

## Book Review of Theilheimer's Synthetic Methods of Organic Chemistry. Volume 77

**Theilheimer's Synthetic Methods of Organic Chemistry. Volume 77.** Edited by Gillian Tozer-Hotchkiss. S. Karger AG, Basel, Switzerland. 2011. xxiv + 460 pp. 16 × 23 cm. ISBN 978-3-8055-9678-7. \$790.00.

This latest volume of *Theilheimer's Synthetic Methods of Organic Chemistry* contains abstracts of new synthetic methods and supplementary data from papers published up to May 2010. It also contains the customary "Advice to the User" and "Further Trends and Developments in Synthetic Organic Chemistry" sections, the latter of which describes synthetic chemistry developments up to and including November 2010. In addition, there is a 19-page index of reviews of synthetic organic chemistry published up to and including October 2010 and an extensive 55-page reaction starting material and product index.
