

Subject Index

Acetaldehyde

The role of Mn and Li promoters in supported rhodium catalysts in the formation of acetic acid and acetaldehyde (Luo, H.-Y. (122) 115)

Acetic acid

The role of Mn and Li promoters in supported rhodium catalysts in the formation of acetic acid and acetaldehyde (Luo, H.-Y. (122) 115)

Acid activated clay

Catalytic conversion of propylene oxide on a super acid sulfonic clay (SASC) system (Salmón, M. (122) 169)

Acidity

On the nature of acid sites in substituted aluminophosphate molecular sieves with the AEL topology (Arias, D. (122) 175)

Acid-sites nature

On the nature of acid sites in substituted aluminophosphate molecular sieves with the AEL topology (Arias, D. (122) 175)

Activated carbon support

Hydroformylation of 1-hexene on Rh/C and Co/SiO₂ catalysts (Kainulainen, T.A. (122) 39)

Activation model

Model of activation of the cobalt foil as a catalyst for CO₂ methanation (Łojewska, J. (122) 1)

²⁷Al and ³¹P MAS NMR

Investigations on the aqueous solution and solid-state cation exchanged MAPO-ATS type molecular sieve (Akolekar, D.B. (122) 81)

Al complexes

²⁷Al NMR MAS study of AlEt_{3-n}Cl_n/MgCl₂ systems (Potapov, A.G. (122) 61)

Allylic substitution

Asymmetric palladium(0)-catalyzed synthesis of allylic ethers (Iourtchenko, A. (122) 91)

²⁷Al NMR

²⁷Al NMR MAS study of AlEt_{3-n}Cl_n/MgCl₂ systems (Potapov, A.G. (122) 61)

Aluminophosphate molecular sieve

Investigations on the aqueous solution and solid-state cation exchanged MAPO-ATS type molecular sieve (Akolekar, D.B. (122) 81)

Aniline

Activity of homogeneous transition metal catalysts for oxidative carbonylation of aniline to *N,N'*diphenyl urea (Mulla, S.A.R. (122) 103)

Bentonite catalyst

Catalytic conversion of propylene oxide on a super acid sulfonic clay (SASC) system (Salmón, M. (122) 169)

1-butene transformation

On the nature of acid sites in substituted aluminophosphate molecular sieves with the AEL topology (Arias, D. (122) 175)

Carbonylation

Activity of homogeneous transition metal catalysts for oxidative carbonylation of aniline to *N,N'*diphenyl urea (Mulla, S.A.R. (122) 103)

Catalysis

Catalytic conversion of propylene oxide on a super acid sulfonic clay (SASC) system (Salmón, M. (122) 169)

Catalyst characterization (FTIR/LRS/XPS/XRD)

Metal cluster hydrodesulfurization catalysts based on ternary lanthanum molybdenum sulfides (Hilsenbeck, S.J. (122) 13)

Cation exchange

Investigations on the aqueous solution and solid-state cation exchanged MAPO-ATS type molecular sieve (Akolekar, D.B. (122) 81)

Cellosolves

Catalytic conversion of propylene oxide on a super acid sulfonic clay (SASC) system (Salmón, M. (122) 169)

Characterization by FT-IR

Characterization and catalysis of a SiO₂-supported [Au₆Pt] cluster [(AuPPh₃)₆Pt(PPh₃)]²⁺/SiO₂ (Yuan, Y. (122) 147)

Chevre phase

Metal cluster hydrodesulfurization catalysts based on ternary lanthanum molybdenum sulfides (Hilsenbeck, S.J. (122) 13)

Chiral allylic ether

Asymmetric palladium(0)-catalyzed synthesis of allylic ethers (Iourtchenko, A. (122) 91)

Cobalt catalyst

Model of activation of the cobalt foil as a catalyst for CO₂ methanation (Łojewska, J. (122) 1)

CO₂ methanation

Model of activation of the cobalt foil as a catalyst for CO₂ methanation (Łojewska, J. (122) 1)

CVD

Shape selectivity of ZSM-5 zeolite modified with chemical vapor deposition of silicon and germanium alkoxides (Tynjälä, P. (122) 159)

Diphenyl urea

Activity of homogeneous transition metal catalysts for oxidative carbonylation of aniline to *N,N'*diphenyl urea (Mulla, S.A.R. (122) 103)

Extended Hückel

The Co-adsorption of tetramethylpiperidine and TiCl₄ on β-MgCl₂. A theoretical study of a Ziegler–Natta pre-catalyst (Ferreira, M.L. (122) 25)

- Heterogeneous catalysts**
 Hydroformylation of 1-hexene on Rh/C and Co/SiO₂ catalysts (Kainulainen, T.A. (122) 39)
- 1-hexene hydroformylation
 Hydroformylation of 1-hexene on Rh/C and Co/SiO₂ catalysts (Kainulainen, T.A. (122) 39)
- Homogeneous catalysts**
 Activity of homogeneous transition metal catalysts for oxidative carbonylation of aniline to *N,N'*diphenyl urea (Mulla, S.A.R. (122) 103)
- Hydrodesulfurization**
 Metal cluster hydrodesulfurization catalysts based on ternary lanthanum molybdenum sulfides (Hilsenbeck, S.J. (122) 13)
- Hydroformylation**
 Enantioselective hydroformylation of vinyl-aromatics using a rhodium complex with the (1*R*,2*R*,4*R*)-2-(2-diphenylphosphinyl)-1,7,7-trimethylbicyclo[2.2.1]hept-2-yl)pyridine (Chelucci, G. (122) 111)
 The effect of triflate additives in platinum-catalyzed enantioselective hydroformylation (Kégl, T. (122) 95)
- Impregnation**
 The chemical status of indium in indium impregnated HZSM-5 catalysts for the SCR of NO with CH₄ (Zhou, X. (122) 125)
- Indium**
 The chemical status of indium in indium impregnated HZSM-5 catalysts for the SCR of NO with CH₄ (Zhou, X. (122) 125)
- In-situ EXAFS and TPR**
 Characterization and catalysis of a SiO₂-supported [Au₆Pt] cluster [(AuPPh₃)₆Pt(PPh₃)]²⁺/SiO₂ (Yuan, Y. (122) 147)
- Lithium**
 The role of Mn and Li promoters in supported rhodium catalysts in the formation of acetic acid and acetaldehyde (Luo, H.-Y. (122) 115)
- Manganese**
 The role of Mn and Li promoters in supported rhodium catalysts in the formation of acetic acid and acetaldehyde (Luo, H.-Y. (122) 115)
- MAPO-36**
 Investigations on the aqueous solution and solid-state cation exchanged MAPO-ATS type molecular sieve (Akolekar, D.B. (122) 81)
- MeAPO**
 Investigations on the aqueous solution and solid-state cation exchanged MAPO-ATS type molecular sieve (Akolekar, D.B. (122) 81)
- Metal cluster catalysis**
 Metal cluster hydrodesulfurization catalysts based on ternary lanthanum molybdenum sulfides (Hilsenbeck, S.J. (122) 13)
- Metallocene supported catalysts**
 A semi-empirical study on Ziegler Natta catalyst: Concerning the interaction EtInd₂ZrCl₂/MAO/SiO₂ (Ferreira, M.L. (122) 51)
- MgCl₂**
²⁷Al NMR MAS study of AlEt_{3-n}Cl_n/MgCl₂ systems (Potapov, A.G. (122) 61)
 The Co-adsorption of tetramethylpiperidine and TiCl₄ on β-MgCl₂. A theoretical study of a Ziegler-Natta pre-catalyst (Ferreira, M.L. (122) 25)
- Molecular orbital**
 A semi-empirical study on Ziegler Natta catalyst: Concerning the interaction EtInd₂ZrCl₂/MAO/SiO₂ (Ferreira, M.L. (122) 51)
- Molecular sieves**
 On the nature of acid sites in substituted aluminophosphate molecular sieves with the AEL topology (Arias, D. (122) 175)
- Molybdenum ternary sulfides**
 Metal cluster hydrodesulfurization catalysts based on ternary lanthanum molybdenum sulfides (Hilsenbeck, S.J. (122) 13)
- Mo-MFI**
 Selective catalytic oxidation of thioethers to sulfoxides over Mo-silicalite-1 (MoS-1) molecular sieves (Raghavan, P.S. (122) 75)
- Mo-silicalite**
 Selective catalytic oxidation of thioethers to sulfoxides over Mo-silicalite-1 (MoS-1) molecular sieves (Raghavan, P.S. (122) 75)
- Nitrophenol**
 Photocatalytic degradation of mono-, di- and trinitrophenol in aqueous TiO₂ suspension (Tanaka, K. (122) 67)
- Nonsteroidal antiinflammatory agents**
 The effect of triflate additives in platinum-catalyzed enantioselective hydroformylation (Kégl, T. (122) 95)
- Oxidative carbonylation**
 Activity of homogeneous transition metal catalysts for oxidative carbonylation of aniline to *N,N'*diphenyl urea (Mulla, S.A.R. (122) 103)
- Palladium**
 Asymmetric palladium(0)-catalyzed synthesis of allylic ethers (Iourtchenko, A. (122) 91)
 Deactivation and regeneration of sulfur-poisoned supported palladium complexes (Fígoli, N.S. (122) 141)
- Phenol**
 Asymmetric palladium(0)-catalyzed synthesis of allylic ethers (Iourtchenko, A. (122) 91)
- 2-Phenyl-propanal**
 The effect of triflate additives in platinum-catalyzed enantioselective hydroformylation (Kégl, T. (122) 95)
- Photocatalysis**
 Photocatalytic degradation of mono-, di- and trinitrophenol in aqueous TiO₂ suspension (Tanaka, K. (122) 67)
- Platinum**
 The effect of triflate additives in platinum-catalyzed enantioselective hydroformylation (Kégl, T. (122) 95)
- Pyridylphosphinite**
 Enantioselective hydroformylation of vinyl-aromatics using a rhodium complex with the (1*R*,2*R*,4*R*)-2-(2-diphenylphosphinyl)-1,7,7-trimethylbicyclo[2.2.1]hept-2-yl)pyridine (Chelucci, G. (122) 111)
- Regeneration**
 Deactivation and regeneration of sulfur-poisoned supported palladium complexes (Fígoli, N.S. (122) 141)
- Rhodium**
 The role of Mn and Li promoters in supported rhodium catalysts in the formation of acetic acid and acetaldehyde (Luo, H.-Y. (122) 115)
- Rhodium catalysts**
 Enantioselective hydroformylation of vinyl-aromatics using a rhodium complex with the (1*R*,2*R*,4*R*)-2-(2-diphenylphosphinyl)-1,7,7-trimethylbicyclo[2.2.1]hept-2-yl)pyridine (Chelucci, G. (122) 111)

Rhodium/cobalt catalysts

Hydroformylation of 1-hexene on Rh/C and Co/SiO₂ catalysts (Kainulainen, T.A. (122) 39)

Selective catalytic reduction (SCR) of NO

The chemical status of indium in indium impregnated HZSM-5 catalysts for the SCR of NO with CH₄ (Zhou, X. (122) 125)

Shape selectivity

Shape selectivity of ZSM-5 zeolite modified with chemical vapor deposition of silicon and germanium alkoxides (Tynjälä, P. (122) 159)

Silicon and germanium alkoxide

Shape selectivity of ZSM-5 zeolite modified with chemical vapor deposition of silicon and germanium alkoxides (Tynjälä, P. (122) 159)

Solid-state cation exchange

Investigations on the aqueous solution and solid-state cation exchanged MAPO-ATS type molecular sieve (Akolekar, D.B. (122) 81)

Solvolysis

Catalytic conversion of propylene oxide on a super acid sulfonic clay (SASC) system (Salmón, M. (122) 169)

Stability

Hydroformylation of 1-hexene on Rh/C and Co/SiO₂ catalysts (Kainulainen, T.A. (122) 39)

Stereospecific site

The Co-adsorption of tetramethylpiperidine and TiCl₄ on β -MgCl₂. A theoretical study of a Ziegler–Natta pre-catalyst (Ferreira, M.L. (122) 25)

Substituted AlPO₄

On the nature of acid sites in substituted aluminophosphate molecular sieves with the AEL topology (Arias, D. (122) 175)

Sulfones

Selective catalytic oxidation of thioethers to sulfoxides over Mo-silicalite-1 (MoS-1) molecular sieves (Raghavan, P.S. (122) 75)

Sulfoxidation

Selective catalytic oxidation of thioethers to sulfoxides over Mo-silicalite-1 (MoS-1) molecular sieves (Raghavan, P.S. (122) 75)

Sulfur resistance

Deactivation and regeneration of sulfur-poisoned supported palladium complexes (Fígoli, N.S. (122) 141)

Super acid clay

Catalytic conversion of propylene oxide on a super acid sulfonic clay (SASC) system (Salmón, M. (122) 169)

Supported bimetallic [Au₆Pt] cluster, H₂–D₂ equilibration

Characterization and catalysis of a SiO₂-supported [Au₆Pt] cluster [(AuPPh₃)₆Pt(PPh₃)₂]²⁺/SiO₂ (Yuan, Y. (122) 147)

Supported complexes

Deactivation and regeneration of sulfur-poisoned supported palladium complexes (Fígoli, N.S. (122) 141)

Supported Ziegler–Natta catalysts

²⁷Al NMR MAS study of AlEt_{3–n}Cl_n/MgCl₂ systems (Potapov, A.G. (122) 61)

Temperature-programmed process

The chemical status of indium in indium impregnated HZSM-5 catalysts for the SCR of NO with CH₄ (Zhou, X. (122) 125)

Tetramethylpiperidine

The Co-adsorption of tetramethylpiperidine and TiCl₄ on β -MgCl₂. A theoretical study of a Ziegler–Natta pre-catalyst (Ferreira, M.L. (122) 25)

Thioethers

Selective catalytic oxidation of thioethers to sulfoxides over Mo-silicalite-1 (MoS-1) molecular sieves (Raghavan, P.S. (122) 75)

TiCl₄

The Co-adsorption of tetramethylpiperidine and TiCl₄ on β -MgCl₂. A theoretical study of a Ziegler–Natta pre-catalyst (Ferreira, M.L. (122) 25)

Titania

Photocatalytic degradation of mono-, di- and trinitrophenol in aqueous TiO₂ suspension (Tanaka, K. (122) 67)

Transition metal catalyst

Activity of homogeneous transition metal catalysts for oxidative carbonylation of aniline to *N,N'*-diphenyl urea (Mulla, S.A.R. (122) 103)

Triflate anion

The effect of triflate additives in platinum-catalyzed enantioselective hydroformylation (Kégl, T. (122) 95)

Vinyl-aromatics

Enantioselective hydroformylation of vinyl-aromatics using a rhodium complex with the (1*R*,2*R*,4*R*)-2-(2-diphenylphosphinyl)-1,7,7-trimethylbicyclo[2.2.1]hept-2-ylpyridine (Chelucci, G. (122) 111)

Zeolites

The chemical status of indium in indium impregnated HZSM-5 catalysts for the SCR of NO with CH₄ (Zhou, X. (122) 125)

Ziegler–Natta polymerisation

The Co-adsorption of tetramethylpiperidine and TiCl₄ on β -MgCl₂. A theoretical study of a Ziegler–Natta pre-catalyst (Ferreira, M.L. (122) 25)

ZSM-5

Shape selectivity of ZSM-5 zeolite modified with chemical vapor deposition of silicon and germanium alkoxides (Tynjälä, P. (122) 159)

The chemical status of indium in indium impregnated HZSM-5 catalysts for the SCR of NO with CH₄ (Zhou, X. (122) 125)
