

REGULAR ARTICLES

- 4** A simple method to measure $^{13}\text{CH}_2$ heteronuclear dipolar cross-correlation spectral densities
Djaudat Idiyatullin, Vladimir A. Daragan, Kevin H. Mayo
- 11** Improved rejection of transmitter noise: a convenient scheme with resonant crossed diodes
Daniel W. Sinkovits, Mark S. Conradi
- 15** Switching-angle sample spinning NMR probe with a commercially available 20 kHz spinning system
Takashi Mizuno, K. Takegoshi, Takehiko Terao
- 20** A homodecoupled diffusion experiment for the analysis of complex mixtures by NMR
J.C. Cobas, M. Martín-Pastor
- 25** A phase cycle scheme that significantly suppresses offset-dependent artifacts in the R_2 -CPMG ^{15}N relaxation experiment
Grover N.B. Yip, Erik R.P. Zuiderweg
- 37** Line shapes of multiple quantum NMR coherences in one-dimensional quantum spin chains in solids
S.I. Doronin, E.B. Fel'dman, I.I. Maximov
- 48** Enhancing sensitivity or resolution of homonuclear correlation experiment for half-integer quadrupolar nuclei
Gregor Mali, Venčeslav Kaučič
- 71** Investigating magnetically aligned phospholipid bilayers with EPR spectroscopy at Q-band (35 GHz): optimization and comparison with X-band (9 GHz)
Johnson J. Inbaraj, Nisreen A. Nusair, Gary A. Lorigan
- 80** Absorption line CW EPR using an amplitude modulated longitudinal field
Matvey Fedin, Igor Gromov, Arthur Schweiger
- 90** Spatially selective T2 and T2* measurement with line-scan echo-planar spectroscopic imaging
Nan-kuei Chen, Koichi Oshio, Lawrence P. Panych, Frank J. Rybicki, Robert V. Mulkern
- 97** An algorithm to calculate the NMR signal of a multi spin-echo sequence with relaxation and spin-diffusion
Yuval Zur
- 107** Short-time restricted diffusion in a static gradient and the attenuation of individual coherence pathways
Lukasz J. Zielinski, Martin D. Hürlimann
- 118** Development and application of rotationally compensated RARE
A.J. Sederman, K.G. Hollingsworth, M.L. Johns, L.F. Gladden
- 124** Velocity distributions remotely measured with a single-sided NMR sensor
F. Casanova, J. Perlo, B. Blümich
- 135** Modified z-gradient filtering as a mean to obtain phased deuterium autocorrelation 2D NMR spectra in oriented solvents
Olivier Lafon, Philippe Lesot, Denis Merlet, Jacques Courtieu

Continued

Abstracting and indexing coverage for the <i>Journal of Magnetic Resonance</i> includes Adonis UK, Chemical Abstracts, INSPEC UK, ISI's Science Citation Index, and Index Medicus (MEDLINE)

- 143 Water suppression without signal loss in HR-MAS ^1H NMR of cells and tissues**
Jin-Hong Chen, Elliot B. Sambol, Peter T. Kennealey, Rachael B. O'Connor, Penelope L. DeCarolis, David G. Cory, Samuel Singer
- 151 Noise properties of a NMR transceiver coil array**
Robert G. Pinkerton, Enzo A. Barberi, Ravi S. Menon
- 157 Magnetic resonance imaging of single rice kernels during cooking**
Aleš Mohorič, Frank Vergeldt, Edo Gerkema, Adrie de Jager, John van Duynhoven, Gerard van Dalen, Henk Van As
- 171 Uniform illumination of optically dense NMR samples**
I. Kuprov, P.J. Hore
- 176 Simulation of ^{13}C nuclear magnetic resonance spectra of lignin compounds using principal component analysis and artificial neural networks**
M. Jalali-Heravi, S. Masoum, P. Shahbazikhah
- 186 The DQ-HN{CACB} and DQ-HN(CO){CACB} sequences with evolution of double quantum $\text{C}_\alpha\text{--C}_\beta$ coherences**
Wiktor Koźmiński Igor Zhukov

COMMUNICATIONS

- 43 The 2D MAS NMR spin-echo experiment: the determination of $^{13}\text{C}\text{--}^{13}\text{C}$ J couplings in a solid-state cellulose sample**
Steven P. Brown, Lyndon Emsley
- 57 A Hi-Fi' Cartesian feedback spectrometer for precise quantitation and superior performance**
D.I. Hoult, G. Kolansky, D. Kripiakevich
- 64 The NMR multi-transmit phased array: a Cartesian feedback approach**
D.I. Hoult, G. Kolansky, D. Kripiakevich, S.B. King
- 131 Spatially varying steady state longitudinal magnetization in distant dipolar field-based sequences**
C.A. Corum, A.F. Gmitro
- 163 Ultrafast 2D NMR spectroscopy using a continuous spatial encoding of the spin interactions**
Yoav Shrot, Boaz Shapira, Lucio Frydman

ADDENDUM

- 1 Addendum to "Using neural networks for ^{13}C NMR chemical shift prediction—comparison with traditional methods" [J. Magn. Reson. 157 (2002) 242–252]**
Jens Meiler, Brent Lefebvre, Antony Williams, Michel Hachey

ERRATUM

- 10 Erratum to "High resolution heteronuclear correlation NMR spectroscopy between quadrupolar nuclei and protons in the solid state" [J. Magn. Reson. 169 (2004) 342–350]**
A. Goldbourn, E. Vinogradov, G. Goobes, S. Vega
- 192 ANNOUNCEMENT**
