

Subject Index

- Acetal
Hydroformylation of acrolein acetal 25
- Acrolein
Hydroformylation of acrolein acetal 25
- ¹⁰⁹Ag NMR
Effect of particle size upon catalytic and electronic properties of supported Ag catalysts: combined catalytic, ¹⁰⁹Ag NMR and quantum chemistry studies 175
- Alkylation
Characterization and aniline alkylation activity of vanadia and silica-supported vanadia catalysts 57
- 1-Alkyne
Further studies of the Pt(II) catalyzed hydromethoxycarbonylation of 1-alkynes 223
- Alkynes
Reactions of W(CCMe₃)(OCMe₃)₃ with terminal alkynes: metathesis and polymerization 95
Regioselective palladium(II) catalyzed hydroesterification of alkynes and alkynols using formate esters 197
- Alkynols
Regioselective palladium(II) catalyzed hydroesterification of alkynes and alkynols using formate esters 197
- Aluminium
The electronic states and Lewis acidity of surface aluminum atoms in γ -Al₂O₃ model cluster: An *ab initio* MO study 277
- Alumoxane
The influence of cyclopentadienyl ring substituent steric and electronic effects on the ethylene- α -olefin copolymerisation behaviour of (CpR)₂ZrCl₂/ethylalumoxane catalysts 181
- Ambient conditions
Epoxidation of cyclohexene catalyzed by copper(II) complexes under Mukaiyama's conditions 9
- Aniline
Characterization and aniline alkylation activity of vanadia and silica-supported vanadia catalysts 57
- Arylpropionic acids
Hydrolysis of (*R,S*)-2-aryl propionic esters by pure lipase B from *Candida cylindracea* 317
- Bile salt inhibition
Lamb pregastric lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl]glycerol: temperature, pH and solvent isotope effects 77
- Bilirubin oxidase
Abnormal effect of mercury ions on bilirubin oxidase activity 11
- Bimetallic catalysts
Catalytic and structural properties of ruthenium bimetallic catalysts: kinetics of 2,2,3,3-tetramethylbutane hydrogenolysis 35
Catalytic and structural properties of ruthenium monometallic and bimetallic catalysts: characterization by EXAFS and XRD 65
- Candida cylindracea*
Hydrolysis of (*R,S*)-2-aryl propionic esters by pure lipase B from *Candida cylindracea* 317
- Carbon
Selectivity in hydrodehalogenation of polychloro- and polybromobenzenes under multiphase conditions 301
- Carbon monoxide
The CO-oxidation on Pd-rich surfaces of PdCu(110): hysteresis in reaction rates 271
- Carbonylation
Cobalt catalysed carbonylation of reactive chlorides into esters by methyl formate without carbon monoxide and methanol added 15
Further studies of the Pt(II) catalyzed hydromethoxycarbonylation of 1-alkynes 223
- β -Carbonylenolate complexes
Epoxidation of cyclohexene catalyzed by copper(II) complexes under Mukaiyama's conditions 9
- Carbyne complexes
Reactions of W(CCMe₃)(OCMe₃)₃ with terminal alkynes: metathesis and polymerization 95
- Chevreul phase catalyst
Studies of the mechanism of thiophene hydrodesulfurization: ²H NMR and mass spectral analysis of 1,3-butadiene produced in the deuterodesulfurization (DDS) of thiophene over PbMo₆S₈ catalyst 283
- Chlorides
Cobalt catalysed carbonylation of reactive chlorides into esters by methyl formate without carbon monoxide and methanol added 15
- Cobalt
Cobalt catalysed carbonylation of reactive chlorides into esters by methyl formate without carbon monoxide and methanol added 15
Chemistry of dicobalt octacarbonyl on zinc oxide. Homonuclear ion-pairing surface species related to catalytic activity in ethylene hydroformylation 49
- Coking
Use of NMR techniques for studying deactivation of zeolites by coking 123
- Compensation effect
Eyring transition-state theory and kinetics in catalysis 1

- Copolymerisation**
The influence of cyclopentadienyl ring substituent steric and electronic effects on the ethylene- α -olefin copolymerisation behaviour of (CpR)₂ZrCl₂/ethylalumoxane catalysts 181
- Copper**
The CO-oxidation on Pd-rich surfaces of PdCu (110): hysteresis in reaction rates 271
- Copper(II)**
Epoxidation of cyclohexene catalyzed by copper(II) complexes under Mukaiyama's conditions 9
- Coupling reactions**
Selective reductive dimerization of phenylacetaldehyde to 2,4-diphenylbutanal catalysed by novel dirhodium complexes 107
- Cyclopentadienyl complexes**
The influence of cyclopentadienyl ring substituent steric and electronic effects on the ethylene- α -olefin copolymerisation behaviour of (CpR)₂ZrCl₂/ethylalumoxane catalysts 181
- Cytochrome P-450**
Pyridiniumporphyrin covalently bound to polystyrene: an efficient model of cytochrome P-450 reactivity 311
- Deactivation**
Use of NMR techniques for studying deactivation of zeolites by coking 123
- Desulfovibrio vulgaris***
Effect of Hg(II) on hydrogenase activity from *Desulfovibrio vulgaris* (Miyazaki) 329
- Deuterium labelling**
Studies of the mechanism of thiophene hydrodesulfurization: ²H NMR and mass spectral analysis of 1,3-butadiene produced in the deuterodesulfurization (DDS) of thiophene over PbMo₆S₈ catalyst 283
- Dimerization**
Selective reductive dimerization of phenylacetaldehyde to 2,4-diphenylbutanal catalysed by novel dirhodium complexes 107
- Dioxygen**
Epoxidation of cyclohexene catalyzed by copper(II) complexes under Mukaiyama's conditions 9
- Dirhodium complexes**
Selective reductive dimerization of phenylacetaldehyde to 2,4-diphenylbutanal catalysed by novel dirhodium complexes 107
- Electronic states**
The electronic states and Lewis acidity of surface aluminum atoms in γ -Al₂O₃ model cluster: An *ab initio* MO study 277
- Enantioselective processes**
Homogeneous catalysis by osmium complexes. A review 231
- Enantioselectivity**
Enantioselective catalytic epoxidation of styrenes by iododibenzene using chiral ruthenium(II) Schiff base complexes 117
Hydrolysis of (*R,S*)-2-aryl propionic esters by pure lipase B from *Candida cylindracea* 317
- Enzymic catalysis**
Lamb pregastric lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl]glycerol: temperature, pH and solvent isotope effects 77
- Epoxidation**
Epoxidation of cyclohexene catalyzed by copper(II) complexes under Mukaiyama's conditions 9
Enantioselective catalytic epoxidation of styrenes by iododibenzene using chiral ruthenium(II) Schiff base complexes 117
Pyridiniumporphyrin covalently bound to polystyrene: an efficient model of cytochrome P-450 reactivity 311
- Esters**
Cobalt catalysed carbonylation of reactive chlorides into esters by methyl formate without carbon monoxide and methanol added 15
- Ethylene**
Chemistry of dicobalt octacarbonyl on zinc oxide. Homonuclear ion-pairing surface species related to catalytic activity in ethylene hydroformylation 49
- Eyring transition-state theory**
Eyring transition-state theory and kinetics in catalysis 1
- Flash photolysis**
The effect of chemical modification of zinc myoglobin on the photoinduced electron transfer with methyl viologen 87
- Formate**
Cobalt catalysed carbonylation of reactive chlorides into esters by methyl formate without carbon monoxide and methanol added 15
- Formate esters**
Regioselective palladium(II) catalyzed hydroesterification of alkynes and alkynols using formate esters 197
- Gas phase**
Probing Ru-Pd/SiO₂ catalysts by gas phase *o*-xylene hydrogenation 155
- Homogeneous catalysis**
Homogeneous catalysis by osmium complexes. A review 231
- Hydrodehalogenation**
Selectivity in hydrodehalogenation of polychloro- and polybromobenzenes under multiphase conditions 301
- Hydrodesulfurization**
Studies of the mechanism of thiophene hydrodesulfurization: ²H NMR and mass spectral analysis of 1,3-butadiene produced in the deuterodesulfurization (DDS) of thiophene over PbMo₆S₈ catalyst 283
- Hydroesterification**
Regioselective palladium(II) catalyzed hydroesterification of alkynes and alkynols using formate esters 197
- Hydroformylation**
Hydroformylation of acrolein acetal 25
Chemistry of dicobalt octacarbonyl on zinc oxide. Homonuclear ion-pairing surface species related to catalytic activity in ethylene hydroformylation 49
- Hydrogenase**
Effect of Hg(II) on hydrogenase activity from *Desulfovibrio vulgaris* (Miyazaki) 329
- Hydrogenation**
Probing Ru-Pd/SiO₂ catalysts by gas phase *o*-xylene hydrogenation 155
Homogeneous catalysis by osmium complexes. A review 231
- Hydrogenolysis**
Catalytic and structural properties of ruthenium bimetallic catalysts: kinetics of 2,2,3,3-tetramethylbutane hydrogenolysis 35
- Hydrolysis**
Hydrolysis of (*R,S*)-2-aryl propionic esters by pure lipase B from *Candida cylindracea* 317

- Hydrolysis of triolein
Lamb pregastric lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl]glycerol: temperature, pH and solvent isotope effects 77
- Hydrosilylation
Selective formation of *cis*-PhCH=CH(SiEt₃) by reaction of PhC≡CH with the stoichiometric amount of HSiEt₃, in the presence of ruthenium catalysts 21
Homogeneous catalysis by osmium complexes. A review 231
- Hydroxylation
Homogeneous catalysis by osmium complexes. A review 231
- Hysteresis
The CO-oxidation on Pd-rich surfaces of PdCu(110): hysteresis in reaction rates 271
- Inhibition
Effect of Hg(II) on hydrogenase activity from *Desulfovibrio vulgaris* (Miyazaki) 329
- Isomerization
Komplekxkatalytische Isomerisierung von 4-Methyl-1-penten. Kinetische Untersuchungen. 111
- Isopolyoxometallate
Single crystals of isopolyoxometallate(VI) salts as catalysts for the ring-opening polymerization of norbornene 31
- Kinetics
Eyring transition-state theory and kinetics in catalysis 1
Catalytic and structural properties of ruthenium bimetallic catalysts: kinetics of 2,2,3,3-tetramethylbutane hydrogenolysis 35
Komplekxkatalytische Isomerisierung von 4-Methyl-1-penten. Kinetische Untersuchungen. 111
- Lamb pregastric lipase
Lamb pregastric lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl]glycerol: temperature, pH and solvent isotope effects 77
- Laser flash photolysis
The effect of chemical modification of zinc myoglobin on the photoinduced electron transfer with methyl viologen 87
- Lewis acidity
The electronic states and Lewis acidity of surface aluminum atoms in γ -Al₂O₃ model cluster: An *ab initio* MO study 277
- Lipase
Hydrolysis of (*R,S*)-2-aryl propionic esters by pure lipase B from *Candida cylindracea* 317
- Magic angle spinning
Characterization of MoO₃/TiO₂ catalysts by ¹H magic-angle-spinning NMR spectroscopy 5
- Mechanisms
Studies of the mechanism of thiophene hydrodesulfurization: ²H NMR and mass spectral analysis of 1,3-butadiene produced in the deuterodesulfurization (DDS) of thiophene over PbMo₆S₈ catalyst 283
- Mercury ion
Abnormal effect of mercury ions on bilirubin oxidase activity 11
Effect of Hg(II) on hydrogenase activity from *Desulfovibrio vulgaris* (Miyazaki) 329
- Metathesis
Single crystals of isopolyoxometallate(VI) salts as catalysts for the ring-opening polymerization of norbornene 31
Reactions of W(CCM₃)(OCM₃)₃ with terminal alkynes: metathesis and polymerization 95
- Methanol
Cobalt catalysed carbonylation of reactive chlorides into esters by methyl formate without carbon monoxide and methanol added 15
- 4-Methyl-1-pentene
Komplekxkatalytische Isomerisierung von 4-Methyl-1-penten. Kinetische Untersuchungen. 111
- Microporous materials
Structure–activity relationship in zeolites 245
- Molecular orbital study
The electronic states and Lewis acidity of surface aluminum atoms in γ -Al₂O₃ model cluster: An *ab initio* MO study 277
- Molybdenum
Characterization of MoO₃/TiO₂ catalysts by ¹H magic-angle-spinning NMR spectroscopy 5
Single crystals of isopolyoxometallate(VI) salts as catalysts for the ring-opening polymerization of norbornene 31
- Monometallic catalysts
Catalytic and structural properties of ruthenium monometallic and bimetallic catalysts: characterization by EXAFS and XRD 65
- Mukaiyama's conditions
Epoxidation of cyclohexene catalyzed by copper(II) complexes under Mukaiyama's conditions 9
- Multiphase system
Selectivity in hydrodehalogenation of polychloro- and polybromobenzenes under multiphase conditions 301
- Myoglobin
The effect of chemical modification of zinc myoglobin on the photoinduced electron transfer with methyl viologen 87
- Nickel
Komplekxkatalytische Isomerisierung von 4-Methyl-1-penten. Kinetische Untersuchungen. 111
- Ni–Raney
Selectivity in hydrodehalogenation of polychloro- and polybromobenzenes under multiphase conditions 301
- NMR spectroscopy
Use of NMR techniques for studying deactivation of zeolites by coking 123
- Norbornene
Single crystals of isopolyoxometallate(VI) salts as catalysts for the ring-opening polymerization of norbornene 31
- Nuclear magnetic resonance
Effect of particle size upon catalytic and electronic properties of supported Ag catalysts: combined catalytic, ¹⁰⁹Ag NMR and quantum chemistry studies 175
- Octacarbonyl cobalt complex
Chemistry of dicobalt octacarbonyl on zinc oxide. Homonuclear ion-pairing surface species related to catalytic activity in ethylene hydroformylation 49
- Onium salt
Selectivity in hydrodehalogenation of polychloro- and polybromobenzenes under multiphase conditions 301
- Organometallic
Chemistry of dicobalt octacarbonyl on zinc oxide. Homonuclear ion-pairing surface species related to catalytic activity in ethylene hydroformylation 49

- Osmium
Homogeneous catalysis by osmium complexes. A review 231
- Oxidation
The CO-oxidation on Pd-rich surfaces of PdCu(110): hysteresis in reaction rates 271
- o*-Xylene
Probing Ru–Pd/SiO₂ catalysts by gas phase *o*-xylene hydrogenation 155
- Palladium
Probing Ru–Pd/SiO₂ catalysts by gas phase *o*-xylene hydrogenation 155
Regioselective palladium(II) catalyzed hydroesterification of alkynes and alkynols using formate esters 197
The CO-oxidation on Pd-rich surfaces of PdCu(110): hysteresis in reaction rates 271
Selectivity in hydrodehalogenation of polychloro- and polybromobenzenes under multiphase conditions 301
- Pd/C Selectivity
Selectivity in hydrodehalogenation of polychloro- and polybromobenzenes under multiphase conditions 301
- Penicillium janthinellum*
Abnormal effect of mercury ions on bilirubin oxidase activity 11
- Phenylacetaldehyde
Selective reductive dimerization of phenylacetaldehyde to 2,4-diphenylbutanal catalysed by novel dirhodium complexes 107
- Phenylacetylene
Reactions of W(CMe₃)(OCMe₃)₃ with terminal alkynes: metathesis and polymerization 95
- Phosphine
Hydroformylation of acrolein acetal 25
- Phosphorus(III) ligands
Komplekxkatalytische Isomerisierung von 4-Methyl-1-penten. Kinetische Untersuchungen. 111
- Photoinduced electron transfer
The effect of chemical modification of zinc myoglobin on the photoinduced electron transfer with methyl viologen 87
- Platinum
Further studies of the Pt(II) catalyzed hydromethoxycarbonylation of 1-alkynes 223
- Polymerization
Single crystals of isopolyoxometallate(VI) salts as catalysts for the ring-opening polymerization of norbornene 31
Reactions of W(CMe₃)(OCMe₃)₃ with terminal alkynes: metathesis and polymerization 95
- Porphyrin
Pyridiniumporphyrin covalently bound to polystyrene: an efficient model of cytochrome P-450 reactivity 311
- Propionic acids
Hydrolysis of (*R,S*)-2-aryl propionic esters by pure lipase B from *Candida cylindracea* 317
- Purification
Hydrolysis of (*R,S*)-2-aryl propionic esters by pure lipase B from *Candida cylindracea* 317
- Reaction rates
The CO-oxidation on Pd-rich surfaces of PdCu(110): hysteresis in reaction rates 271
- Reduction
Selective reductive dimerization of phenylacetaldehyde to 2,4-diphenylbutanal catalysed by novel dirhodium complexes 107
- Regioselectivity
Regioselective palladium(II) catalyzed hydroesterification of alkynes and alkynols using formate esters 197
- Review
Homogeneous catalysis by osmium complexes. A review 231
- Rhodium
Hydroformylation of acrolein acetal 25
Selective reductive dimerization of phenylacetaldehyde to 2,4-diphenylbutanal catalysed by novel dirhodium complexes 107
- Ring opening
Single crystals of isopolyoxometallate(VI) salts as catalysts for the ring-opening polymerization of norbornene 31
- Ruthenium
Selective formation of *cis*-PhCH=CH(SiEt₃) by reaction of PhC≡CH with the stoichiometric amount of HSiEt₃, in the presence of ruthenium catalysts 21
Catalytic and structural properties of ruthenium bimetallic catalysts: kinetics of 2,2,3,3-tetramethylbutane hydrogenolysis 35
Catalytic and structural properties of ruthenium monometallic and bimetallic catalysts: characterization by EXAFS and XRD 65
Enantioselective catalytic epoxidation of styrenes by iododisilobenzene using chiral ruthenium(II) Schiff base complexes 117
Probing Ru–Pd/SiO₂ catalysts by gas phase *o*-xylene hydrogenation 155
- Schiff bases
Enantioselective catalytic epoxidation of styrenes by iododisilobenzene using chiral ruthenium(II) Schiff base complexes 117
- Silica
Characterization and aniline alkylation activity of vanadia and silica-supported vanadia catalysts 57
Probing Ru–Pd/SiO₂ catalysts by gas phase *o*-xylene hydrogenation 155
- Silver
Effect of particle size upon catalytic and electronic properties of supported Ag catalysts: combined catalytic, ¹⁰⁹Ag NMR and quantum chemistry studies 175
- Small metal particles
Effect of particle size upon catalytic and electronic properties of supported Ag catalysts: combined catalytic, ¹⁰⁹Ag NMR and quantum chemistry studies 175
- Solvent isotope effects
Lamb pregastric lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl]glycerol: temperature, pH and solvent isotope effects 77
- Statistical design
The influence of cyclopentadienyl ring substituent steric and electronic effects on the ethylene- α -olefin copolymerisation behaviour of (CpR)₂ZrCl₂/ethylalumoxane catalysts 181
- Structural properties
Catalytic and structural properties of ruthenium monometallic and bimetallic catalysts: characterization by EXAFS and XRD 65
- Structure–activity relationship
Structure–activity relationship in zeolites 245

- Styrene**
Enantioselective catalytic epoxidation of styrenes by iodostyrene using chiral ruthenium(II) Schiff base complexes 117
- Substituted cyclopentadienyl rings**
The influence of cyclopentadienyl ring substituent steric and electronic effects on the ethylene- α -olefin copolymerisation behaviour of (CpR)₂ZrCl₂/ethylalumoxane catalysts 181
- Succinaldehyde**
Hydroformylation of acrolein acetal 25
- Supported catalysts**
Characterization of MoO₃/TiO₂ catalysts by ¹H magic-angle-spinning NMR spectroscopy 5
Catalytic and structural properties of ruthenium bimetallic catalysts: kinetics of 2,2,3,3-tetramethylbutane hydrogenolysis 35
Characterization and aniline alkylation activity of vanadia and silica-supported vanadia catalysts 57
Probing Ru-Pd/SiO₂ catalysts by gas phase *o*-xylene hydrogenation 155
- Surface**
The electronic states and Lewis acidity of surface aluminum atoms in γ -Al₂O₃ model cluster: An *ab initio* MO study 277
- Surface chemistry**
Chemistry of dicobalt octacarbonyl on zinc oxide. Homonuclear ion-pairing surface species related to catalytic activity in ethylene hydroformylation 49
- Surface electronic structure**
Effect of particle size upon catalytic and electronic properties of supported Ag catalysts: combined catalytic, ¹⁰⁹Ag NMR and quantum chemistry studies 175
- Surfaces**
The CO-oxidation on Pd-rich surfaces of PdCu(110): hysteresis in reaction rates 271
- Tetramethylbutane**
Catalytic and structural properties of ruthenium bimetallic catalysts: kinetics of 2,2,3,3-tetramethylbutane hydrogenolysis 35
- Thermal stability**
Homogeneous catalysis by osmium complexes. A review 231
- Thiophene**
Studies of the mechanism of thiophene hydrodesulfurization: ²H NMR and mass spectral analysis of 1,3-butadiene produced in the deuterodesulfurization (DDS) of thiophene over PbMo₆S₈ catalyst 283
- Titania**
Characterization of MoO₃/TiO₂ catalysts by ¹H magic-angle-spinning NMR spectroscopy 5
- Tungsten**
Single crystals of isopolyoxometallate(VI) salts as catalysts for the ring-opening polymerization of norbornene 31
Reactions of W(CMe₃)(OCMe₃)₃ with terminal alkynes: metathesis and polymerization 95
- Vanadia**
Characterization and aniline alkylation activity of vanadia and silica-supported vanadia catalysts 57
- XRD**
Catalytic and structural properties of ruthenium monometallic and bimetallic catalysts: characterization by EXAFS and XRD 65
- Zeolites**
Use of NMR techniques for studying deactivation of zeolites by coking 123
Structure-activity relationship in zeolites 245
- Zinc**
The effect of chemical modification of zinc myoglobin on the photoinduced electron transfer with methyl viologen 87
- Zinc oxide**
Chemistry of dicobalt octacarbonyl on zinc oxide. Homonuclear ion-pairing surface species related to catalytic activity in ethylene hydroformylation 49
- Zirconocene**
The influence of cyclopentadienyl ring substituent steric and electronic effects on the ethylene- α -olefin copolymerisation behaviour of (CpR)₂ZrCl₂/ethylalumoxane catalysts 181
