

Additions and Corrections

1995, Volume 38

George R. Pettit,* Sheo Bux Singh, Michael R. Boyd, Ernest Hamel, Robin K. Pettit, Jean M. Schmidt, and Fiona Hogan: Antineoplastic Agents. 291. Isolation and Synthesis of Combretastatins A-4, A-5, and A-6.

Page 1669. The second and third sentences of the third paragraph in the second column should read as follows:

The minimum inhibitory concentrations of combretastatins A-4 and A-5 for *Neisseria gonorrhoeae* were between 25 and 50 $\mu\text{g}/\text{disk}$. The minimum inhibitory concentration of combretastatin A-6 for *N. gonorrhoeae* was between 50 and 100 $\mu\text{g}/\text{disk}$.
