, 294, 320, 326, 341, 353, 359, 374, 380, 391, 408, 425
Sphingomonas aromaticivorans 273
Sphingomonas herbicidovorans MH 336
Sphingomonas paucimobilis 364
Sphingomonas paucimobilis GS-1
 exopolysaccharide 442
 stability 701
 stability analysis 133
 stainless steel 112
 strain differentiation 677
Streptomyces fradiae 118
Streptomyces hygrosopicus 641
Streptomyces sp NRRL 21489 194
- Streptomyces thermonitrificans* 709
 streptomycetes 647
 subtilisin E 214
 sulfanilic acid 341
 survival 79
 systematics 320
- tannase 173
 temperature selection 127
 teri pod 173
 thatch 641
 thermophilic fungus 661
 thermophilic *Streptomyces* sp 709
Thermus thermophilus 214
 toluene 303
 trace minerals 97
 transfer vector 103
 transport 336
 trehalose 97
Trichoderma 682
 tropical rainforest 178
 Tunisian marine saltern 489
 turf 641
 tylosin production 118
- ubiquinone system 242
 ultraviolet light (UV) 166
 unstructured kinetic model 503
- viruses 166
 vitamins 97
- water activity 514
 water content 79
 water damage 653
 water potential 97
 wavelets 155
 white-rot fungi 86
 wine 447
 wine phenols 198
- xenobiotic polymers 400
 xenobiotics 232
 xylan 682
 xylanase 682
 xylene 294
- yeast(s) 223, 677
- zeaxanthin 697
