

CONTENTS BY KEYWORD

Biomaterials	Designing biological apatite suitable for neomycin delivery R. Murugan <i>et al.</i>	4343
Cellular materials	Structure and mechanical properties of micro and macro balloons: An overview of test techniques K. B. Carlisle <i>et al.</i>	3961
	Microstructure and compressive properties of carbon microballoons K. B. Carlisle <i>et al.</i>	3987
	Characterization of epoxy syntactic foams by dynamic mechanical analysis S. Sankaran <i>et al.</i>	4041
Characterization methods	Structure and mechanical properties of micro and macro balloons: An overview of test techniques K. B. Carlisle <i>et al.</i>	3961
	Characterization of epoxy syntactic foams by dynamic mechanical analysis S. Sankaran <i>et al.</i>	4041
	A new indirect method of measuring the contents of solid inclusions in liquid aluminium alloys X. Cao	4285
	Fibre-reinforced composite implant: <i>in vitro</i> mechanical interlocking with bone model material and residual monomer analysis R. H. Mattila <i>et al.</i>	4321
	Designing biological apatite suitable for neomycin delivery R. Murugan <i>et al.</i>	4343
Composite materials	Structure and mechanical properties of micro and macro balloons: An overview of test techniques K. B. Carlisle <i>et al.</i>	3961
	Microstructure and compressive properties of carbon microballoons K. B. Carlisle <i>et al.</i>	3987
	Fibre-reinforced composite implant: <i>in vitro</i> mechanical interlocking with bone model material and residual monomer analysis R. H. Mattila <i>et al.</i>	4321
Corrosion and oxidation	Corrosion and stress corrosion cracking behavior of equal channel angular pressed oxygen-free copper in 3.5% NaCl solution Y. H. Jang <i>et al.</i>	4293
Mechanical properties	Designing biological apatite suitable for neomycin delivery R. Murugan <i>et al.</i>	4343
Metals and alloys	A new indirect method of measuring the contents of solid inclusions in liquid aluminium alloys X. Cao	4285
Microstructure	Microstructure and compressive properties of carbon microballoons K. B. Carlisle <i>et al.</i>	3987
	Corrosion and stress corrosion cracking behavior of equal channel angular pressed oxygen-free copper in 3.5% NaCl solution Y. H. Jang <i>et al.</i>	4293
Nanomaterials	Corrosion and stress corrosion cracking behavior of equal channel angular pressed oxygen-free copper in 3.5% NaCl solution Y. H. Jang <i>et al.</i>	4293
Porosity	Fibre-reinforced composite implant: <i>in vitro</i> mechanical interlocking with bone model material and residual monomer analysis R. H. Mattila <i>et al.</i>	4321
	Designing biological apatite suitable for neomycin delivery R. Murugan <i>et al.</i>	4343
Viscoelasticity	Characterization of epoxy syntactic foams by dynamic mechanical analysis S. Sankaran <i>et al.</i>	4041
