- Ali, A.H., see Zaera, F. (146) 13
- Amarilli, S., see De Angelis, A. (146) 37
- Arduino, D., see Bordiga, S. (146) 97
- Asakura, K., see Yamaguchi, A. (146) 65
- Avnir, D., see Blum, J. (146) 117
- Avnir, D., see Gelman, F. (146) 123
- Bagatin, R., see Mantegazza, M.A. (146) 223
- Bashilov, V., see Sulman, E. (146) 257
- Basset, J.-M., see Lefebvre, F. (146) 3
- Basset, J.M., see Tena, E. (146) 53
- Bernasek, S.L., see Schwartz, J. (146) 45
- Berti, D., see De Angelis, A. (146) 37
- Blum, J., Rosenfeld, A., Gelman, F., Schumann, H. and Avnir, D.
Hydrogenation and dehalogenation of aryl chlorides and fluorides by the sol–gel entrapped RhCl_3 –Aliquat 336 ion pair catalyst (146) 117
- Blum, J., see Gelman, F. (146) 123
- Bochmann, M., Pindado, G.J. and Lancaster, S.J.
The versatile chemistry of metallocene polymerisation catalysts: new developments in half-sandwich complexes and catalyst heterogenisation (146) 179
- Bönnemann, H., see Coman, S. (146) 247
- Bordiga, S., Turnes Palomino, G., Arduino, D., Lambertini, C., Zecchina, A. and Otero Areán, C.
Well defined carbonyl complexes in Ag^+ - and Cu^+ -exchanged ZSM-5 zeolite: a comparison with homogeneous counterparts (146) 97
- Bowker, M., see Dickinson, A. (146) 211
- Bradley, J.S., see Vollmer, O. (146) 87
- Bronstein, L., see Sulman, E. (146) 265
- Buijs, W.
The mechanism of phenol formation in the Dow Phenol Process (146) 237
- Candy, J.P., see Tena, E. (146) 53
- Cassidy, T., see Dickinson, A. (146) 211
- Chernyshov, D., see Sulman, E. (146) 265
- Choudary, B.M., Lakshmi Kantam, M., Venkat Reddy, C.R., Koteswara Rao, K. and Figueras, F.
The first example of Michael addition catalysed by modified Mg–Al hydrotalcite (146) 279
- Cohen, M. and Neumann, R.
Silica tethered with poly(ethylene and/propylene) oxide as supports for polyoxometalates in catalytic oxidation (146) 291
- Collier, P.J., Iggo, J.A. and Whyman, R.
Preparation and characterisation of solvent-stabilised nanoparticulate platinum and palladium and their catalytic behaviour towards the enantioselective hydrogenation of ethyl pyruvate (146) 149
- Coman, S., Părvulescu, V.I., Tesche, B., Bönnemann, H., Roux, J.F., Kaliaguine, S. and Jacobs, P.A.
Stereocontrolled hydrogenation of prostaglandin intermediates over Ru–MCM-41 catalysts (146) 247
- Cornil, M.F., see Tena, E. (146) 53
- Custodio, R., see De Oliveira Filho, A.P. (146) 191
- De Angelis, A., Amarilli, S., Berti, D., Montanari, L. and Perego, C.
Alkylation of benzene catalysed by supported heteropolyacids (146) 37
- Demidenko, G., see Sulman, E. (146) 265
- De Oliveira Filho, A.P., Schuchardt, U. and Custodio, R.
Hartree–Fock and density functional theory analysis of propylene insertion in $\text{Al}(\text{CH}_3)_3/\text{TiCl}_3/\text{TiO}_2$ (red.) in the presence of a Lewis base (146) 191
- Dickinson, A., James, D., Perkins, N., Cassidy, T. and Bowker, M.
The photocatalytic reforming of methanol (146) 211
- Emig, G., see Ruf, S. (146) 271
- Ewing, D.F., see Wells, P.B. (146) 159
- Feiken, J., see Verspui, G. (146) 299
- Fenwick, D., see Petrucci, M.G.L. (146) 309
- Figueras, F., see Choudary, B.M. (146) 279
- Gamble, M., see Wills, M. (146) 139
- Gelman, F., Avnir, D., Schumann, H. and Blum, J.
Sol–gel entrapped chiral rhodium and ruthenium complexes as recyclable catalysts for the hydrogenation of itaconic acid (146) 123
- Gelman, F., see Blum, J. (146) 117
- Gleason, N.R., see Zaera, F. (146) 13
- Göbölös, S., Tfirst, E., Margitfalvi, J.L. and Hayes, K.S.
Asymmetric synthesis of (*S*)-alkylamines via reductive transamination of ketones over carbon-supported palladium catalysts (146) 129
- Golubeva, E.N., Kokorin, A.I., Zubareva, N.A., Vorontsov, P.S. and Smirnov, V.V.

- Copper (II) chloride–dmf catalytic system in solution and on silica (146) 343
- Griffiths, S.P., see Wells, P.B. (146) 159
- Hayes, K.S., see Göbölös, S. (146) 129
- Hladiy, S.L., see Starchevsky, M.K. (146) 229
- Holzhey, N. and Pitter, S.
Selective co-oligomerization of 1,3-butadiene and carbon dioxide with immobilized catalysts (146) 25
- Iggo, J.A., see Collier, P.J. (146) 149
- Iwasawa, Y., see Yamaguchi, A. (146) 65
- Jacobs, P.A., see Coman, S. (146) 247
- James, D., see Dickinson, A. (146) 211
- Jastrzebski, J.T.B.H., see Van Koten, G. (146) 317
- Jousseume, B., see Tena, E. (146) 53
- Kakkar, A.K., see Petrucci, M.G.L. (146) 309
- Kaliaguine, S., see Coman, S. (146) 247
- Keegan, J.P., see Schwartz, J. (146) 45
- Kenny, J., see Wills, M. (146) 139
- Klingenberg, B., see Zaera, F. (146) 13
- Kokorin, A.I., see Golubeva, E.N. (146) 343
- Kosivtsov, Yu., see Sulman, E. (146) 265
- Koteswara Rao, K., see Choudary, B.M. (146) 279
- Lakshmi Kantam, M., see Choudary, B.M. (146) 279
- Lamberti, C., see Bordiga, S. (146) 97
- Lancaster, S.J., see Bochmann, M. (146) 179
- Lefebvre, F. and Basset, J.-M.
Recent applications in catalysis of surface organometallic chemistry (146) 3
- Lefebvre, F., see Vollmer, O. (146) 87
- Lu, G., see Schwartz, J. (146) 45
- Mantegazza, M.A., Petrini, G., Spanò, G., Bagatin, R. and Rivetti, F.
Selective oxidations with hydrogen peroxide and titanium silicalite catalyst (146) 223
- Margittalvi, J.L., see Göbölös, S. (146) 129
- Matveeva, V., see Sulman, E. (146) 257
- Matveeva, V., see Sulman, E. (146) 265
- Miessner, H. and Richter, K.
Well-defined carbonyl and dinitrogen complexes of ruthenium supported on dealuminated Y zeolite. Analogies and differences to the homogeneous case (146) 107
- Moiseev, I.I., see Starchevsky, M.K. (146) 229
- Montanari, L., see De Angelis, A. (146) 37
- Neumann, R., see Cohen, M. (146) 291
- Olivier, H.
Recent developments in the use of non-aqueous ionic liquids for two-phase catalysis (146) 285
- Otero Areán, C., see Bordiga, S. (146) 97
- Palmer, M., see Wills, M. (146) 139
- Papadogianakis, G., see Verspui, G. (146) 299
- Pârvulescu, V.I., see Coman, S. (146) 247
- Pazdersky, Y.A., see Starchevsky, M.K. (146) 229
- Perego, C., see De Angelis, A. (146) 37
- Perkins, N., see Dickinson, A. (146) 211
- Petrini, G., see Mantegazza, M.A. (146) 223
- Petrucci, M.G.L., Fenwick, D. and Kakkar, A.K.
A new catalytic hybrid material from simple acid–base hydrolytic chemistry (146) 309
- Pindado, G.J., see Bochmann, M. (146) 179
- Pitter, S., see Holzhey, N. (146) 25
- Purvis, K., see Schwartz, J. (146) 45
- Resconi, L.
On the mechanisms of growing-chain-end isomerization and transfer reactions in propylene polymerization with isospecific, C₂-symmetric zirconocene catalysts (146) 167
- Richter, K., see Miessner, H. (146) 107
- Rivetti, F., see Mantegazza, M.A. (146) 223
- Rosenfeld, A., see Blum, J. (146) 117
- Rostovshchikova, T.N., see Shilina, M.I. (146) 335
- Roux, J.F., see Coman, S. (146) 247
- Ruf, S. and Emig, G.
Homogeneous catalysis by evaporated solids (146) 271
- Schuchardt, U., see De Oliveira Filho, A.P. (146) 191
- Schumann, H., see Blum, J. (146) 117
- Schumann, H., see Gelman, F. (146) 123
- Schwartz, J., Bernasek, S.L., Lu, G., Keegan, J.P., Purvis, K. and VanderKam, S.
Synthesis and ligand metathetical reactions of supported transesterification catalyst models (146) 45
- Semagina, N., see Sulman, E. (146) 257
- Sheldon, R.A., see Verspui, G. (146) 299
- Shiga, A.
Theoretical study of ethylene polymerization on Ziegler–Natta catalysts and on metallocene catalysts (146) 325
- Shilina, M.I., Rostovshchikova, T.N., Zagorskaya, O.V. and Smirnov, V.V.
Application of low temperature IR spectroscopy for studies of catalyst properties and dynamics on the example of aluminum halide complexes (146) 335
- Simons, K.E., see Wells, P.B. (146) 159
- Slipszenko, J.A., see Wells, P.B. (146) 159
- Smirnov, V.V., see Golubeva, E.N. (146) 343
- Smirnov, V.V., see Shilina, M.I. (146) 335
- Smith, A., see Wills, M. (146) 139
- Sokolov, V., see Sulman, E. (146) 257
- Spagnol, M., see Tena, E. (146) 53
- Spanò, G., see Mantegazza, M.A. (146) 223
- Spencer, J.B., see Yu, J. (146) 199
- Starchevsky, M.K., Hladiy, S.L., Pazdersky, Y.A., Vargaftik, M.N. and Moiseev, I.I.
Giant Pd-561 clusters: onset to new catalytic properties (146) 229
- Studley, J., see Wills, M. (146) 139
- Sulman, E., Matveeva, V., Semagina, N., Yanov, I., Bashilov, V. and Sokolov, V.
Catalytic hydrogenation of acetylenic alcohols using palladium complex of fullerene C₆₀ (146) 257
- Sulman, E., Matveeva, V., Usanov, A., Kosivtsov, Yu., Demidenko, G., Bronstein, L., Chernyshov, D. and Valetsky, P.

- Hydrogenation of acetylene alcohols with novel Pd colloidal catalysts prepared in block copolymers micelles (146) 265
- Tena, E., Candy, J.P., Cornil, M.F., Jousseume, B., Spagnol, M. and Basset, J.M.
Evidence for new surface organotin and germanium complexes with functional groups grafted at the surface of Pt and Rh (146) 53
- Tesche, B., see Coman, S. (146) 247
- Tfirst, E., see Göbölös, S. (146) 129
- Thomas, J.M.
Engineering uniform active sites in inorganic solid catalysts (146) 77
- Turnes Palomino, G., see Bordiga, S. (146) 97
- Usanov, A., see Sulman, E. (146) 265
- Valetsy, P., see Sulman, E. (146) 265
- VanderKam, S., see Schwartz, J. (146) 45
- Van Koten, G. and Jastrzebski, J.T.B.H.
Periphery-functionalized organometallic dendrimers for homogeneous catalysis (146) 317
- Vargaftik, M.N., see Starchevsky, M.K. (146) 229
- Venkat Reddy, C.R., see Choudary, B.M. (146) 279
- Verspui, G., Feiken, J., Papadogianakis, G. and Sheldon, R.A.
Catalytic conversions in water. Part 11: Highly active water-soluble palladium-catalysts in the hydrocarboxylation of olefins and the alternating copolymerization of CO and olefins in water (146) 299
- Vollmer, O., Lefebvre, F. and Bradley, J.S.
Tailoring the pore-size distribution of high surface area micro-porous silicon imidonitrides by control of precursor composition (146) 87
- Vorontsov, P.S., see Golubeva, E.N. (146) 343
- Wells, P.B., Simons, K.E., Slipszenko, J.A., Griffiths, S.P. and Ewing, D.F.
Chiral environments at alkaloid-modified platinum surfaces (146) 159
- Whitney, P.-S., see Yu, J. (146) 199
- Whyman, R., see Collier, P.J. (146) 149
- Wills, M., Gamble, M., Palmer, M., Smith, A., Studley, J. and Kenny, J.
Novel catalysts for asymmetric reduction of carbonyl groups (146) 139
- Yamaguchi, A., Asakura, K. and Iwasawa, Y.
A new aspect of catalysis at designed surfaces: the role of gas phase molecules in surface catalytic reactions (146) 65
- Yanov, I., see Sulman, E. (146) 257
- Yu, J., Whitney, P.-S. and Spencer, J.B.
Direct comparison between the mechanism of hydrometalation and β -elimination in heterogeneous and homogeneous hydrogenation (146) 199
- Zaera, F., Gleason, N.R., Klingenberg, B. and Ali, A.H.
Partial oxidation of hydrocarbons on nickel: from surface science mechanistic studies to catalysis (146) 13
- Zagorskaya, O.V., see Shilina, M.I. (146) 335
- Zecchina, A., see Bordiga, S. (146) 97
- Zubareva, N.A., see Golubeva, E.N. (146) 343
