Editorial

We are pleased to introduce Paul Callaghan as a new Associate Editor of the Journal of Magnetic Resonance. Paul is well known to the readers of the Journal because of his many contributions in areas as diverse as diffusion measurements and NMR in the earth's magnetic field. Behind the scenes, he has been among the most prolific reviewers because of his wide range of expertise.

We are also pleased to have this opportunity to thank Angela Gronenborn for her many years of outstanding service as Associate Editor. She has handled many papers primarily but not exclusively in the area of solution NMR of proteins. She has also provided

sound counsel on many matters related to specific manuscripts and the general policies of the Journal.
