

CONTENTS BY KEYWORD

Biomaterials	Thermal stability of hydroxyapatite whiskers derived from the hydrolysis of α -TCP . . . H. C. Park <i>et al.</i>	2531
Casting	Effect of iron and manganese contents on convection-free precipitation and sedimentation of primary α -Al(FeMn)Si phase in liquid Al-11.5Si-0.4Mg alloy X. Cao <i>et al.</i>	2303
	Effect of continuous cooling heat treatment on interface characteristics of S45C/copper compound casting J.-S. Ho <i>et al.</i>	2473
	Dependence of microstructure on the cooling rate for a modified austenite medium Mn steel G.-F. Liang <i>et al.</i>	2569
	SEM online investigation of fatigue crack initiation and propagation in cast magnesium alloy X.-S. Wang <i>et al.</i>	2617
Ceramics	Proton conduction at the surface of Y-doped BaCeO ₃ and its application to an air/fuel sensor A. Tomita <i>et al.</i>	2493
	Electrical resistance of Al ₂ O ₃ fiber reinforced RuO ₂ /glass hybrid composites during tensile loading B. K. Jang <i>et al.</i>	2573
	Preparation of aqueous pigment slurry for decorating whiteware by ink jet printing S. Obata <i>et al.</i>	2581
	Spark-plasma-sintering of bulk SrBi ₂ Ta ₂ O ₉ materials B. Li <i>et al.</i>	2621
Characterization methods	FTIR study of vanadium oxide nanotubes from lamellar structure W. Chen <i>et al.</i>	2625
Coatings	Preparation of aqueous pigment slurry for decorating whiteware by ink jet printing S. Obata <i>et al.</i>	2581
	Effect of pigmentation on fracture toughness of paint films S. K. Singh <i>et al.</i>	2629
Composite materials	Electrical resistance of Al ₂ O ₃ fiber reinforced RuO ₂ /glass hybrid composites during tensile loading B. K. Jang <i>et al.</i>	2573
Computer simulations	On the grain size distributions obtained from different grain growth simulation techniques Y. Sun <i>et al.</i>	2553
Crystal growth	Microstructural control of metastable phase in rapidly solidified Ti-45Al-2Cr-2Nb alloy Y. C. Liu <i>et al.</i>	2613
Crystallization	Crystallization and phase evolution of potassium titanates from alkoxide derived precipitates R. Janes <i>et al.</i>	2589
Deformation and fracture	Investigation about the effect of previous impacts on the impact behavior of high impact polystyrene (HIPS) T. Şahin <i>et al.</i>	2543
	Probabilistic modeling the deformation and failure in heterogeneous microstructure of Ti-6Al-4V T.-W. Kim	2597
Diffusion	Effect of continuous cooling heat treatment on interface characteristics of S45C/copper compound casting J.-S. Ho <i>et al.</i>	2473
Electrical properties	Electrical resistance of Al ₂ O ₃ fiber reinforced RuO ₂ /glass hybrid composites during tensile loading B. K. Jang <i>et al.</i>	2573
Electrochemistry	Electrochemical copolymerization of furan and 3-methyl thiophene L. Li <i>et al.</i>	2395
	Proton conduction at the surface of Y-doped BaCeO ₃ and its application to an air/fuel sensor A. Tomita <i>et al.</i>	2493
Electronic properties	Transport properties of InAs epilayers grown on GaAs substrates by using the prelayer technique L. C. Cai <i>et al.</i>	2637
Epitaxial growth	Transport properties of InAs epilayers grown on GaAs substrates by using the prelayer technique L. C. Cai <i>et al.</i>	2637
Fatigue	Influence of strain rate change on corrosion fatigue behavior of A533B steel in simulated BWR water X. Q. Wu <i>et al.</i>	2519
	Experimental investigation of some parameters on isothermal cyclic fatigue creep behavior of AISI 3137 steel at low homologous regimes M. Makaraci	2577
	SEM online investigation of fatigue crack initiation and propagation in cast magnesium alloy X.-S. Wang <i>et al.</i>	2617
Ferroelectrics	Spark-plasma-sintering of bulk SrBi ₂ Ta ₂ O ₉ materials B. Li <i>et al.</i>	2621
Fracture	Influence of strain rate change on corrosion fatigue behavior of A533B steel in simulated BWR water X. Q. Wu <i>et al.</i>	2519
	Fracture toughness measurements of powder metallurgical (P/M) green compacts: A novel method of sample preparation C. C. Degnan <i>et al.</i>	2605
	Effect of pigmentation on fracture toughness of paint films S. K. Singh <i>et al.</i>	2629
Glasses	Electrical resistance of Al ₂ O ₃ fiber reinforced RuO ₂ /glass hybrid composites during tensile loading B. K. Jang <i>et al.</i>	2573

(Continued)

Heat treatment	Effect of continuous cooling heat treatment on interface characteristics of S45C/copper compound casting J.-S. Ho <i>et al.</i>	2473
	Experimental investigation of some parameters on isothermal cyclic fatigue creep behavior of AISI 3137 steel at low homologous regimes M. Makaraci	2577
Hydrolysis	Thermal stability of hydroxyapatite whiskers derived from the hydrolysis of α -TCP . . . H. C. Park <i>et al.</i>	2531
Infrared spectroscopy	FTIR study of vanadium oxide nanotubes from lamellar structure W. Chen <i>et al.</i>	2625
Interfaces	Effect of continuous cooling heat treatment on interface characteristics of S45C/copper compound casting J.-S. Ho <i>et al.</i>	2473
Kinetics	Microstructural control of metastable phase in rapidly solidified Ti-45Al-2Cr-2Nb alloy Y. C. Liu <i>et al.</i>	2613
Laser processing	Microstructural control of metastable phase in rapidly solidified Ti-45Al-2Cr-2Nb alloy Y. C. Liu <i>et al.</i>	2613
Mechanical properties	Influence of strain rate change on corrosion fatigue behavior of A533B steel in simulated BWR water X. Q. Wu <i>et al.</i>	2519
	Probabilistic modeling the deformation and failure in heterogeneous microstructure of Ti-6Al-4V T.-W. Kim	2597
	Fracture toughness measurements of powder metallurgical (P/M) green compacts: A novel method of sample preparation C. C. Degnan <i>et al.</i>	2605
Metals and alloys	Effect of iron and manganese contents on convection-free precipitation and sedimentation of primary α -Al(FeMn)Si phase in liquid Al-11.5Si-0.4Mg alloy X. Cao <i>et al.</i>	2303
	Effect of continuous cooling heat treatment on interface characteristics of S45C/copper compound casting J.-S. Ho <i>et al.</i>	2473
	Dependence of microstructure on the cooling rate for a modified austenite medium Mn steel G.-F. Liang <i>et al.</i>	2569
	Experimental investigation of some parameters on isothermal cyclic fatigue creep behavior of AISI 3137 steel at low homologous regimes M. Makaraci	2577
Microanalysis	Effect of boron addition on sintering of tungsten based alloys M. Debata <i>et al.</i>	2539
	SEM online investigation of fatigue crack initiation and propagation in cast magnesium alloy X.-S. Wang <i>et al.</i>	2617
Microstructure	Effect of boron addition on sintering of tungsten based alloys M. Debata <i>et al.</i>	2539
	On the grain size distributions obtained from different grain growth simulation techniques Y. Sun <i>et al.</i>	2553
	Solidification behavior of undercooled Ni-Pb hypermonotectic alloy H. Xie <i>et al.</i>	2561
	Dependence of microstructure on the cooling rate for a modified austenite medium Mn steel G.-F. Liang <i>et al.</i>	2569
	Probabilistic modeling the deformation and failure in heterogeneous microstructure of Ti-6Al-4V T.-W. Kim	2597
	Characterization of sputtered NiO films using XRD and AFM I. Hotovy <i>et al.</i>	2609
Modelling	On the grain size distributions obtained from different grain growth simulation techniques Y. Sun <i>et al.</i>	2553
	Probabilistic modeling the deformation and failure in heterogeneous microstructure of Ti-6Al-4V T.-W. Kim	2597
Nanocomposites	One-step synthesis of mesoporous PWA/SiO ₂ composite materials using triblock copolymer templates H. S. Yun <i>et al.</i>	2341
Nanomaterials	One-step synthesis of mesoporous PWA/SiO ₂ composite materials using triblock copolymer templates H. S. Yun <i>et al.</i>	2341
	Vacancy formation energy of small particles W. H. Qi <i>et al.</i>	2529
	FTIR study of vanadium oxide nanotubes from lamellar structure W. Chen <i>et al.</i>	2625
Phase transformations	Monoclinic to cubic phase transformation of ZrO ₂ induced by ball milling X. Liu <i>et al.</i>	2585
Polymers	Electrochemical copolymerization of furan and 3-methyl thiophene L. Li <i>et al.</i>	2395
	Investigation about the effect of previous impacts on the impact behavior of high impact polystyrene (HIPS) T. Şahin <i>et al.</i>	2543
Porosity	One-step synthesis of mesoporous PWA/SiO ₂ composite materials using triblock copolymer templates H. S. Yun <i>et al.</i>	2341
	Characterization of a new relaxor perovskite of Ba(Ni _{1/2} Mo _{1/2})O ₃ N. G. Durge <i>et al.</i>	2547
Powder technology	Fracture toughness measurements of powder metallurgical (P/M) green compacts: A novel method of sample preparation C. C. Degnan <i>et al.</i>	2605
Sintering	Effect of boron addition on sintering of tungsten based alloys M. Debata <i>et al.</i>	2539
	Characterization of a new relaxor perovskite of Ba(Ni _{1/2} Mo _{1/2})O ₃ N. G. Durge <i>et al.</i>	2547
	Spark-plasma-sintering of bulk SrBi ₂ Ta ₂ O ₉ materials B. Li <i>et al.</i>	2621

(Continued)

Smart materials	Electrical resistance of Al ₂ O ₃ fiber reinforced RuO ₂ /glass hybrid composites during tensile loading	B. K. Jang <i>et al.</i>	2573
Sol-gel preparation	One-step synthesis of mesoporous PWA/SiO ₂ composite materials using triblock copolymer templates	H. S. Yun <i>et al.</i>	2341
	Crystallization and phase evolution of potassium titanates from alkoxide derived precipitates	R. Janes <i>et al.</i>	2589
	FTIR study of vanadium oxide nanotubes from lamellar structure	W. Chen <i>et al.</i>	2625
Solidification	Effect of iron and manganese contents on convection-free precipitation and sedimentation of primary α -Al(FeMn)Si phase in liquid Al-11.5Si-0.4Mg alloy	X. Cao <i>et al.</i>	2303
	Solidification behavior of undercooled Ni-Pb hypermonotectic alloy	H. Xie <i>et al.</i>	2561
	Microstructural control of metastable phase in rapidly solidified Ti-45Al-2Cr-2Nb alloy	Y. C. Liu <i>et al.</i>	2613
Sputter deposition	Characterization of sputtered NiO films using XRD and AFM	I. Hotovy <i>et al.</i>	2609
Thermal properties	Vacancy formation energy of small particles	W. H. Qi <i>et al.</i>	2529
Thin and thick film coatings	Characterization of sputtered NiO films using XRD and AFM	I. Hotovy <i>et al.</i>	2609
Viscoelasticity	Preparation of aqueous pigment slurry for decorating whiteware by ink jet printing	S. Obata <i>et al.</i>	2581
X-ray techniques	Characterization of a new relaxor perovskite of Ba(Ni _{1/2} Mo _{1/2})O ₃	N. G. Durge <i>et al.</i>	2547
