

Subject Index

- Accessibility
Microporous poly-(*N,N*-dimethyl-acrylamide)–(1-methacryloyl-ethylene-2-sulphonate)–(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Acetic anhydride
Zeolite catalyzed acylation of heterocyclic compounds. Part III. Comparison between benzofuran and 2-methylbenzofuran 167
- Acetoxylation
Palladium-catalyzed allylic acetoxylation of olefins using hydrogen peroxide as oxidant 127
- Acidity
High-resolution solid-state NMR studies of sulfate-promoted zirconia in relation to *n*-pentane isomerization 81
- Acrylamide–methacryloyl derivatized resins
Microporous poly-(*N,N*-dimethyl-acrylamide)–(1-methacryloyl-ethylene-2-sulphonate)–(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Acylation
Zeolite catalyzed acylation of heterocyclic compounds. Part III. Comparison between benzofuran and 2-methylbenzofuran 167
- Adsorption
A quantum-chemical MINDO/3 study of methane and oxygen interactions with a pure and a modified calcium oxide surface 51
- AlCl_3
Structures of aluminum chloride grafted on silica surface 153
- Alcohols
Oxidation of alcohols with copper(II) salts mediated by nitroxyl radicals immobilized on ultrafine silica and ferrite surface 45
- Alkene
 $\text{RhCl}(\text{PPh}_3)_3$ catalyzed hydrosilylation of styrene and phenylacetylene with phenylsilanes 17
- Alkyne
 $\text{RhCl}(\text{PPh}_3)_3$ catalyzed hydrosilylation of styrene and phenylacetylene with phenylsilanes 17
- Allylic acetoxylation
Palladium-catalyzed allylic acetoxylation of olefins using hydrogen peroxide as oxidant 127
- ^{27}Al MAS NMR
Structures of aluminum chloride grafted on silica surface 153
- Amino-phosphinite
Synthesis of new functionalized polyenes by cooligomerization of butadiene with methyl acrylate on nickel catalysts 211
- Arylsilanes
 $\text{RhCl}(\text{PPh}_3)_3$ catalyzed hydrosilylation of styrene and phenylacetylene with phenylsilanes 17
- Asymmetric hydroformylation
Asymmetric hydroformylation of styrene with PtCl_2 (atropisomeric diphosphine) / SnCl_2 systems 217
- Benzene
Facile benzene ring contraction to cyclopentene derivatives during the copper promoted oxidation of phenol with dioxygen 75
- Benzofuran
Zeolite catalyzed acylation of heterocyclic compounds. Part III. Comparison between benzofuran and 2-methylbenzofuran 167
- Bimetallic catalysts
Heterogenized polymetallic catalysts. Part I. Catalytic air oxidation of 3,5-di-*t*-butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β -di- and triketone surface ligands 187
- Butadiene
Synthesis of new functionalized polyenes by cooligomerization of butadiene with methyl acrylate on nickel catalysts 211
- 1,3-Butadiene copolymers
Functionalized polymers from Ziegler–Natta catalysts 1
- Calcium oxide
A quantum-chemical MINDO/3 study of methane and oxygen interactions with a pure and a modified calcium oxide surface 51
- Calorimetry
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11

- Carbon dioxide
 Hydrogenation of carbon dioxide to formic acid using a 6,6'-dichloro-2,2'-bipyridine complex of ruthenium, *cis*-[Ru(6,6'-Cl₂bpy)₂(H₂O)₂](CF₃SO₃)₂ 33
- Catalyst deactivation
 Microporous poly-(*N,N*-dimethyl-acrylamide)-(1-methacryloyl-ethylene-2-sulphonate)-(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Catechol derivatives
 Heterogenized polymetallic catalysts. Part I.
 Catalytic air oxidation of 3,5-di-*t*-butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β-di- and triketone surface ligands 187
- Chemical vapour deposition
 A versatile one-step method for the preparation of highly dispersed metal supported catalysts 107
- 1-Chloro-3-butene
 Functionalized polymers from Ziegler–Natta catalysts 1
- Chlorobenzene
²⁷Al, ¹H NMR studies of supported LiAlH₄ and Pd–LiAlH₄ as reagents for dechlorination of chlorobenzene 237
- α-Chymotrypsin
 Organic reactions catalyzed by insolubilized enzymes. Part III. Synthesis of peptides catalyzed by α-chymotrypsin immobilized on graft copolymers 255
- ¹³C-NMR analysis
 Functionalized polymers from Ziegler–Natta catalysts 1
- Copolymerization
 Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- Copper
 Facile benzene ring contraction to cyclopentene derivatives during the copper promoted oxidation of phenol with dioxygen 75
- Copper(II)
 Heterogenized polymetallic catalysts. Part I.
 Catalytic air oxidation of 3,5-di-*t*-butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β-di- and triketone surface ligands 187
- Cyclohexene
 Microporous poly-(*N,N*-dimethyl-acrylamide)-(1-methacryloyl-ethylene-2-sulphonate)-(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Cycloolefin
 Hydroooligomerization of cycloolefins—a view of the microstructure of polynorbornene 171
- Cyclopentadienyl derivatives
 Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- Dechlorination
²⁷Al, ¹H NMR studies of supported LiAlH₄ and Pd–LiAlH₄ as reagents for dechlorination of chlorobenzene 237
- Dehydrohalogenation reaction
 Functionalized polymers from Ziegler–Natta catalysts 1
- Dioxygen
 Heterogenized polymetallic catalysts. Part I.
 Catalytic air oxidation of 3,5-di-*t*-butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β-di- and triketone surface ligands 187
- Energy flow
 The role of intramolecular energy flow in surface unimolecular reactions 163
- Enzymes
 The use of stabilised penicillin acylase derivatives improves the design of kinetically controlled synthesis 91
- Epoxidation
 Palladium-catalyzed allylic acetoxylation of olefins using hydrogen peroxide as oxidant 127
- Ethylene
 XPS study of metallocene based catalysts for the polymerization of ethylene 199
 The mechanism of the catalytic behaviour of platinum triphenylphosphine complexes in the ethylene hydrocarbonylation 221
- Ethylene copolymers
 Functionalized polymers from Ziegler–Natta catalysts 1
- Ferrite
 Oxidation of alcohols with copper(II) salts mediated by nitroxyl radicals immobilized on ultrafine silica and ferrite surface 45
- Formic acid
 Hydrogenation of carbon dioxide to formic acid using a 6,6'-dichloro-2,2'-bipyridine complex of ruthenium, *cis*-[Ru(6,6'-Cl₂bpy)₂(H₂O)₂](CF₃SO₃)₂ 33
- Fruit juices
 Immobilization and stabilization of pectinlyase on synthetic polymers for application in the beverage industry 99
- Gamma rays
 Microporous poly-(*N,N*-dimethyl-acrylamide)-(1-methacryloyl-ethylene-2-sulphonate)-(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Grafted copolymers
 Organic reactions catalyzed by insolubilized enzymes. Part III. Synthesis of peptides catalyzed by α-chymotrypsin immobilized on graft copolymers 255

- Hafnium
XPS study of metallocene based catalysts for the polymerization of ethylene 199
- Heck reaction
Heterogeneous palladium catalysts for the Heck reaction 25
- High dispersions
A versatile one-step method for the preparation of highly dispersed metal supported catalysts 107
- ¹H-NMR analysis
Functionalized polymers from Ziegler–Natta catalysts 1
- Homogeneous catalysis
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- Hydrides
²⁷Al, ¹H NMR studies of supported LiAlH₄ and Pd–LiAlH₄ as reagents for dechlorination of chlorobenzene 237
- Hydrocarbonylation
The mechanism of the catalytic behaviour of platinum triphenylphosphine complexes in the ethylene hydrocarbonylation 221
- Hydroformylation
Hydroformylierung homologer ω-Alkencarbonsäureester mit wasserlöslichen Rhodiumcarbonyl/tert. Phosphan-Komplekxkatalysatorsystemen 179
Asymmetric hydroformylation of styrene with PtCl₂(atropoisomeric diphosphine)/SnCl₂ systems 217
- Hydrogenation
Hydrogenation of carbon dioxide to formic acid using a 6,6'-dichloro-2,2'-bipyridine complex of ruthenium, *cis*-[Ru(6,6'-Cl₂bpy)₂(H₂O)₂](CF₃SO₃)₂ 33
Homogeneous catalytic hydrogenation of steroidal dehydroamino acid esters 37
Microporous poly-(*N,N*-dimethyl-acrylamide)–(1-methacryloyl-ethylene-2-sulphonate)–(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Hydrogen peroxide
Palladium-catalyzed allylic acetoxylation of olefins using hydrogen peroxide as oxidant 127
- Hydrolysis
Catalytic activities of novel L-histidyl group-introduced polymers imprinted by a transition state analogue in the hydrolysis of amino acid esters 111
Determination of the rates of formation and hydrolysis of the Schiff bases of pyridoxal with polyallylamine 137
- Hydrosilylation
RhCl(PPh₃)₃ catalyzed hydrosilylation of styrene and phenylacetylene with phenylsilanes 17
- Immobilised enzyme derivatives
The use of stabilised penicillin acylase derivatives improves the design of kinetically controlled synthesis 91
- Immobilization
Organic reactions catalyzed by insolubilized enzymes. Part III. Synthesis of peptides catalyzed by α-chymotrypsin immobilized on graft copolymers 255
- Immobilized enzymes
Immobilization and stabilization of pectinlyase on synthetic polymers for application in the beverage industry 99
- 1-Iodo-3-butene
Functionalized polymers from Ziegler–Natta catalysts 1
- Iodobenzene
Heterogeneous palladium catalysts for the Heck reaction 25
- Iron(III)
Heterogenized polymetallic catalysts. Part I. Catalytic air oxidation of 3,5-di-*t*-butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β-di- and triketone surface ligands 187
- Isomerization
High-resolution solid-state NMR studies of sulfate-promoted zirconia in relation to n-pentane isomerization 81
- Kinetics
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- MAO
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- Mass flow measurement
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- Mechanism
The mechanism of the catalytic behaviour of platinum triphenylphosphine complexes in the ethylene hydrocarbonylation 221
- Mediator
Oxidation of alcohols with copper(II) salts mediated by nitroxyl radicals immobilized on ultrafine silica and ferrite surface 45
- Metal
A versatile one-step method for the preparation of highly dispersed metal supported catalysts 107
- Metallocene
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11

- Hydrooligomerization of cycloolefins –a view of the microstructure of polynorbornene 171
- Metalloenes**
XPS study of metallocene based catalysts for the polymerization of ethylene 199
- Methane**
A quantum-chemical MINDO/3 study of methane and oxygen interactions with a pure and a modified calcium oxide surface 51
- Methyl acrylate**
Heterogeneous palladium catalysts for the Heck reaction 25
Synthesis of new functionalized polyenes by cooligomerization of butadiene with methyl acrylate on nickel catalysts 211
- 2-Methylbenzofuran**
Zeolite catalyzed acylation of heterocyclic compounds. Part III. Comparison between benzofuran and 2-methylbenzofuran 167
- Micellar catalysis**
Hydroformylierung homologer ω -Alkencarbonsäureester mit wasserlöslichen Rhodiumcarbonyl/tert. Phosphan-Komplektsystemen 179
- Molecular imprinting**
Catalytic activities of novel L-histidyl group-introduced polymers imprinted by a transition state analogue in the hydrolysis of amino acid esters 111
- Monomer reactivity ratios**
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- NaBH₄**
Microporous poly-(*N,N*-dimethyl-acrylamide)-(1-methacryloyl-ethylene-2-sulphonate)-(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Nickel**
Synthesis of new functionalized polyenes by cooligomerization of butadiene with methyl acrylate on nickel catalysts 211
- Nitroxyl radical**
Oxidation of alcohols with copper(II) salts mediated by nitroxyl radicals immobilized on ultrafine silica and ferrite surface 45
- NMR**
High-resolution solid-state NMR studies of sulfate-promoted zirconia in relation to n-pentane isomerization 81
²⁷Al, ¹H NMR studies of supported LiAlH₄ and Pd-LiAlH₄ as reagents for dechlorination of chlorobenzene 237
- Norbornene**
Hydrooligomerization of cycloolefins –a view of the microstructure of polynorbornene 171
- n-Pentane**
High-resolution solid-state NMR studies of sulfate-promoted zirconia in relation to n-pentane isomerization 81
- 1-Octene**
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- Olefins**
Functionalized polymers from Ziegler-Natta catalysts 1
Palladium-catalyzed allylic acetoxylation of olefins using hydrogen peroxide as oxidant 127
- Organic synthesis**
The use of stabilised penicillin acylase derivatives improves the design of kinetically controlled synthesis 91
- Oxidation**
Oxidation of alcohols with copper(II) salts mediated by nitroxyl radicals immobilized on ultrafine silica and ferrite surface 45
Facile benzene ring contraction to cyclopentene derivatives during the copper promoted oxidation of phenol with dioxygen 75
Heterogenized polymetallic catalysts. Part I. Catalytic air oxidation of 3,5-di-*t*-butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β -di- and triketone surface ligands 187
- Oxygen**
A quantum-chemical MINDO/3 study of methane and oxygen interactions with a pure and a modified calcium oxide surface 51
- Palladium**
Heterogeneous palladium catalysts for the Heck reaction 25
Palladium-catalyzed allylic acetoxylation of olefins using hydrogen peroxide as oxidant 127
Microporous poly-(*N,N*-dimethyl-acrylamide)-(1-methacryloyl-ethylene-2-sulphonate)-(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
²⁷Al, ¹H NMR studies of supported LiAlH₄ and Pd-LiAlH₄ as reagents for dechlorination of chlorobenzene 237
- Pectic enzymes**
Immobilization and stabilization of pectinlyase on synthetic polymers for application in the beverage industry 99
- Pectinlyase**
Immobilization and stabilization of pectinlyase on synthetic polymers for application in the beverage industry 99
- Penicillin G acylase**
The use of stabilised penicillin acylase derivatives improves the design of kinetically controlled synthesis 91
- Peptide synthesis**
Organic reactions catalyzed by insolubilized

- enzymes. Part III. Synthesis of peptides catalyzed by α -chymotrypsin immobilized on graft copolymers 255
- Phenol
Facile benzene ring contraction to cyclopentene derivatives during the copper promoted oxidation of phenol with dioxygen 75
- Phosphine complexes
Homogeneous catalytic hydrogenation of steroidal dehydroamino acid esters 37
- Photoemission
XPS study of metallocene based catalysts for the polymerization of ethylene 199
- Platinum
Asymmetric hydroformylation of styrene with PtCl_2 (atropisomeric diphosphine) / SnCl_2 systems 217
The mechanism of the catalytic behaviour of platinum triphenylphosphine complexes in the ethylene hydrocarbonylation 221
- p*-Nitrotoluene
Microporous poly-(*N,N*-dimethyl-acrylamide)–(1-methacryloyl-ethylene-2-sulphonate)–(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143
- Polyallylamine
Determination of the rates of formation and hydrolysis of the Schiff bases of pyridoxal with polyallylamine 137
- Polymer catalyst
Catalytic activities of novel L-histidyl group-introduced polymers imprinted by a transition state analogue in the hydrolysis of amino acid esters 111
- Polymerization
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
XPS study of metallocene based catalysts for the polymerization of ethylene 199
- Propene
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts 11
- Propylene copolymers
Functionalized polymers from Ziegler–Natta catalysts 1
- Proton transfer
Synthesis of new functionalized polyenes by cooligomerization of butadiene with methyl acrylate on nickel catalysts 211
- Pyridine derivatives
Hydrogenation of carbon dioxide to formic acid using a 6,6'-dichloro-2,2'-bipyridine complex of ruthenium, *cis*-[Ru(6,6'-Cl₂bpy)₂(H₂O)₂](CF₃SO₃)₂ 33
- Pyridoxal
Determination of the rates of formation and hydrolysis of the Schiff bases of pyridoxal with polyallylamine 137
- Quantum-chemical study
A quantum-chemical MINDO/3 study of methane and oxygen interactions with a pure and a modified calcium oxide surface 51
- Rhodium
RhCl(PPh₃)₃ catalyzed hydrosilylation of styrene and phenylacetylene with phenylsilanes 17
Homogeneous catalytic hydrogenation of steroidal dehydroamino acid esters 37
A versatile one-step method for the preparation of highly dispersed metal supported catalysts 107
Hydroformylierung homologer ω -Alkencarbonsäureester mit wasserlöslichen Rhodiumcarbonyl/tert. Phosphan-Komplekxkatalysatorsystemen 179
- Ring cleavage
Heterogenized polymetallic catalysts. Part I. Catalytic air oxidation of 3,5-di-*t*-butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β -di- and triketone surface ligands 187
- Ring contraction
Facile benzene ring contraction to cyclopentene derivatives during the copper promoted oxidation of phenol with dioxygen 75
- Ruthenium
Hydrogenation of carbon dioxide to formic acid using a 6,6'-dichloro-2,2'-bipyridine complex of ruthenium, *cis*-[Ru(6,6'-Cl₂bpy)₂(H₂O)₂](CF₃SO₃)₂ 33
- Schiff base
Determination of the rates of formation and hydrolysis of the Schiff bases of pyridoxal with polyallylamine 137
- Silica
Heterogeneous palladium catalysts for the Heck reaction 25
Oxidation of alcohols with copper(II) salts mediated by nitroxyl radicals immobilized on ultrafine silica and ferrite surface 45
- Solid acid
Structures of aluminum chloride grafted on silica surface 153
- Stabilised enzyme derivatives
The use of stabilised penicillin acylase derivatives improves the design of kinetically controlled synthesis 91
- Steroidal esters
Homogeneous catalytic hydrogenation of steroidal dehydroamino acid esters 37
- Styrene
Asymmetric hydroformylation of styrene with PtCl_2 (atropisomeric diphosphine) / SnCl_2 systems 217

Sulfate-promoted oxide

High-resolution solid-state NMR studies of sulfate-promoted zirconia in relation to n-pentane isomerization 81

Supported catalysts

Heterogeneous palladium catalysts for the Heck reaction 25

A versatile one-step method for the preparation of highly dispersed metal supported catalysts 107

Surface reactions

The role of intramolecular energy flow in surface unimolecular reactions 163

Swellability

Microporous poly-(*N,N*-dimethyl-acrylamide)–(1-methacryloyl-ethylene-2-sulphonate)–(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143

Thiol

RhCl(PPh₃)₃ catalyzed hydrosilylation of styrene and phenylacetylene with phenylsilanes 17

Titanium

XPS study of metallocene based catalysts for the polymerization of ethylene 199

Transition state analogue

Catalytic activities of novel L-histidyl group-introduced polymers imprinted by a transition state analogue in the hydrolysis of amino acid esters 111

Triethylamine

Hydrogenation of carbon dioxide to formic acid using a 6,6'-dichloro-2,2'-bipyridine complex of ruthenium, *cis*-[Ru(6,6'-Cl₂bpy)₂(H₂O)₂](CF₃SO₃)₂ 33

Triphenylphosphine

The mechanism of the catalytic behaviour of platinum triphenylphosphine complexes in the ethylene hydrocarbonylation 221

Unimolecular reactions

The role of intramolecular energy flow in surface unimolecular reactions 163

Unsaturated carboxylic acid esters

Hydroformylierung homologer ω -Alkencarbonsäureester mit wasserlöslichen Rhodiumcarbonyl/*tert.* Phosphan-Komplekxkatalysatorsystemen 179

Vanadium

Functionalized polymers from Ziegler–Natta catalysts 1

Vapour deposition

A versatile one-step method for the preparation of highly dispersed metal supported catalysts 107

Vinylation

Heterogeneous palladium catalysts for the Heck reaction 25

Water soluble complexes

Hydroformylierung homologer ω -Alkencarbonsäureester mit wasserlöslichen Rhodiumcarbonyl/*tert.* Phosphan-Komplekxkatalysatorsystemen 179

XAD7

Immobilization and stabilization of pectinase on synthetic polymers for application in the beverage industry 99

XPS

XPS study of metallocene based catalysts for the polymerization of ethylene 199

X-ray diffraction

Microporous poly-(*N,N*-dimethyl-acrylamide)–(1-methacryloyl-ethylene-2-sulphonate)–(*N,N'*-methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts 143

Zeolite

Zeolite catalyzed acylation of heterocyclic compounds. Part III. Comparison between benzofuran and 2-methylbenzofuran 167

Ziegler–Natta

Hydrooligomerization of cycloolefins –a view of the microstructure of polynorbornene 171

Ziegler–Natta catalysts

Reaction calorimetric investigation of 1-olefin homo-and copolymerization using homogeneous metallocene catalysts 11

Zirconia

High-resolution solid-state NMR studies of sulfate-promoted zirconia in relation to n-pentane isomerization 81

Zirconium

Reaction calorimetric investigation of 1-olefin homo-and copolymerization using homogeneous metallocene catalysts 11
XPS study of metallocene based catalysts for the polymerization of ethylene 199
