

MEETINGS

October 13-14, 1966 held in BOSTON (Massachusetts) U.S.A.

10th symposium on advances in tracer methodology

Topics:

- New methods of synthesis of labeled compounds.
 - New or improved methods for measuring radioactivity.
 - Novel applications of labeled compounds in biological, chemical and industrial research.
 - Advances in analytical methods for labeled compounds.
 - Unusual applications of labeled compounds to analytical chemistry.
- Enquiries should be addressed to:

NEW ENGLAND NUCLEAR CORP.
575, Albany Street
BOSTON — Mass. 02118 — U.S.A.

Second international conference on methods of preparing and storing labelled molecules

BRUSSELS (Belgium), November 28 — December 3, 1966

The preliminary programme of this conference appeared in Vol. II No. 2. The detailed programme will be sent to those on the mailing list as well as to those requesting Euratom—Labelled Compounds—51-53, rue Belliard—Bruxelles.

Topics:

- Methods of preparing labelled compounds.
- Assaying.
- Stability and storage.
- Tracers applications.

Conference on nuclear tracers in pharmacology

GENÈVE (Switzerland), September 20-23, 1967

Enquiries should be addressed to:

Professeur B. GLASSON
Université de Genève – École de Médecine
Laboratoire du Métabolisme des Médicaments
1211 GENÈVE 4 (Suisse)

BOOKS RECEIVED

Photochemistry

by Jack G. Calvert, James N. Pitts, Jr., John Wiley & Sons Ltd, 1966, 899 pages, 150 sh.

Radiaktive Isotope in der organischen Chemie und Biochemie

H.R. Schütte, Veb Deutscher Verlag der Wissenschaften 108 Berlin, 1966, 689 S., MDN 78,—.

Die Synthese Kohlenstoff-14 markierter organische Verbindungen

von Dr. Marianne Bubner und Dr. Lothar Schmidt, Veb Georg Thieme, Leipzig 1966, 181 S., MDN 45,—.
