Chemical and Metal Complex Catalysis

Functionalized polymers from Ziegler–Natta catalysts [M705] M. Galimberti, U. Giannini, E. Albizzati, S. Caldari (Ferrara, Italy) and L. Abis (Novara, Italy)	1
Reaction calorimetric investigation of 1-olefin homo- and copolymerization using homogeneous metallocene catalysts [M716] M.J. Schneider and R. Mülhaupt (Freiburg, Germany)	11
RhCl(PPH ₃) ₃ catalyzed hydrosilylation of styrene and phenylacetylene with phenylsilanes [M717] J.B. Baruah, K. Osakada and T. Yamamoto (Yokohama, Japan)	17
Heterogeneous palladium catalysts for the Heck reaction [M710] J. Kiviaho (VTT, Finland), T. Hanaoka, Y. Kubota and Y. Sugi (Ibaraki, Japan)	25
Hydrogenation of carbon dioxide to formic acid using a 6,6'-dichloro-2,2'-bipyridine complex of ruthenium, <i>cis</i> -[Ru(6,6'-Cl ₂ bpy) ₂ (H ₂ O) ₂](CF ₃ SO ₃) ₂ [M727] C.P. Lau and Y.Z. Chen (Kowloon, Hong Kong)	33
Homogeneous catalytic hydrogenation of steroidal dehydroamino acid esters [M708] R. Skoda-Földes, L. Kollár (Veszprém, Hungary) and A. Arcadi (L'Aquila, Italy)	37

Molecular Aspects of Heterogeneous Catalysis

Oxidation of alcohols with copper(II) salts mediated by nitroxyl radicals immobilized on ultrafine silica and ferrite surface [M719] N. Tsubokawa, T. Kimoto (Niigata, Japan) and T. Endo (Yokohama, Japan)	45
A quantum-chemical MINDO/3 study of methane and oxygen interactions with a pure and a modified calcium oxide surface [M701] N.U. Zhanpeisov (Novosibirsk, Russia), V. Staemmler and M. Baerns (Bochum, Germany)	51
Kinetic aspects in the selectivity of deep hydrogenation of 2-ethylanthraquinone over Pd/SiO ₂ [M707] A. Drelinkiewicz (Cracow, Poland)	61
Facile benzene ring contraction to cyclopentene derivatives during the copper promoted oxidation of phenol with dioxygen [M728] M. Lanfranchi (Parma, Italy), L. Prati, M. Rossi (Milano, Italy) and A. Tiripicchio (Parma, Italy)	75
High-resolution solid-state NMR studies of sulfate-promoted zirconia in relation to n-pentane isomerization [M739] V.M. Mastikhin, A.V. Nosov, S.V. Filimonova, V.V. Tersikh, N.S. Kotsarenko, V.P. Shmachkova and V.I. Kim (Novosibirsk, Russia)	81

Biomimetic Catalysis

The use of stabilised penicillin acylase derivatives improves the design of kinetically controlled synthesis [M709] R. Fernandez-Lafuente, C.M. Rosell and J.M. Guisan (Madrid, Spain)	91
Immobilization and stabilization of pectinlyase on synthetic polymers for application in the beverage industry [M711] G. Spagna, P.G. Pifferi and M. Tramontini (Bologna, Italy)	99

Molecular Aspects of Heterogeneous Catalysis

A versatile one-step method for the preparation of highly dispersed metal supported catalysts [M745] P. Serp, R. Feurer, R. Morancho and P. Kalck (Toulouse, France)	L107
Catalytic activities of novel L-histidyl group-introduced polymers imprinted by a transition state analogue in the hydrolysis of amino acid esters [M756] K. Ohkubo (Fukuoka, Japan), Y. Urata, S. Hirota, Y. Funakoshi, T. Sagawa, S. Usui (Kumamoto, Japan) and K. Yoshinaga (Kitakyushu, Japan)	L111

Chemical and Metal Complex Catalysis

Metal carbonyl anion loaded molecular reservoir particles –application to the catalytic synthesis of two styrene oxide derivatives [M720]	
L. Hong and E. Ruckenstein (Buffalo, NY, USA)	115
Palladium-catalyzed allylic acetoxylation of olefins using hydrogen peroxide as oxidant [M722]	
C. Jia, P. Müller and H. Mimoun (Geneva, Switzerland)	127
Determination of the rates of formation and hydrolysis of the Schiff bases of pyridoxal with polyallylamine [M733]	
M. Angeles García del Vado, A.F. Rodríguez Cardona, G.R. Echevarría Gorostidi (Alcalá de Henares, Spain), M. Carolina González Martínez, J.G. Santos Blanco (Santiago, Chile) and F.G. Blanco (Madrid, Spain)	137

Molecular Aspects of Heterogeneous Catalysis

Microporous poly-(<i>N,N</i> -dimethyl-acrylamide)–(1-methacryloyl-ethylene-2-sulphonate)–(<i>N,N'</i> -methylene-bis-acrylamide) resins as hydrophilic supports for metal catalysts [M743]	
M. Kralik, M. Hronec, V. Jorik (Bratislava, Slovak Republic), S. Lora (Legnaro Pd., Italy), G. Palma, M. Zecca, A. Biffis (Padova, Italy) and B. Corain (L'Aquila, Italy)	143
Structures of aluminum chloride grafted on silica surface [M731]	
S. Sato (Chiba, Japan) and G.E. Maciel (Ft. Collins, CO, USA)	153
The role of intramolecular energy flow in surface unimolecular reactions [M729]	
M. Šolc (Prague, Czech Republic)	163

Molecular Aspects of Heterogeneous Catalysis

Zeolite catalyzed acylation of heterocyclic compounds. Part III. Comparison between benzofuran and 2-methylbenzofuran [M784]	
F. Richard, H. Carreyre and G. Pérot (Poitiers, France)	L167

Chemical and Metal Complex Catalysis

Hydrooligomerization of cycloolefins –a view of the microstructure of polynorbornene [M742]	
M. Arndt, R. Engehausen, W. Kaminsky and K. Zoumis (Hamburg, Germany)	171
Hydroformylierung homologer ω -Alkencarbonsäureester mit wasserlöslichen Rhodiumcarbonyl/ <i>tert.</i> Phosphan-Komplekxkatalysatorsystemen [M723]	
B. Fell, C. Schobben and G. Papadogianakis (Aachen, Germany)	179
Heterogenized polymeric catalysts. Part I. Catalytic air oxidation of 3,5-di- <i>t</i> -butylphenol by Cu(II) and Fe(III) complexed to a polyphenylene polymer containing β -di- and tri-ketone surface ligands [M732]	
K. Zaw and P.M. Henry (Chicago, IL, USA)	187
XPS study of metallocene based catalysts for the polymerization of ethylene [M724]	
F. Garbassi, L. Gila and A. Proto (Novara, Italy)	199
Synthesis of new functionalized polyenes by cooligomerization of butadiene with methyl acrylate on nickel catalysts [M744]	
A. ElAmrani (El Jadida, Morocco), I. Suisse, A. Mortreux (Villeneuve d'Ascq, France) and N. Knouzi (El Jadida, Morocco) ...	211
Asymmetric hydroformylation of styrene with PtCl ₂ (atropisomeric diphosphine)/SnCl ₂ systems [M734]	
A. Scrivanti, S. Zeggio, V. Beghetto and U. Matteoli (Venezia, Italy)	217
The mechanism of the catalytic behaviour of platinum triphenylphosphine complexes in the ethylene hydrocarbonylation [M718]	
G.N. Il'inich, V.N. Zudin, A.V. Nosov, V.A. Rogov and V.A. Likholobov (Novosibirsk, Russian Federation)	221

Molecular Aspects of Heterogeneous Catalysis

²⁷ Al, ¹ H NMR studies of supported LiAlH ₄ and Pd–LiAlH ₄ as reagents for dechlorination of chlorobenzene [M737]	
V.I. Simagina, V.M. Mastikhin, V.A. Yakovlev, I.V. Stoyanova and V.A. Likholobov (Novosibirsk, Russia)	237
Catalytic and structural properties of ruthenium bimetallic catalysts: effects of pretreatment on the behaviour of various Ru/Al ₂ O ₃ catalysts in alkane hydrogenolysis [M768]	
G.C. Bond and J.C. Slaat (Uxbridge, UK)	243

Biomimetic Catalysis

Organic reactions catalyzed by insolubilized enzymes. Part III. Synthesis of peptides catalyzed by α -chymotrypsin immobilized on graft copolymers [M735]	
A.R. Alcantara (Madrid, Spain), M. Helena Gil, A. Jorge Guiomar (Coimbra, Portugal), M. Trinidad Lopez-Belmonte (Madrid, Spain), M.C.M. Sobral (Coimbra, Portugal), C. Torres and J.V. Sinisterra (Madrid, Spain)	255
