The International Isotope Society, Inc. is an incorporated professional society registered in the State of New Jersey, USA (No. 0100318061; November 24, 1986).

The IIS aims to promote the uses of isotopically labelled compounds for studies to improve and enrich the quality of life worldwide.

Applications from new Associate and Personal Members to join the IIS are especially welcome.

The first major event organised by the IIS was the Third International Symposium on the Synthesis and Applications of Isotopically Labelled Compounds held July 1988 in Innsbruck, Austria. This was a highly successful meeting enjoyed by the participants and a more detailed account has been published in the Journal of Labelled Compounds and Radiopharmaceuticals Volume 25, October 1988, pages 1173-1175. The Fourth International Symposium organised by the IIS is to be held in Toronto in 1991 and advance information will be sent to IIS Members with the Newsletter in February 1989.

The ultimate success of the IIS depends upon your support so your prompt attention to the payment of subscription dues will be much appreciated.

On behalf of the IIS Executive Committee and Advisory Board Members, our best wishes to all Members and new Members for 1989.
