

## Subject index

### Acetic anhydride

Rhenium-catalyzed oxidation of arenes—an improved synthesis of vitamin K<sub>3</sub> (Herrmann, W.A. (138) 115)

### Acidity

Control of acidity and selectivity of titania–silica aerogel for the epoxidation of  $\beta$ -isophorone (Hutter, R. (138) 241)

### Acrolein

Double-bond activation in unsaturated aldehydes: conversion of acrolein to propene and ketene on Pt(111) surfaces (De Jesús, J.C. (138) 237)

### Alcohol

Kinetic study of organotin-catalyzed alcohol–isocyanate reactions. Part 1: Inhibition by carboxylic acids in toluene (Draye, A.-C. (138) 135)

### Alkyl arenes

Silicate xerogels containing cobalt as heterogeneous catalysts for the side-chain oxidation of alkyl aromatic compounds with *tert*-butyl hydroperoxide (Rogovin, M. (138) 315)

### Allylic alcohols

Chemo- and diastereoselective epoxidation of allylic alcohols with a titania–silica aerogel (Dusi, M. (138) 15)

### Alpha-olefins

Zirconium complexes as catalysts for the oligomerisation of ethylene: the role of chelate ligands and the Lewis acid cocatalyst in the generation of the active species (Jones, D. (138) 37)

### Alumina

Non-expanding mica incorporating alumina in the interlayer regions: a new preparation technique of fine particles of alumina (Hashimoto, K. (138) 59)

### $\gamma$ -Alumina

Cluster model study on the surface interactions of  $\gamma$ -alumina-supported metal oxides (Xia, W.S. (138) 185)

### $\beta$ -Aminoketones

Zirconium complexes as catalysts for the oligomerisation of ethylene: the role of chelate ligands and the Lewis acid cocatalyst in the generation of the active species (Jones, D. (138) 37)

### Arene oxidation

Rhenium-catalyzed oxidation of arenes—an improved synthesis of vitamin K<sub>3</sub> (Herrmann, W.A. (138) 115)

### Aromatic acids

Gas phase reaction of hydrogen with carboxyl and carbonyl functions in aromatic systems over Ni/SiO<sub>2</sub> (Keane, M.A. (138) 197)

### Benzyl chloride

Efficient methoxycarbonylation of benzyl chloride without

external carbon monoxide: a further application of methyl formate in synthesis using PdCl<sub>2</sub>(PPh<sub>3</sub>)<sub>2</sub> as catalyst (Pellegriani, S. (138) 103)

### Biphasic catalysis

A convenient synthesis of phenylpropanoic acids: the palladium catalyzed hydrocarboxylation of styrene derivatives in a two-phase system (Bertoux, F. (138) 53)

### Carbonaceous surface species

Deposition of tungsten hexacarbonyl on alumina: a diffuse reflectance infrared Fourier transform spectroscopy study (Suvanto, M. (138) 211)

### 2-Carboxybenzaldehyde

Gas phase reaction of hydrogen with carboxyl and carbonyl functions in aromatic systems over Ni/SiO<sub>2</sub> (Keane, M.A. (138) 197)

### Catalysis

Kinetic study of organotin-catalyzed alcohol–isocyanate reactions. Part 1: Inhibition by carboxylic acids in toluene (Draye, A.-C. (138) 135)

### Catalyst

Zirconium complexes as catalysts for the oligomerisation of ethylene: the role of chelate ligands and the Lewis acid cocatalyst in the generation of the active species (Jones, D. (138) 37)

### Catalytic oxidation

Silicate xerogels containing cobalt as heterogeneous catalysts for the side-chain oxidation of alkyl aromatic compounds with *tert*-butyl hydroperoxide (Rogovin, M. (138) 315)

### Chiral auxiliary

New chiral auxiliaries in enantioselective heterogeneous catalytic hydrogenations: (–) and (+)-dihydro-apovincaminic acid. Comparison with (–)-dihydro-apovincaminic acid ethyl ester. III (Farkas, G. (138) 123)

### Chlorination of benzyl chloride

A catalytic method for the selective chlorination of benzyl chloride to 4-chlorobenzyl chloride using zeolite catalysts (Kale, S.M. (138) 263)

### *o*-Chloroaniline

Selective hydrogenation of *o*-chloronitrobenzene over polymer-stabilized ruthenium colloidal catalysts (Liu, M. (138) 295)

### 4-Chlorobenzyl chloride

A catalytic method for the selective chlorination of benzyl chloride to 4-chlorobenzyl chloride using zeolite catalysts (Kale, S.M. (138) 263)

- o*-Chloronitrobenzene  
Selective hydrogenation of *o*-chloronitrobenzene over polymer-stabilized ruthenium colloidal catalysts (Liu, M. (138) 295)
- Chromocene catalyst  
Isomerisation on the CrCp<sub>2</sub>/SiO<sub>2</sub> catalyst during polymerisation of ethylene: pressure dependence (Blom, R. (138) 97)
- Cinnamaldehyde  
Selective hydrogenation of  $\alpha,\beta$ -unsaturated aldehyde to  $\alpha,\beta$ -unsaturated alcohol over polymer-stabilized platinum colloid and the promotion effect of metal cations (Yu, W. (138) 273)
- Cluster model  
Cluster model study on the surface interactions of  $\gamma$ -alumina-supported metal oxides (Xia, W.S. (138) 185)
- CO hydrogenation  
Selective formation of methanol over nickel carbonyl with potassium methoxide (Ohyama, S. (138) 305)
- Copper  
Catalytic reduction of nitric oxide over copper. Part III: Influence of water vapour (Lu, H. (138) 227)
- Crotonaldehyde  
Selective hydrogenation of  $\alpha,\beta$ -unsaturated aldehyde to  $\alpha,\beta$ -unsaturated alcohol over polymer-stabilized platinum colloid and the promotion effect of metal cations (Yu, W. (138) 273)
- Cytochrome P-450 model reaction  
Dioxygen-activated reductive epoxidation of cyclohexene using Mn(III) porphyrin as catalyst and hexylviologen as electron mediator (Tsuda, Y. (138) 145)
- Degradation  
Photocatalyzed degradation of lignin on TiO<sub>2</sub> (Tanaka, K. (138) 287)
- Dehydration of alcohol  
Non-expanding mica incorporating alumina in the interlayer regions: a new preparation technique of fine particles of alumina (Hashimoto, K. (138) 59)
- Dichlorobis(triphenylphosphine)palladium  
Efficient methoxycarbonylation of benzyl chloride without external carbon monoxide: a further application of methyl formate in synthesis using PdCl<sub>2</sub>(PPh<sub>3</sub>)<sub>2</sub> as catalyst (Pellegrini, S. (138) 103)
- Dihydro-apovincaminic acid  
New chiral auxiliaries in enantioselective heterogeneous catalytic hydrogenations: (–) and (+)-dihydro-apovincaminic acid. Comparison with (–)-dihydro-apovincaminic acid ethyl ester. III (Farkas, G. (138) 123)
- Diphenyl carbonate  
Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–Sn complexes with redox catalyst (Ishii, H. (138) 311)
- Dispersion  
Cluster model study on the surface interactions of  $\gamma$ -alumina-supported metal oxides (Xia, W.S. (138) 185)
- DPC  
Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–Sn complexes with redox catalyst (Ishii, H. (138) 311)
- Effects of halide ions  
Regioselective synthesis of ibuprofen via the palladium complex catalyzed hydrocarboxylation of 1-(4-isobutylphenyl) ethanol (Jang, E.J. (138) 25)
- Electronic effects  
Gas phase reaction of hydrogen with carboxyl and carbonyl functions in aromatic systems over Ni/SiO<sub>2</sub> (Keane, M.A. (138) 197)
- Electron mediator  
Dioxygen-activated reductive epoxidation of cyclohexene using Mn(III) porphyrin as catalyst and hexylviologen as electron mediator (Tsuda, Y. (138) 145)
- Enantioselectivity  
New chiral auxiliaries in enantioselective heterogeneous catalytic hydrogenations: (–) and (+)-dihydro-apovincaminic acid. Comparison with (–)-dihydro-apovincaminic acid ethyl ester. III (Farkas, G. (138) 123)
- Epoxidation  
Chemo- and diastereoselective epoxidation of allylic alcohols with a titania–silica aerogel (Dusi, M. (138) 15)  
Dioxygen-activated reductive epoxidation of cyclohexene using Mn(III) porphyrin as catalyst and hexylviologen as electron mediator (Tsuda, Y. (138) 145)  
Oxygen transfer mechanism in the Mn–salen catalysed epoxidation of olefins (Méou, A. (138) 221)  
Control of acidity and selectivity of titania–silica aerogel for the epoxidation of  $\beta$ -isophorone (Hutter, R. (138) 241)
- Esterification  
Gas phase reaction of hydrogen with carboxyl and carbonyl functions in aromatic systems over Ni/SiO<sub>2</sub> (Keane, M.A. (138) 197)
- Ethene  
Hydroformylation of ethene with triphenylphosphine modified rhodium catalyst: kinetic and mechanistic studies (Kiss, G. (138) 155)
- Ethylene  
Zirconium complexes as catalysts for the oligomerisation of ethylene: the role of chelate ligands and the Lewis acid cocatalyst in the generation of the active species (Jones, D. (138) 37)
- Ethyl pyruvate  
New chiral auxiliaries in enantioselective heterogeneous catalytic hydrogenations: (–) and (+)-dihydro-apovincaminic acid. Comparison with (–)-dihydro-apovincaminic acid ethyl ester. III (Farkas, G. (138) 123)
- Fe  
A study on reduction behaviors of the supported platinum–iron catalysts (Jia, J. (138) 177)
- Fine particle  
Non-expanding mica incorporating alumina in the interlayer regions: a new preparation technique of fine particles of alumina (Hashimoto, K. (138) 59)
- FTIR  
FTIR study of the interaction of NO<sub>2</sub> and propene with Pt/BaCl<sub>2</sub>/SiO<sub>2</sub> (Coronado, J.M. (138) 83)
- Gas phase adsorption  
Deposition of tungsten hexacarbonyl on alumina: a diffuse reflectance infrared Fourier transform spectroscopy study (Suvanto, M. (138) 211)

**Heteropolyacids**

Gas phase synthesis of MTBE on dodecatungstosilicic acid as the catalyst (Malecka, A. (138) 67)

**Homogeneous hydrogenation**

Homogeneous hydrogenation of maleic anhydride to succinic anhydride catalyzed by Rh complex catalyst (Pu, L. (138) 129)

**Hydrocarboxylation**

Regioselective synthesis of ibuprofen via the palladium complex catalyzed hydrocarboxylation of 1-(4-isobutylphenyl) ethanol (Jang, E.J. (138) 25)

A convenient synthesis of phenylpropanoic acids: the palladium catalyzed hydrocarboxylation of styrene derivatives in a two-phase system (Bertoux, F. (138) 53)

**Hydroformylation**

Hydroformylation of ethene with triphenylphosphine modified rhodium catalyst: kinetic and mechanistic studies (Kiss, G. (138) 155)

**Hydrogenase**

Photoinduced hydrogen evolution with viologen-linked ruthenium(II) complexes and hydrogenase (Hiraishi, T. (138) 107)

**Hydrogenation**

New chiral auxiliaries in enantioselective heterogeneous catalytic hydrogenations: (–) and (+)-dihydro-apovincaminic acid. Comparison with (–)-dihydro-apovincaminic acid ethyl ester. III (Farkas, G. (138) 123)

Selective hydrogenation of *o*-chloronitrobenzene over polymer-stabilized ruthenium colloidal catalysts (Liu, M. (138) 295)

**Hydrogenolysis**

Gas phase reaction of hydrogen with carboxyl and carbonyl functions in aromatic systems over Ni/SiO<sub>2</sub> (Keane, M.A. (138) 197)

**Hydrogen peroxide**

Rhenium-catalyzed oxidation of arenes—an improved synthesis of vitamin K<sub>3</sub> (Herrmann, W.A. (138) 115)

**Hydrophilicity**

Control of acidity and selectivity of titania–silica aerogel for the epoxidation of β-isophorone (Hutter, R. (138) 241)

**In situ Mössbauer spectroscopy**

A study on reduction behaviors of the supported platinum–iron catalysts (Jia, J. (138) 177)

**Intramolecular electron transfer**

Photoinduced hydrogen evolution with viologen-linked ruthenium(II) complexes and hydrogenase (Hiraishi, T. (138) 107)

**IR spectroscopy**

Deposition of tungsten hexacarbonyl on alumina: a diffuse reflectance infrared Fourier transform spectroscopy study (Suvanto, M. (138) 211)

**Isobutene**

Catalytic reduction of nitric oxide over copper. Part III: Influence of water vapour (Lu, H. (138) 227)

**Isocyanate**

Kinetic study of organotin-catalyzed alcohol–isocyanate reactions. Part I: Inhibition by carboxylic acids in toluene (Draye, A.-C. (138) 135)

**Isomerisation**

Isomerisation on the CrCp<sub>2</sub>/SiO<sub>2</sub> catalyst during polymerisation of ethylene: pressure dependence (Blom, R. (138) 97)

**Isophorone**

New chiral auxiliaries in enantioselective heterogeneous catalytic hydrogenations: (–) and (+)-dihydro-apovincaminic acid. Comparison with (–)-dihydro-apovincaminic acid ethyl ester. III (Farkas, G. (138) 123)

**β-Isophorone**

Control of acidity and selectivity of titania–silica aerogel for the epoxidation of β-isophorone (Hutter, R. (138) 241)

**Kinetics**

Isomerisation on the CrCp<sub>2</sub>/SiO<sub>2</sub> catalyst during polymerisation of ethylene: pressure dependence (Blom, R. (138) 97)

Kinetic study of organotin-catalyzed alcohol–isocyanate reactions. Part I: Inhibition by carboxylic acids in toluene (Draye, A.-C. (138) 135)

Hydroformylation of ethene with triphenylphosphine modified rhodium catalyst: kinetic and mechanistic studies (Kiss, G. (138) 155)

**Lignin**

Photocatalyzed degradation of lignin on TiO<sub>2</sub> (Tanaka, K. (138) 287)

**Liquid-phase reaction**

Selective formation of methanol over nickel carbonyl with potassium methoxide (Ohyama, S. (138) 305)

**Maleic anhydride**

Homogeneous hydrogenation of maleic anhydride to succinic anhydride catalyzed by Rh complex catalyst (Pu, L. (138) 129)

**Manganese porphyrin**

Dioxygen-activated reductive epoxidation of cyclohexene using Mn(III) porphyrin as catalyst and hexylviologen as electron mediator (Tsuda, Y. (138) 145)

**Mechanism**

Hydroformylation of ethene with triphenylphosphine modified rhodium catalyst: kinetic and mechanistic studies (Kiss, G. (138) 155)

**Metal cation**

Selective hydrogenation of α,β-unsaturated aldehyde to α,β-unsaturated alcohol over polymer-stabilized platinum colloid and the promotion effect of metal cations (Yu, W. (138) 273)

**Metallosilicates**

Silicate xerogels containing cobalt as heterogeneous catalysts for the side-chain oxidation of alkyl aromatic compounds with *tert*-butyl hydroperoxide (Rogovin, M. (138) 315)

**Metal oxide**

Cluster model study on the surface interactions of γ-alumina-supported metal oxides (Xia, W.S. (138) 185)

**Methanol synthesis**

Selective formation of methanol over nickel carbonyl with potassium methoxide (Ohyama, S. (138) 305)

**Methoxycarbonylation**

Efficient methoxycarbonylation of benzyl chloride without external carbon monoxide: a further application of methyl formate in synthesis using PdCl<sub>2</sub>(PPh<sub>3</sub>)<sub>2</sub> as catalyst (Pellegri, S. (138) 103)

**Methyl formate**

Efficient methoxycarbonylation of benzyl chloride without external carbon monoxide: a further application of methyl formate in synthesis using PdCl<sub>2</sub>(PPh<sub>3</sub>)<sub>2</sub> as catalyst (Pellegri, S. (138) 103)

- Methyl-*tert*-butyl ether  
Gas phase synthesis of MTBE on dodecatungstosilicic acid as the catalyst (Malecka, A. (138) 67)
- Methyltrioxorhenium  
Rhenium-catalyzed oxidation of arenes—an improved synthesis of vitamin K<sub>3</sub> (Herrmann, W.A. (138) 115)
- Mica  
Non-expanding mica incorporating alumina in the interlayer regions: a new preparation technique of fine particles of alumina (Hashimoto, K. (138) 59)
- Mn-salen complexes  
Oxygen transfer mechanism in the Mn-salen catalysed epoxidation of olefins (Méou, A. (138) 221)
- MTBE  
Gas phase synthesis of MTBE on dodecatungstosilicic acid as the catalyst (Malecka, A. (138) 67)
- Nickel carbonyl  
Selective formation of methanol over nickel carbonyl with potassium methoxide (Ohyama, S. (138) 305)
- Ni/SiO<sub>2</sub>  
Gas phase reaction of hydrogen with carboxyl and carbonyl functions in aromatic systems over Ni/SiO<sub>2</sub> (Keane, M.A. (138) 197)
- NO<sub>2</sub>  
FTIR study of the interaction of NO<sub>2</sub> and propene with Pt/BaCl<sub>2</sub>/SiO<sub>2</sub> (Coronado, J.M. (138) 83)
- NO reduction  
Catalytic reduction of nitric oxide over copper. Part III: Influence of water vapour (Lu, H. (138) 227)
- Oligomerisation  
Zirconium complexes as catalysts for the oligomerisation of ethylene: the role of chelate ligands and the Lewis acid cocatalyst in the generation of the active species (Jones, D. (138) 37)
- Organotin  
Kinetic study of organotin-catalyzed alcohol–isocyanate reactions. Part 1: Inhibition by carboxylic acids in toluene (Draye, A.-C. (138) 135)
- Oxametallacycles  
Oxygen transfer mechanism in the Mn-salen catalysed epoxidation of olefins (Méou, A. (138) 221)
- Oxidative carbonylation  
Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–Sn complexes with redox catalyst (Ishii, H. (138) 311)
- Oxo reaction  
Hydroformylation of ethene with triphenylphosphine modified rhodium catalyst: kinetic and mechanistic studies (Kiss, G. (138) 155)
- Palladium  
A convenient synthesis of phenylpropanoic acids: the palladium catalyzed hydrocarboxylation of styrene derivatives in a two-phase system (Bertoux, F. (138) 53)  
Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–Sn complexes with redox catalyst (Ishii, H. (138) 311)
- Palladium complex  
Regioselective synthesis of ibuprofen via the palladium complex catalyzed hydrocarboxylation of 1-(4-isobutylphenyl) ethanol (Jang, E.J. (138) 25)
- Peroxide  
Silicate xerogels containing cobalt as heterogeneous catalysts for the side-chain oxidation of alkyl aromatic compounds with *tert*-butyl hydroperoxide (Rogovin, M. (138) 315)
- Phosphine modified rhodium catalyst  
Hydroformylation of ethene with triphenylphosphine modified rhodium catalyst: kinetic and mechanistic studies (Kiss, G. (138) 155)
- Photocatalyst  
Photocatalyzed degradation of lignin on TiO<sub>2</sub> (Tanaka, K. (138) 287)
- Photocatalytic autoxidation  
The photocatalytic autoxidation of sulfur oxoanions by water-soluble porphyrin complexes (Chen, S.-M. (138) 1)
- Photoinduced hydrogen evolution  
Photoinduced hydrogen evolution with viologen-linked ruthenium(II) complexes and hydrogenase (Hiraishi, T. (138) 107)
- Platinum surfaces  
Double-bond activation in unsaturated aldehydes: conversion of acrolein to propene and ketene on Pt(111) surfaces (De Jesús, J.C. (138) 237)
- Polyethylene  
Isomerisation on the CrCp<sub>2</sub>/SiO<sub>2</sub> catalyst during polymerisation of ethylene: pressure dependence (Blom, R. (138) 97)
- Porphyrin complexes  
The photocatalytic autoxidation of sulfur oxoanions by water-soluble porphyrin complexes (Chen, S.-M. (138) 1)
- Potassium methoxide  
Selective formation of methanol over nickel carbonyl with potassium methoxide (Ohyama, S. (138) 305)
- Propene  
FTIR study of the interaction of NO<sub>2</sub> and propene with Pt/BaCl<sub>2</sub>/SiO<sub>2</sub> (Coronado, J.M. (138) 83)
- Pt  
A study on reduction behaviors of the supported platinum–iron catalysts (Jia, J. (138) 177)
- Pt/BaCl<sub>2</sub>/SiO<sub>2</sub>  
FTIR study of the interaction of NO<sub>2</sub> and propene with Pt/BaCl<sub>2</sub>/SiO<sub>2</sub> (Coronado, J.M. (138) 83)
- Pt colloid  
Selective hydrogenation of  $\alpha,\beta$ -unsaturated aldehyde to  $\alpha,\beta$ -unsaturated alcohol over polymer-stabilized platinum colloid and the promotion effect of metal cations (Yu, W. (138) 273)
- Raman spectroscopy  
Influence of calcination treatment on the structure of grafted WO<sub>x</sub> species on titania (Scholz, A. (138) 249)
- Redox catalyst  
Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–Sn complexes with redox catalyst (Ishii, H. (138) 311)
- Reflection–absorption infrared  
Double-bond activation in unsaturated aldehydes: conversion of acrolein to propene and ketene on Pt(111) surfaces (De Jesús, J.C. (138) 237)

- Regioselectivity**  
Regioselective synthesis of ibuprofen via the palladium complex catalyzed hydrocarboxylation of 1-(4-isobutylphenyl) ethanol (Jang, E.J. (138) 25)
- Rh complex**  
Homogeneous hydrogenation of maleic anhydride to succinic anhydride catalyzed by Rh complex catalyst (Pu, L. (138) 129)
- Ruthenium colloid**  
Selective hydrogenation of *o*-chloronitrobenzene over polymer-stabilized ruthenium colloidal catalysts (Liu, M. (138) 295)
- Selective hydrogenation**  
Selective hydrogenation of  $\alpha,\beta$ -unsaturated aldehyde to  $\alpha,\beta$ -unsaturated alcohol over polymer-stabilized platinum colloid and the promotion effect of metal cations (Yu, W. (138) 273)
- Side-chain oxidation**  
Silicate xerogels containing cobalt as heterogeneous catalysts for the side-chain oxidation of alkyl aromatic compounds with *tert*-butyl hydroperoxide (Rogovin, M. (138) 315)
- Sol-gel aerogel**  
Control of acidity and selectivity of titania-silica aerogel for the epoxidation of  $\beta$ -isophorone (Hutter, R. (138) 241)
- Styrene derivatives**  
A convenient synthesis of phenylpropanoic acids: the palladium catalyzed hydrocarboxylation of styrene derivatives in a two-phase system (Bertoux, F. (138) 53)
- Succinic anhydride**  
Homogeneous hydrogenation of maleic anhydride to succinic anhydride catalyzed by Rh complex catalyst (Pu, L. (138) 129)
- Sulfur oxoanions**  
The photocatalytic autoxidation of sulfur oxoanions by water-soluble porphyrin complexes (Chen, S.-M. (138) 1)
- Support**  
Cluster model study on the surface interactions of  $\gamma$ -alumina-supported metal oxides (Xia, W.S. (138) 185)
- Surface characterisation**  
Catalytic reduction of nitric oxide over copper. Part III: Influence of water vapour (Lu, H. (138) 227)
- Synthesis of ibuprofen**  
Regioselective synthesis of ibuprofen via the palladium complex catalyzed hydrocarboxylation of 1-(4-isobutylphenyl) ethanol (Jang, E.J. (138) 25)
- Temperature-programmed desorption**  
Double-bond activation in unsaturated aldehydes: conversion of acrolein to propene and ketene on Pt(111) surfaces (De Jesús, J.C. (138) 237)
- Tin**  
Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd-Sn complexes with redox catalyst (Ishii, H. (138) 311)
- Titania-silica**  
Control of acidity and selectivity of titania-silica aerogel for the epoxidation of  $\beta$ -isophorone (Hutter, R. (138) 241)
- Titania-silica aerogel**  
Chemo- and diastereoselective epoxidation of allylic alcohols with a titania-silica aerogel (Dusi, M. (138) 15)
- TPR**  
A study on reduction behaviors of the supported platinum-iron catalysts (Jia, J. (138) 177)
- Unsaturated aldehydes**  
Double-bond activation in unsaturated aldehydes: conversion of acrolein to propene and ketene on Pt(111) surfaces (De Jesús, J.C. (138) 237)
- Urethane**  
Kinetic study of organotin-catalyzed alcohol-isocyanate reactions. Part I: Inhibition by carboxylic acids in toluene (Draye, A.-C. (138) 135)
- Viologen-linked ruthenium(II) complexes**  
Photoinduced hydrogen evolution with viologen-linked ruthenium(II) complexes and hydrogenase (Hiraishi, T. (138) 107)
- Vitamin K<sub>3</sub>**  
Rhenium-catalyzed oxidation of arenes—an improved synthesis of vitamin K<sub>3</sub> (Herrmann, W.A. (138) 115)
- Water-soluble phosphine**  
A convenient synthesis of phenylpropanoic acids: the palladium catalyzed hydrocarboxylation of styrene derivatives in a two-phase system (Bertoux, F. (138) 53)
- Water vapour**  
Catalytic reduction of nitric oxide over copper. Part III: Influence of water vapour (Lu, H. (138) 227)
- WO<sub>x</sub> species**  
Influence of calcination treatment on the structure of grafted WO<sub>x</sub> species on titania (Scholz, A. (138) 249)
- XPS**  
Influence of calcination treatment on the structure of grafted WO<sub>x</sub> species on titania (Scholz, A. (138) 249)
- Zeolite catalysts**  
A catalytic method for the selective chlorination of benzyl chloride to 4-chlorobenzyl chloride using zeolite catalysts (Kale, S.M. (138) 263)
- Zirconium**  
Zirconium complexes as catalysts for the oligomerisation of ethylene: the role of chelate ligands and the Lewis acid cocatalyst in the generation of the active species (Jones, D. (138) 37)
