

Subject Index

Ab initio

Theoretical investigations on Ziegler–Natta catalysis: Coordination of the electron donors to titanium modified $MgCl_2$ support (Puhakka, E. (123) 171)

Acetophenone

Acetylation of benzene to acetophenone over zeolite catalysts (Singh, A.P. (123) 141)

Acetylation of benzene

Acetylation of benzene to acetophenone over zeolite catalysts (Singh, A.P. (123) 141)

Acids

Carbonylation of aryl and alkyl halides catalyzed by a binuclear rhodium hydroxide complex (Mizuno, T. (123) 21)

Alcohol

Theoretical investigations on Ziegler–Natta catalysis: Coordination of the electron donors to titanium modified $MgCl_2$ support (Puhakka, E. (123) 171)

Alcohol dehydration reaction

Effect of tin content on silica mixed oxides: Sulfated and unsulfated catalysts (Salas, P. (123) 149)

Alcohols

The Pd(II)-catalyzed homogeneous isomerization of hexenes (Dahl, D.B. (123) 91)

Alkenes

The Pd(II)-catalyzed homogeneous isomerization of hexenes (Dahl, D.B. (123) 91)

Alkylation

Tungsten(II) chlorocarbonyls as alkene metathesis, arene alkylation and alkyne polymerization catalysts (Szymafiska-Buzar, T. (123) 113)

Aluminum alkyl

NMR studies on the reactivity of aluminium compounds with an unsaturated alcohol (Turunen, J. (123) 35)

Biomimetic oxidation

Kinetic isotope effects and mechanism of biomimetic oxidation of methane and benzene on FeZSM-5 zeolite (Dubkov, K.A. (123) 155)

Carbonylation

Carbonylation of aryl and alkyl halides catalyzed by a binuclear rhodium hydroxide complex (Mizuno, T. (123) 21)

Catalysis

Methyleneglucoses – Transition metal catalyzed synthesis from formaline and glucose; importance of heterobimetallic catalyst (Danikiewicz, W. (123) 25)

The catalytic effect of Mo^V on the oxidation of iodide by chlorate (Villata, L.S. (123) 85)

Catalytic characterization

Effect of tin content on silica mixed oxides: Sulfated and unsulfated catalysts (Salas, P. (123) 149)

Catalytic hydrogenation

Aqueous-phase hydrogenation of polybutadiene, styrene–butadiene, and nitrile–butadiene polymer emulsions catalyzed by water-soluble rhodium complexes (Mudalige, D.C. (123) 15)

Chlorate

The catalytic effect of Mo^V on the oxidation of iodide by chlorate (Villata, L.S. (123) 85)

CO adsorption

Effects of thiophene on CO adsorption and crotonaldehyde hydrogenation over silica-supported Pd–Cu catalysts (Ashour, S.S. (123) 65)

Cycloaromatization

Oxidative synthesis of aromatics from propane on mixed VMgO-zeolitecatalysts (Corma, A. (123) 75)

Deamination of amines

Modelling study of transient behaviour of elimination reactions of alcohols and amines on oxide catalysts (Pekář, M. (123) 131)

Dehydration of alcohols

Modelling study of transient behaviour of elimination reactions of alcohols and amines on oxide catalysts (Pekář, M. (123) 131)

5'-Deoxyypyridoxal

Schiff bases of poly-L-lysine and some compounds of the vitamin B-6 group. Influence of polypeptidic structure (García del Vado, M.A. (123) 9)

Derivative thermogravimetry (DTG)

Influence of precursors on the sulfated alumina superacid: Support and impregnating solution effect (Yang, T.-s. (123) 163)

Diacids

Carbonylation of aryl and alkyl halides catalyzed by a binuclear rhodium hydroxide complex (Mizuno, T. (123) 21)

Diels–Alder

$ZnCl_2$, ZnI_2 and $TiCl_4$ supported on silica gel as catalysts for the Diels–Alder reactions of furan (Fraile, J.M. (123) 43)

Electron donor

Theoretical investigations on Ziegler–Natta catalysis: Coordination of the electron donors to titanium modified $MgCl_2$ support (Puhakka, E. (123) 171)

Ester

Theoretical investigations on Ziegler–Natta catalysis: Coordination of the electron donors to titanium modified $MgCl_2$ support (Puhakka, E. (123) 171)

FeZSM-5

Kinetic isotope effects and mechanism of biomimetic oxidation of methane and benzene on FeZSM-5 zeolite (Dubkov, K.A. (123) 155)

- Furan**
 ZnCl₂, ZnI₂ and TiCl₄ supported on silica gel as catalysts for the Diels–Alder reactions of furan (Fraile, J.M. (123) 43)
- Ga-containing MFI**
 Oxidative synthesis of aromatics from propane on mixed VMgO-zeolitecatalysts (Corma, A. (123) 75)
- Glucose**
 Methylene-glucoses – Transition metal catalyzed synthesis from formaline and glucose; importance of heterobimetallic catalyst (Danikiewicz, W. (123) 25)
- Glucoside**
 Effect of ultrasound on KSF/O mediated glycosylations (Brochette, S. (123) 123)
- Glycosylation**
 Effect of ultrasound on KSF/O mediated glycosylations (Brochette, S. (123) 123)
- Heterobimetallic transition metal catalyst**
 Methylene-glucoses – Transition metal catalyzed synthesis from formaline and glucose; importance of heterobimetallic catalyst (Danikiewicz, W. (123) 25)
- Heterogeneous catalysis**
 ZnCl₂, ZnI₂ and TiCl₄ supported on silica gel as catalysts for the Diels–Alder reactions of furan (Fraile, J.M. (123) 43)
- Homogeneous**
 The Pd(II)-catalyzed homogeneous isomerization of hexenes (Dahl, D.B. (123) 91)
- Hydrogenation of olefins**
 Ruthenium surface compounds supported on silica gel. I. Preparation and catalytic properties (Köhler, J.U. (123) 49)
- Iodide oxidation**
 The catalytic effect of Mo^V on the oxidation of iodide by chlorate (Villata, L.S. (123) 85)
- Iodobenzenes**
 Carbonylation of aryl and alkyl halides catalyzed by a binuclear rhodium hydroxide complex (Mizuno, T. (123) 21)
- Iron–1,10-phenanthroline**
 Kinetics of oxidation of vanadium(IV) by iron(III)–1,10-phenanthroline complex: Micellar effect of sodium dodecyl sulphate (Krishnamachari, M.S. (123) 103)
- Isomerization**
 The Pd(II)-catalyzed homogeneous isomerization of hexenes (Dahl, D.B. (123) 91)
- Isomerization of olefins**
 Ruthenium surface compounds supported on silica gel. I. Preparation and catalytic properties (Köhler, J.U. (123) 49)
- Ketone**
 Theoretical investigations on Ziegler–Natta catalysis: Coordination of the electron donors to titanium modified MgCl₂ support (Puhakka, E. (123) 171)
- Kinetic isotope effect**
 Kinetic isotope effects and mechanism of biomimetic oxidation of methane and benzene on FeZSM-5 zeolite (Dubkov, K.A. (123) 155)
- Magnesium chloride support**
 Theoretical investigations on Ziegler–Natta catalysis: Coordination of the electron donors to titanium modified MgCl₂ support (Puhakka, E. (123) 171)
- Metathesis**
 Tungsten(II) chlorocarbonyls as alkene metathesis, arene alkylation and alkyne polymerization catalysts (Szymańska-Buzar, T. (123) 113)
- Methylaluminumoxane**
 NMR studies on the reactivity of aluminium compounds with an unsaturated alcohol (Turunen, J. (123) 35)
- Mo^V**
 The catalytic effect of Mo^V on the oxidation of iodide by chlorate (Villata, L.S. (123) 85)
- Montmorillonite**
 Effect of ultrasound on KSF/O mediated glycosylations (Brochette, S. (123) 123)
- Nitrous oxide**
 Kinetic isotope effects and mechanism of biomimetic oxidation of methane and benzene on FeZSM-5 zeolite (Dubkov, K.A. (123) 155)
- NMR**
 NMR studies on the reactivity of aluminium compounds with an unsaturated alcohol (Turunen, J. (123) 35)
- Nonstationary kinetics**
 Modelling study of transient behaviour of elimination reactions of alcohols and amines on oxide catalysts (Pekař, M. (123) 131)
- Oxidation of benzene to phenol**
 Kinetic isotope effects and mechanism of biomimetic oxidation of methane and benzene on FeZSM-5 zeolite (Dubkov, K.A. (123) 155)
- Oxidation of methane to methanol**
 Kinetic isotope effects and mechanism of biomimetic oxidation of methane and benzene on FeZSM-5 zeolite (Dubkov, K.A. (123) 155)
- Oxidative dehydrogenation**
 Oxidative synthesis of aromatics from propane on mixed VMgO-zeolitecatalysts (Corma, A. (123) 75)
- Palladium(II)**
 The Pd(II)-catalyzed homogeneous isomerization of hexenes (Dahl, D.B. (123) 91)
- Pd–Cu/SiO₂**
 Effects of thiophene on CO adsorption and crotonaldehyde hydrogenation over silica-supported Pd–Cu catalysts (Ashour, S.S. (123) 65)
- Phillips catalysts**
 Ruthenium surface compounds supported on silica gel. I. Preparation and catalytic properties (Köhler, J.U. (123) 49)
- Polyglucose**
 Effect of ultrasound on KSF/O mediated glycosylations (Brochette, S. (123) 123)
- Poly-L-lysine**
 Schiff bases of poly-L-lysine and some compounds of the vitamin B-6 group. Influence of polypeptidic structure (García del Vado, M.A. (123) 9)
- Polymer emulsions**
 Aqueous-phase hydrogenation of polybutadiene, styrene–butadiene, and nitrile–butadiene polymer emulsions catalyzed by water-soluble rhodium complexes (Mudalige, D.C. (123) 15)
- Polymerization**
 Tungsten(II) chlorocarbonyls as alkene metathesis, arene alkylation and alkyne polymerization catalysts (Szymańska-Buzar, T. (123) 113)
- Propane**
 Oxidative synthesis of aromatics from propane on mixed VMgO-zeolitecatalysts (Corma, A. (123) 75)

- Pyridoxal**
Schiff bases of poly-L-lysine and some compounds of the vitamin B-6 group. Influence of polypeptidic structure (García del Vado, M.A. (123) 9)
- Pyridoxal 5'-phosphate**
Schiff bases of poly-L-lysine and some compounds of the vitamin B-6 group. Influence of polypeptidic structure (García del Vado, M.A. (123) 9)
- Rhodium complex**
Carbonylation of aryl and alkyl halides catalyzed by a binuclear rhodium hydroxide complex (Mizuno, T. (123) 21)
- Ruthenium**
Ruthenium surface compounds supported on silica gel. I. Preparation and catalytic properties (Köhler, J.U. (123) 49)
- Schiff base**
Schiff bases of poly-L-lysine and some compounds of the vitamin B-6 group. Influence of polypeptidic structure (García del Vado, M.A. (123) 9)
- Silica gel**
Ruthenium surface compounds supported on silica gel. I. Preparation and catalytic properties (Köhler, J.U. (123) 49)
- Sodium dodecyl sulphate**
Kinetics of oxidation of vanadium(IV) by iron(III)-1,10-phenanthroline complex: Micellar effect of sodium dodecyl sulphate (Krishnamachari, M.S. (123) 103)
- Solid superacid**
Effect of tin content on silica mixed oxides: Sulfated and unsulfated catalysts (Salas, P. (123) 149)
- Stop-effect**
Modelling study of transient behaviour of elimination reactions of alcohols and amines on oxide catalysts (Pekař, M. (123) 131)
- Sulfated alumina**
Influence of precursors on the sulfated alumina superacid: Support and impregnating solution effect (Yang, T.-s. (123) 163)
- Sulfated tin oxide-silica catalysts**
Effect of tin content on silica mixed oxides: Sulfated and unsulfated catalysts (Salas, P. (123) 149)
- Superacid**
Influence of precursors on the sulfated alumina superacid: Support and impregnating solution effect (Yang, T.-s. (123) 163)
- Surface compounds**
Ruthenium surface compounds supported on silica gel. I. Preparation and catalytic properties (Köhler, J.U. (123) 49)
- Temperature-programmed desorption of ammonia (NH₃-TPD)**
Influence of precursors on the sulfated alumina superacid: Support and impregnating solution effect (Yang, T.-s. (123) 163)
- Thiophene poisoning**
Effects of thiophene on CO adsorption and crotonaldehyde hydrogenation over silica-supported Pd-Cu catalysts (Ashour, S.S. (123) 65)
- TiCl₄/silica**
ZnCl₂, ZnI₂ and TiCl₄ supported on silica gel as catalysts for the Diels-Alder reactions of furan (Fraile, J.M. (123) 43)
- Titanium catalyst**
Theoretical investigations on Ziegler-Natta catalysis: Coordination of the electron donors to titanium modified MgCl₂ support (Puhakka, E. (123) 171)
- Transient response methods**
Modelling study of transient behaviour of elimination reactions of alcohols and amines on oxide catalysts (Pekař, M. (123) 131)
- Transition-state theory**
On the application of transition state theory to heterogeneous catalytic reactions (Murzin, D.Yu. (123) L5)
- Triodide**
The catalytic effect of Mo^V on the oxidation of iodide by chlorate (Villata, L.S. (123) 85)
- Tungsten(II) complexes**
Tungsten(II) chlorocarbonyls as alkene metathesis, arene alkylation and alkyne polymerization catalysts (Szymańska-Buzar, T. (123) 113)
- Ultrasound**
Effect of ultrasound on KSF/O mediated glycosylations (Brochette, S. (123) 123)
- Unsaturated alcohol**
NMR studies on the reactivity of aluminium compounds with an unsaturated alcohol (Turunen, J. (123) 35)
- α,β-Unsaturated dienophiles**
ZnCl₂, ZnI₂ and TiCl₄ supported on silica gel as catalysts for the Diels-Alder reactions of furan (Fraile, J.M. (123) 43)
- Vanadium**
Kinetics of oxidation of vanadium(IV) by iron(III)-1,10-phenanthroline complex: Micellar effect of sodium dodecyl sulphate (Krishnamachari, M.S. (123) 103)
- Vanadium magnesium oxides**
Oxidative synthesis of aromatics from propane on mixed VMgO-zeolitecatalysts (Corma, A. (123) 75)
- Water-soluble rhodium complexes**
Aqueous-phase hydrogenation of polybutadiene, styrene-butadiene, and nitrile-butadiene polymer emulsions catalyzed by water-soluble rhodium complexes (Mudalige, D.C. (123) 15)
- Zeolite catalysts**
Acetylation of benzene to acetophenone over zeolite catalysts (Singh, A.P. (123) 141)
- Ziegler-Natta**
Theoretical investigations on Ziegler-Natta catalysis: Coordination of the electron donors to titanium modified MgCl₂ support (Puhakka, E. (123) 171)
- ZnCl₂/silica**
ZnCl₂, ZnI₂ and TiCl₄ supported on silica gel as catalysts for the Diels-Alder reactions of furan (Fraile, J.M. (123) 43)
- ZnI₂/silica**
ZnCl₂, ZnI₂ and TiCl₄ supported on silica gel as catalysts for the Diels-Alder reactions of furan (Fraile, J.M. (123) 43)
