MEETING REVIEW

Seventh International Symposium on HPLC of Proteins Peptides, and Polynucleotides, November 2-4, 1987, Washington, DC.

This seventh "installment" of the premier symposium on HPLC of proteins, peptides and polynucleotides was every bit as interesting and informative as those held in previous years. The three-day program contained both oral and poster presentations. Papers were organized into sessions which included the latest state-of-the-art information on Column Technology; Protein Conformation; Structural Studies; Affinity Chromatography; Polynucleotides; Analytical Applications; Micropreparative Chromatography; Large-Scale Preparative Chromatography.

A session on Special Topics contained outstanding presentations on such subjects as Microbore HPLC/MS; Laser-Based Polarimetry and Circular Dichroism in Biotechnology; High Performance Capillary Electrophoresis; Fluorescence Detection in Capillary Zone Electrophoresis.

Ample opportunity was provided for the 529 participants to discuss the presentations, both immediately following each paper, and during the programmed discussion sessions, poster sessions and coffee breaks. In fact, the organizers of this meeting are to be highly commended for providing a forum for novice and expert to meet, to discuss, to innovate.

The next symposium in this series, The 8th International Symposium on HPLC of Proteins, Peptides, and Polynucleotides, will be held at the Hotel Scandinavica in Copenhagen, Denmark on October 31st through November 2nd, 1988. Information may be obtained by writing to: Eighth ISPPP, c/o DIS Congress Service, Linde Alle 48, DK-2720 Copenhagen, Denmark; Tel: (1) 712244; Telex: 15476 dis dk. Deadline for submission of abstracts is July 1, 1988.
