In the procedure for the synthesis of MeA-PA-Gaba (2), the first sentence should read "To a stirred suspension of vacuum-dried 4-aminobutyric acid (206 mg, 2.0 mmol) in dry C₆H₆ (3 mL) at room temperature was added Et₃N (444 mg, 4.4 mmol) followed by Me₃SiCl (475 mg, 0.55 mL, 4.4 mmol)."

Pages 557 and 558. In Table II, the formula for structure 29 is incorrect. In fact, by method E, condensation of methyl iodide with 1, occurred on cyclic nitrogen and after alkaline treatment the anhydro base 2-(benzoylimino)-1,2-dihydro-1,4,6-trimethylpyridine was formed, so that the correct structure should be
