- Bhanage, B.M., see Zhao, F. (142) 383
- Brookhart, M., see Çetinkaya, B. (142) 101
- Brunet, S., Batiot, C., Moriceau, P. and Thybaud, N.
Reactivity of antimony mixed halides for the fluorination of tetrachlorethene (PCE) in liquid phase (142) 183
- Brunner, H. and Krumeý, C.
Enantioselective catalysis. Part 124. Enantioselective Michael reaction catalyzed by optically active transition metal complexes (142) 7
- Buendia, J., see Gertosio, V. (142) 141
- Bugarčić, Z., see Petrović, Z. (142) 393
- Busolo, M., see Alvarado, Y. (142) 163
- Callegari, R., see Veronese, A.C. (142) 373
- Cataldo, M., Nieddu, E., Gavagnin, R., Pinna, F. and Strukul, G.
Hydroxy complexes of palladium(II) and platinum(II) as catalysts for the acetalization of aldehydes and ketones (142) 305
- Çetinkaya, B., Çetinkaya, E., Brookhart, M. and White, P.S.
Ruthenium(II) complexes with 2,6-pyridyl-diimine ligands: synthesis, characterization and catalytic activity in epoxidation reactions (142) 101
- Çetinkaya, E., see Çetinkaya, B. (142) 101
- Chan, A.S.C., see Liu, J. (142) 301
- Chen, H., see Jiang, H. (142) 147
- Choudary, B.M., Chowdari, N.S. and Kantam, M.L.
Enantioselective Michael addition reactions catalyzed by a new heterobimetallic asymmetric complex (142) 389
- Choudary, B.M., Kantam, M.L., Sreekanth, P., Bandopadhyay, T., Figueras, F. and Tuel, A.
Knoevenagel and aldol condensations catalysed by a new diamino-functionalised mesoporous material (142) 361
- Chowdari, N.S., see Choudary, B.M. (142) 389
- Costas, M. and Llobet, A.
Copper(I)-induced activation of dioxygen for the oxidation of organic substrates under mild conditions. An evaluation of ligand effects (142) 113
- Cruz Costa, M.C., Hodson, L.F., Johnstone, R.A.W., Liu, J.-Y. and Whittaker, D.
The mechanism of gas-phase dehydration of cyclohexanol and the methylcyclohexanols catalysed by zirconium phosphate and zirconium phosphite (142) 349
- Cubeiro, M.L., see Damyanova, S. (142) 85
- Dalal, M.K., Upadhyay, M.J. and Ram, R.N.
Oxidation of benzyl alcohol polymer anchored Ru(III) complex as catalyst (142) 325
- Damyanova, S., Cubeiro, M.L. and Fierro, J.L.G.
Acid-redox properties of titania-supported 12-molybdophosphates for methanol oxidation (142) 85
- Danilova, I.G., see Panchenko, V.N. (142) 27
- Deng, Y. and Nevell, T.G.
Oscillations of methane combustion over alumina-supported palladium catalysts under oxygen-deficient conditions (142) 51
- Djakovitch, L. and Koehler, K.
Heterogeneously catalysed Heck reaction using palladium modified zeolites (142) 275
- Espenson, J.H., see Tan, H. (142) 333
- Fierro, J.L.G., see Damyanova, S. (142) 85
- Figueras, F., see Choudary, B.M. (142) 361
- Fujiwara, M., Xu, Q., Souma, Y. and Kobayashi, T.
Oxidation of alkanes by TBHP in the presence of soluble titanium complexes (142) 77
- Gavagnin, R., see Cataldo, M. (142) 305
- Gertosio, V., Santini, C.C., Basset, J.M., Bayard, F., Buendia, J. and Vivat, M.
Heterogeneous chemo-, regio- and diastereoselective hydrogenation of steroidal alpha-diketone (142) 141
- Giannetto, G., see Lavaud, N. (142) 223
- Gogina, L., see Stuchinskaya, T. (142) 397
