## **A Special Note from Lyn Roberts, Managing Editor**

I would first like to thank Professor Phillip Geil for providing us with this opportunity to publish the chemistry related papers for this special symposium issue. He spent a great deal of time collecting and pre-editing the papers for us. It made my job much easier, thank you Phil for your cooperation and patience.

I would also like to thank Professor Q. Zhang for helping me contact the authors and assisting with solving problems and questions dealing with English translation.

Lastly, a note on the reference format. The reader will notice in very few instances, the use of et al. As you know, this is not our usual journal format and we normally do not allow the use of et al. We have made an exception for this issue only. However, since an effort was made by the guest editor to supply most missing names and he spent a great deal of time procuring and supplying us with many missing names, we have left the few unobtainable names stand as is. In no instance will we be changing our journal format in future issues.
