

## Subject Index

### Ab initio

Ab initio effective potential calculation on  $\gamma$ - $\text{Mo}_2\text{N}$ -thiophene systems (Rong, C. (127) 191)

### Adsorption

Temperature-programmed surface reaction (TPSR) of pre-adsorbed carbon CO and  $\text{CO}/\text{H}_2$  synthesis over Ru-Cs/ $\text{Al}_2\text{O}_3$  catalysts (Sakakini, B.H. (127) 203)

### Alcohol oxidation

On the adsorbates formed during the platinum catalyzed (electro)oxidation of ethanol, 1,2-ethanediol and methyl- $\alpha$ -D-glucopyranoside at high pH (Gootzen, J.F.E. (127) 113)

### Alkene epoxidation

Hydrogen peroxide, water oxide and catalysis (Moiseev, I.I. (127) 1)

### AM1

The structural fitting and the interaction energy between the zeolite lattice models and organic molecules in the conversion of spiro-lactones to enones (Chatterjee, A. (127) 153)

### Aminocarboxylate

Selective air oxidation of dimethyl sulfide to dimethyl sulfoxide catalysed by aminopolycarboxylatoruthenium(III) complex (Chatterjee, D. (127) 57)

### Carbamates

Carbonylation of nitrobenzene catalysed by palladium and heteropolyanions; a mechanistic approach (Ragaini, F. (127) 33)

### Carbon dioxide

Copper-catalyzed synthesis of methylamines from  $\text{CO}_2$ ,  $\text{H}_2$  and  $\text{NH}_3$ . Influence of support (Gredig, S.V. (127) 133)  
Hydrogenation of  $\text{CO}_2$  on the cathodized tungsten trioxide/polyaniline/polyvinylsulfate-modified electrode in aqueous solution (Endo, N. (127) 49)

### Carbon monoxide

Temperature-programmed surface reaction (TPSR) of pre-adsorbed carbon CO and  $\text{CO}/\text{H}_2$  synthesis over Ru-Cs/ $\text{Al}_2\text{O}_3$  catalysts (Sakakini, B.H. (127) 203)

### Carbonylation

Carbonylation of nitrobenzene catalysed by palladium and heteropolyanions; a mechanistic approach (Ragaini, F. (127) 33)

### Catalysis

On the adsorbates formed during the platinum catalyzed (electro)oxidation of ethanol, 1,2-ethanediol and methyl- $\alpha$ -D-glucopyranoside at high pH (Gootzen, J.F.E. (127) 113)  
Selective air oxidation of dimethyl sulfide to dimethyl sulfoxide catalysed by aminopolycarboxylatoruthenium(III) complex (Chatterjee, D. (127) 57)

### Catalysis by molybdates

Kinetics of the oxidation of iodine by hydrogen peroxide catalyzed by  $\text{MoO}_4^{2-}$  ions (Melicherčík, M. (127) 43)

### Cerium-ammonium nitrate

Cerium (IV) ammonium nitrate as an efficient catalyst for oxidation of alkyl malonates into ketomalones by dioxygen (Tugaut, V. (127) 25)

### 4-chlorotoluene

Selective chlorination of 4-chlorotoluene using zeolite catalysts (Singh, A.P. (127) 101)

### 'Clock' behaviour

Kinetics of the oxidation of iodine by hydrogen peroxide catalyzed by  $\text{MoO}_4^{2-}$  ions (Melicherčík, M. (127) 43)

### Copper

Palladium and silver reductive catalyzed carbonylation of nitrobenzene to methyl *N*-phenylcarbamate (Santi, R. (127) 95)

### Copper catalysts

Copper-catalyzed synthesis of methylamines from  $\text{CO}_2$ ,  $\text{H}_2$  and  $\text{NH}_3$ . Influence of support (Gredig, S.V. (127) 133)

### Deactivation

On the adsorbates formed during the platinum catalyzed (electro)oxidation of ethanol, 1,2-ethanediol and methyl- $\alpha$ -D-glucopyranoside at high pH (Gootzen, J.F.E. (127) 113)

### 2,4-dichlorotoluene

Selective chlorination of 4-chlorotoluene using zeolite catalysts (Singh, A.P. (127) 101)

### Dimethylsulfide

Selective air oxidation of dimethyl sulfide to dimethyl sulfoxide catalysed by aminopolycarboxylatoruthenium(III) complex (Chatterjee, D. (127) 57)

### Dimethylsulfoxide

Selective air oxidation of dimethyl sulfide to dimethyl sulfoxide catalysed by aminopolycarboxylatoruthenium(III) complex (Chatterjee, D. (127) 57)

### Effective potential

Ab initio effective potential calculation on  $\gamma$ - $\text{Mo}_2\text{N}$ -thiophene systems (Rong, C. (127) 191)

### Electrocatalysis

On the adsorbates formed during the platinum catalyzed (electro)oxidation of ethanol, 1,2-ethanediol and methyl- $\alpha$ -D-glucopyranoside at high pH (Gootzen, J.F.E. (127) 113)

### Electrochemistry

On the adsorbates formed during the platinum catalyzed (electro)oxidation of ethanol, 1,2-ethanediol and methyl- $\alpha$ -D-glucopyranoside at high pH (Gootzen, J.F.E. (127) 113)

### Enone

The structural fitting and the interaction energy between the

- zeolite lattice models and organic molecules in the conversion of spirolactones to enones (Chatterjee, A. (127) 153)
- FTIR**  
Hydrogenation of CO<sub>2</sub> on the cathodized tungsten trioxide/polyaniline/polyvinylsulfate-modified electrode in aqueous solution (Endo, N. (127) 49)
- Heteropolyanions**  
Carbonylation of nitrobenzene catalysed by palladium and heteropolyanions; a mechanistic approach (Ragaini, F. (127) 33)
- Homogeneous catalysis**  
Carbonylation of nitrobenzene catalysed by palladium and heteropolyanions; a mechanistic approach (Ragaini, F. (127) 33)
- Homogeneous oxidation**  
Reactivity of transition-metal-modified, Keggin-type heteropolycomplexes in the homogeneous oxidation of cyclohexane and adamantane (Cramarossa, M.R. (127) 85)
- Hydrogenation**  
Hydrogenation of CO<sub>2</sub> on the cathodized tungsten trioxide/polyaniline/polyvinylsulfate-modified electrode in aqueous solution (Endo, N. (127) 49)
- Hydrogen peroxide**  
Hydrogen peroxide, water oxide and catalysis (Moiseev, I.I. (127) 1)
- Hydrotreating**  
Modelling of hydrotreating catalysis based on the remote control: HYD and HDS (Li, Y.W. (127) 163)
- Interaction energy**  
The structural fitting and the interaction energy between the zeolite lattice models and organic molecules in the conversion of spirolactones to enones (Chatterjee, A. (127) 153)
- Iodine oxidation by hydrogen peroxide**  
Kinetics of the oxidation of iodine by hydrogen peroxide catalyzed by MoO<sub>4</sub><sup>2-</sup> ions (Melicherčík, M. (127) 43)
- Keggin-type heteropolycompounds**  
Reactivity of transition-metal-modified, Keggin-type heteropolycomplexes in the homogeneous oxidation of cyclohexane and adamantane (Cramarossa, M.R. (127) 85)
- Ketomalonates**  
Cerium (IV) ammonium nitrate as an efficient catalyst for oxidation of alkyl malonates into ketomalonates by dioxygen (Tugaut, V. (127) 25)
- Kinetics**  
Modelling of hydrotreating catalysis based on the remote control: HYD and HDS (Li, Y.W. (127) 163)
- Malonate oxidation**  
Cerium (IV) ammonium nitrate as an efficient catalyst for oxidation of alkyl malonates into ketomalonates by dioxygen (Tugaut, V. (127) 25)
- Mercury**  
Palladium and silver reductive catalyzed carbonylation of nitrobenzene to methyl *N*-phenylcarbamate (Santi, R. (127) 95)
- Metal complex catalysis**  
Hydrogen peroxide, water oxide and catalysis (Moiseev, I.I. (127) 1)
- Methane**  
Temperature-programmed surface reaction (TPSR) of pre-adsorbed carbon CO and CO/H<sub>2</sub> synthesis over Ru-Cs/Al<sub>2</sub>O<sub>3</sub> catalysts (Sakakini, B.H. (127) 203)
- Methylamine synthesis**  
Copper-catalyzed synthesis of methylamines from CO<sub>2</sub>, H<sub>2</sub> and NH<sub>3</sub>. Influence of support (Gredig, S.V. (127) 133)
- Molybdenum**  
Ab initio effective potential calculation on  $\gamma$ -Mo<sub>2</sub>N-thiophene systems (Rong, C. (127) 191)
- n*-butane isomerization**  
Comparative study of *n*-butane transformation over Pt/sulfated zirconia and Pt/zeolites (Wu, H.-c. (127) 143)
- Nitride**  
Ab initio effective potential calculation on  $\gamma$ -Mo<sub>2</sub>N-thiophene systems (Rong, C. (127) 191)
- Nitroarenes**  
Carbonylation of nitrobenzene catalysed by palladium and heteropolyanions; a mechanistic approach (Ragaini, F. (127) 33)
- Nitrobenzene**  
Carbonylation of nitrobenzene catalysed by palladium and heteropolyanions; a mechanistic approach (Ragaini, F. (127) 33)  
Palladium and silver reductive catalyzed carbonylation of nitrobenzene to methyl *N*-phenylcarbamate (Santi, R. (127) 95)
- Organic hydroperoxides**  
Hydrogen peroxide, water oxide and catalysis (Moiseev, I.I. (127) 1)
- Oxidation**  
Selective air oxidation of dimethyl sulfide to dimethyl sulfoxide catalysed by aminopolycarboxylatoruthenium(III) complex (Chatterjee, D. (127) 57)
- Oxidation of molecules containing *n*-donor atoms**  
Hydrogen peroxide, water oxide and catalysis (Moiseev, I.I. (127) 1)
- Palladium**  
Carbonylation of nitrobenzene catalysed by palladium and heteropolyanions; a mechanistic approach (Ragaini, F. (127) 33)  
Palladium and silver reductive catalyzed carbonylation of nitrobenzene to methyl *N*-phenylcarbamate (Santi, R. (127) 95)
- Platinum**  
On the adsorbates formed during the platinum catalyzed (electro)oxidation of ethanol, 1,2-ethanediol and methyl- $\alpha$ -D-glucopyranoside at high pH (Gootzen, J.F.E. (127) 113)
- Polyaniline**  
Hydrogenation of CO<sub>2</sub> on the cathodized tungsten trioxide/polyaniline/polyvinylsulfate-modified electrode in aqueous solution (Endo, N. (127) 49)
- Polyvinylsulfate**  
Hydrogenation of CO<sub>2</sub> on the cathodized tungsten trioxide/polyaniline/polyvinylsulfate-modified electrode in aqueous solution (Endo, N. (127) 49)
- Pt/Hzeolites**  
Comparative study of *n*-butane transformation over Pt/sulfated zirconia and Pt/zeolites (Wu, H.-c. (127) 143)
- Pt/SO<sub>4</sub><sup>2-</sup>-ZrO<sub>2</sub>**  
Comparative study of *n*-butane transformation over Pt/sulfated zirconia and Pt/zeolites (Wu, H.-c. (127) 143)
- Reductive carbonylation**  
Palladium and silver reductive catalyzed carbonylation of nitrobenzene to methyl *N*-phenylcarbamate (Santi, R. (127) 95)

**Remote control**

Modelling of hydrotreating catalysis based on the remote control: HYD and HDS (Li, Y.W. (127) 163)

**Ruthenium-caesium/alumina**

Temperature-programmed surface reaction (TPSR) of pre-adsorbed carbon CO and CO/H<sub>2</sub> synthesis over Ru-Cs/Al<sub>2</sub>O<sub>3</sub> catalysts (Sakakini, B.H. (127) 203)

**Selective oxidation of adamantane**

Reactivity of transition-metal-modified, Keggin-type heteropolycomplexes in the homogeneous oxidation of cyclohexane and adamantane (Cramarossa, M.R. (127) 85)

**Selective oxidation of cyclohexane**

Reactivity of transition-metal-modified, Keggin-type heteropolycomplexes in the homogeneous oxidation of cyclohexane and adamantane (Cramarossa, M.R. (127) 85)

**Silver**

Palladium and silver reductive catalyzed carbonylation of nitrobenzene to methyl *N*-phenylcarbamate (Santi, R. (127) 95)

**Simulation**

Modelling of hydrotreating catalysis based on the remote control: HYD and HDS (Li, Y.W. (127) 163)

**Spirolactone**

The structural fitting and the interaction energy between the zeolite lattice models and organic molecules in the conversion of spirolactones to enones (Chatterjee, A. (127) 153)

**Structural fitting**

The structural fitting and the interaction energy between the zeolite lattice models and organic molecules in the conversion of spirolactones to enones (Chatterjee, A. (127) 153)

**Structure of active sites**

Modelling of hydrotreating catalysis based on the remote control: HYD and HDS (Li, Y.W. (127) 163)

**Support**

Copper-catalyzed synthesis of methylamines from CO<sub>2</sub>, H<sub>2</sub> and NH<sub>3</sub>. Influence of support (Gredig, S.V. (127) 133)

**Surface dynamics**

Modelling of hydrotreating catalysis based on the remote control: HYD and HDS (Li, Y.W. (127) 163)

**Thiophene**

Ab initio effective potential calculation on  $\gamma$ -Mo<sub>2</sub>N-thiophene systems (Rong, C. (127) 191)

**Tungsten trioxide**

Hydrogenation of CO<sub>2</sub> on the cathodized tungsten trioxide/polyaniline/polyvinylsulfate-modified electrode in aqueous solution (Endo, N. (127) 49)

**Water oxide**

Hydrogen peroxide, water oxide and catalysis (Moiseev, I.I. (127) 1)

**Zeolite H-Y**

The structural fitting and the interaction energy between the zeolite lattice models and organic molecules in the conversion of spirolactones to enones (Chatterjee, A. (127) 153)

**Zeolite K-L**

Selective chlorination of 4-chlorotoluene using zeolite catalysts (Singh, A.P. (127) 101)
