

## Keyword index to Volume 24

- 2,4,6-trichloroanisole 256
- $\alpha$ -D-glucose-1-phosphate 89
- $\alpha$ -1,4-D-glucan phosphorylase 89
- $\beta$ -carotene 41
- $\beta$ -galactosidase 25
- A47934 79
- A54145 79
- accumulation 146
- acetate metabolism 421
- acetate mutants 421
- actinomycete 79
- activated sludge 267
- adenovirus 198
- adhesion 113
- aerobic 231
- aerosol sampling 379
- agglutinating activity 262
- agro-industrial by-products and surplus 41
- alkaline protease 291
- alkaliphiles 389
- aminophenol 301
- ammonia 161
- Amtox<sup>®</sup> 267
- Amycolatopsis* 79
- angiostatin 31
- anthranilate 219
- antibiotic 19
- antifungal activity 275
- antifungal agent 173
- aromatic carotenoid 64
- Aspergillus niger* 27
- astaxanthin 187
- Aureobasidium pullulans* 319
- B. thuringiensis* 14
- Bacillus* sp 58
- bacteria 113, 301
- bacteriophages 124
- Baltic Sea 410
- batch fermentation 222
- bioaugmentation 277
- biocatalysis 301
- biocompatibility 153
- biodegradation 100, 140, 210, 277
- biodiversity 334
- biofilm 116, 244, 334, 410
- biofuel 51
- bioinformatics 314
- biological filtration 161
- biology 308
- bioluminescence 323
- biomass recycle reactor 191
- biomass-support interactions 181
- biopolymer 389
- bioremediation 132, 277, 381
- biosorption 146, 244
- biotechnology 308, 310, 314, 327, 364
- biotechnology education 323, 359
- biotransformation 167, 301
- birds 127
- blue-stain 319
- brandy distillates 431
- Brevibacterium linens* 64
- butyric acid 7, 153
- Canada geese 127
- central composite design 41
- characterization 296
- cheese ripening 64
- chemostat 231
- chloroeremomycin 79
- Chrysonilia sitophila* 256
- cloning 2
- Clostridium* 153
- coliphages 124, 127
- cometabolism 100
- compostability 210
- computers 314
- confocal laser scanning microscopy 116
- construction materials 210
- contact lens 113
- continuous culture 7
- copolymer 36
- cork stoppers 256
- cork taint 256
- creatininase 2
- creatinine amidohydrolase 2
- creosote 132, 277
- crude-oil emulsifier 374
- CryIVB 14
- curriculum 308
- daptomycin 79
- date juice 187
- delta-endotoxin 14
- DGGE 140
- dihydroxy octadecenoic acid 167
- directional cloning 345
- DNA sequence analysis 314
- DNA sequencing 2
- dog feces 124
- downstream processing 94
- drinking water production 161
- echinocandin B deacylase 173
- ennoblement 410
- enzyme 262, 403
- enzyme immobilization 382
- erythrocytes 262
- erythromycin 46
- Escherichia coli* 19, 94
- ethanol 51
- ethanol production 222
- ethanol tolerance 75
- evolution/technology 173
- exopolysaccharide 251, 374
- extracellular 403
- extracellular  $\beta$ -galactosidase 58
- extracellular polymeric substances 116
- extraction 153
- fatty acid 71
- fecal indicator sources 124, 127
- fed-batch culture 36, 94
- fed-batch fermentation 421
- fermentation 153, 327
- fermentation process 285
- flow rates 244
- fluoranthene 100
- fractional factorial design 41
- fungi 227
- fungus 369
- fusion protein 345
- gelled polymer 389
- gene therapy 198
- genomics 339
- GFP 323
- glucose-controlled high cell density fermentation 421
- glucose-6-phosphate 89
- grape must 41
- green fluorescence protein (GFP) 345
- growth kinetics 140, 231
- gum arabic 25
- Halomonas* 374
- halophilic bacteria 374
- heat resistance 227
- heavy metals 146, 244
- homebrewing 327
- hydraulic retention time (HRT) 244
- hydrogel 113
- hydroxy unsaturated fatty acids 275
- hydroxylation 167
- immobilization 222
- in vivo* recombination 198
- indole 219
- industrial media 285
- industrial wastewater 267
- infrared radiation 19
- injured cell 19
- inoculum preparation 277
- insulin-like growth factor I (IGF-I) 94
- juice 227
- kar1-1* 203
- killer character 203
- laboratory ecosystem 410
- laccase 383
- lactic acid 25
- lactobacilli 251
- lactose 58
- lacZ* 198
- lethal temperature 19
- lipids 75
- lux* bioluminescence 345
- maize 71
- maltooligosaccharides 89
- mannitol 51
- marine microbiology 334
- marine unicellular algae 262
- methanogenic activity 181
- methylotroph 14
- microbial carotenoids 41
- microbial ecology 334
- microbiology 132
- microbreweries 327
- microcarriers 181
- milk viscosity 251
- mitochondrial DNA 339
- mitochondrial genome 339
- mosquitocidal toxin 14
- multivariate statistical analysis 41
- Mycobacterium* 100
- Newport Green 116
- nickel 116, 146
- nitrification 161
- nitrifying biomass 161
- nitroaromatic compounds 301
- non-urea producing sake yeast 203
- o*-NO<sub>2</sub>-phenyl- $\beta$ -D-galactopyranoside 58
- oil production 389
- oleic acid 25
- osmotolerance 222
- oxidation 153
- P(3HB-co-3HV) 36
- Paecilomyces variotii* 227
- pasteurization 19
- PCR 379
- pectinase 296, 396
- peer review 310
- permeability modification 389
- PGL1-1* gene 296
- pH 146
- Phaffia rhodozyma* 187
- phage MS2 127
- phenol 403
- phenol removal 381
- phosphoglucosyltransferase 89
- phospholipid fatty acid analysis 191
- photobiotransformation 219
- phytase 237
- phytic acid 237
- Pichia pastoris* 31
- pigeons 127
- placement 364
- plant disease control 275
- plant pathogenic fungi 275
- plastid DNA 339
- plastid genome 339
- polyclar 383
- polycyclic aromatic hydrocarbons 277
- polygalacturonase 296
- polyketide 46

- polymerase chain reaction (PCR) 345  
porous pots 267  
poultry house 379  
pour plate method 124  
produced ethanol 75  
productivity 64, 251  
protease 291  
protease secretion 285  
proteinase 369  
protoplast fusion 203  
*Pseudomonas aeruginosa* 167, 291  
*Pseudomonas putida* 2  
*Pseudomonas* sp EL-2 36  
purification 58  
pyrene 100  
rare mating 203  
regulation 369  
regulatory affairs 364  
research proposals 310  
respiratory deficient mutants 75  
RET 359  
*Rhodobacter sphaeroides* 219  
*Rhodotorula glutinis* 41  
ricinoleic acid 167  
rotary fermentor 7  
rotating biological contactor (RBC) 244  
RpoS 421  
*Saccharomyces cerevisiae* 75, 222, 231, 296, 431  
*Saccharopolyspora* 79  
*Salmonella* 379  
sap-stain 319  
sauce 227  
season 410  
seaweed 51  
sewage 124  
shingles 319  
shuttle vector 46, 198  
smear microflora 64  
sodium hypochlorite 191  
soil 403  
soil contamination 132  
soil toxicity 132  
sorption 116  
*Sphingomonas* 100  
spinosyn 79  
stainless steel 410  
*Streptococcus pneumoniae* 79  
*Streptomyces* 46, 79  
*Streptomyces* sp 396  
substrate specificity 173
