

Subject index

- Alcohol oxidation
Production of hydrogen peroxide from oxygen and alcohols, catalyzed by palladium complexes (Bortolo, R. (153) 25)
- Alcohols
The reactivity of a Fe–Ti–O mixed oxide under different atmospheres: study of the interaction with simple alcohol molecules (Glisenti, A. (153) 169)
- Alkylation of benzene
Alkylation of benzene by propene on a series of Beta zeolites: toward a better understanding of the mechanisms (Siffert, S. (153) 267)
- Allylamines
The effect of water on the rhodium-catalyzed carbonylation of isopropylallylamine (Da Rosa, R.G. (153) 19)
- Allylation
Phase-transfer catalyzed allylation of sodium phenoxide in a solid–liquid system (Yang, H.-M. (153) 83)
- Beta zeolite
Alkylation of benzene by propene on a series of Beta zeolites: toward a better understanding of the mechanisms (Siffert, S. (153) 267)
- Biphasic catalysis
Biphasic hydroformylation of olefins using a novel water soluble rhodium polyethylene glycolate catalyst (Borrmann, T. (153) 31)
- 2-Butanone
The gas phase hydrogenation of 2-butanone over supported nickel catalysts: introduction of enantioselectivity (López-Martínez, A. (153) 257)
- Carbon
[PdCl₂(NH₂(CH₂)₁₂CH₃)₂] supported on an active carbon: effect of the carbon properties on the catalytic activity of cyclohexene hydrogenation (Díaz-Auñón, J.A. (153) 243)
- Carbon support
Effect of carbon support properties on enantioselective hydrogenation of isophorone over palladium catalysts modified with (–)-dihydroapovincaminic acid ethyl ester (Farkas, G. (153) 215)
- Carbonylation
The effect of water on the rhodium-catalyzed carbonylation of isopropylallylamine (Da Rosa, R.G. (153) 19)
- Catalytic performance
Influences of preparation parameters on the structural and catalytic performance of zirconia in isosynthesis (Caili, S. (153) 139)
- Cerium oxidants
Preparation and properties of an electrode coated with a cerium poly(allyl ether *p*-benzenesulfonate) film for electroorganic reactions (Lofrano, R.C.Z. (153) 237)
- Chemically modified electrode
Preparation and properties of an electrode coated with a cerium poly(allyl ether *p*-benzenesulfonate) film for electroorganic reactions (Lofrano, R.C.Z. (153) 237)
- Chemisorption
The reactivity of a Fe–Ti–O mixed oxide under different atmospheres: study of the interaction with simple alcohol molecules (Glisenti, A. (153) 169)
- Chiral modifier
Effect of carbon support properties on enantioselective hydrogenation of isophorone over palladium catalysts modified with (–)-dihydroapovincaminic acid ethyl ester (Farkas, G. (153) 215)
- Chlorobenzene
Liquid phase catalytic hydrodechlorination of chlorobenzene over supported nickel and palladium catalysts: an NMR insight into solvent function (Yakovlev, V.A. (153) 231)
- Clay
Effect of immobilization and activity analysis of water oxidation catalysts adsorbed into clay (Yamashita, S. (153) 209)
- ¹³C NMR
Liquid phase catalytic hydrodechlorination of chlorobenzene over supported nickel and palladium catalysts: an NMR insight into solvent function (Yakovlev, V.A. (153) 231)
- Cobalt(II) dionemoxime complex
Cobalt(II) diacetylmonoxime complex-catalysed oxidative coupling reactions of few aromatic compounds (Puzari, A. (153) 1)
- CO oxidation
Non-linear change in oxidation state of Cu during Co oxidation on supported copper catalysts measured by the forced-oscillating reaction method (Ono, Y. (153) 53)
- Copolymerization
Homopolymerization of ethylene and copolymerization of ethylene and 1-hexene with bridged metallocene/methylaluminumoxane catalysts: the influence of the bridging moiety (Köppel, A. (153) 109)
- Cr-, Ga/Cr- and Al/Cr-containing pillared zirconium phosphate
Oxidative dehydrogenation of ethane on Cr, mixed Al/Cr and mixed Ga/Cr oxide pillared zirconium phosphate materials (Solsona, B. (153) 199)

Cu

Non-linear change in oxidation state of Cu during Co oxidation on supported copper catalysts measured by the forced-oscillating reaction method (Ono, Y. (153) 53)

Cu ion-exchanged Na · MCM-41

Catalytic activity of Cu ion-exchanged Na · MCM-41 in the liquid-phase oxidation of 2,6-di-*tert*-butylphenol (Kohara, I. (153) 93)

Cu ion-exchanged NaZSM-5

Catalytic activity of Cu ion-exchanged Na · MCM-41 in the liquid-phase oxidation of 2,6-di-*tert*-butylphenol (Kohara, I. (153) 93)

Cumene

Alkylation of benzene by propene on a series of Beta zeolites: toward a better understanding of the mechanisms (Siffert, S. (153) 267)

Cyclohexene hydrogenation

[PdCl₂(NH₂(CH₂)₁₂CH₃)₂] supported on an active carbon: effect of the carbon properties on the catalytic activity of cyclohexene hydrogenation (Díaz-Auñón, J.A. (153) 243)

Deposition–precipitation method

Interaction between palladium and the support in Pd/CeO₂ prepared by deposition–precipitation method and the catalytic activity for methanol decomposition (Shen, W.-J. (153) 165)

2,6-Dialkyl-1,4-benzoquinones

Catalytic oxidation of 2,6-dialkylphenols to the corresponding 2,6-dialkyl-1,4-benzoquinones by molecular oxygen in the presence of P–Mo–V heteropoly acids (Kolesnik, I.G. (153) 147)

Dihydroapovincaminic acid ethyl ester

Effect of carbon support properties on enantioselective hydrogenation of isophorone over palladium catalysts modified with (–)-dihydroapovincaminic acid ethyl ester (Farkas, G. (153) 215)

Dihydroxybiphenyl

Catalytic activity of Cu ion-exchanged Na · MCM-41 in the liquid-phase oxidation of 2,6-di-*tert*-butylphenol (Kohara, I. (153) 93)

Diphenoquinone

Catalytic activity of Cu ion-exchanged Na · MCM-41 in the liquid-phase oxidation of 2,6-di-*tert*-butylphenol (Kohara, I. (153) 93)

²D NMR

Liquid phase catalytic hydrodechlorination of chlorobenzene over supported nickel and palladium catalysts: an NMR insight into solvent function (Yakovlev, V.A. (153) 231)

Dye

Photooxidation mechanism of dye alizarin red in TiO₂ dispersions under visible illumination: an experimental and theoretical examination (Liu, G. (153) 221)

Enantioselectivity

Effect of carbon support properties on enantioselective hydrogenation of isophorone over palladium catalysts modified with (–)-dihydroapovincaminic acid ethyl ester (Farkas, G. (153) 215)

The gas phase hydrogenation of 2-butanone over supported nickel catalysts: introduction of enantioselectivity (López-Martínez, A. (153) 257)

Epoxidation

Epoxidation of cyclohexene with polymethacrylate-based peroxotungstic catalysts (Gelbard, G. (153) 7)

Niobium peroxy compounds as catalysts for liquid-phase oxidation with hydrogen peroxide (Passoni, L.C. (153) 103)

EPR spin trapping

Photochemical transformations of sodium anthracene-1-sulfonate in oxygen-saturated aqueous titanium dioxide suspensions (Blažková, A. (153) 129)

Forced-oscillating reaction method

Non-linear change in oxidation state of Cu during Co oxidation on supported copper catalysts measured by the forced-oscillating reaction method (Ono, Y. (153) 53)

Frontier electron density

Photooxidation mechanism of dye alizarin red in TiO₂ dispersions under visible illumination: an experimental and theoretical examination (Liu, G. (153) 221)

FTIR

Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)

The reactivity of a Fe–Ti–O mixed oxide under different atmospheres: study of the interaction with simple alcohol molecules (Glisenti, A. (153) 169)

Alkylation of benzene by propene on a series of Beta zeolites: toward a better understanding of the mechanisms (Siffert, S. (153) 267)

HDO

Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)

HDS

Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)

H₂O₂

Decomposition of H₂O₂ using ion exchange resin with a spacer containing α-nitroso-β-naphthol as a functional group (Deshmukh, A.P. (153) 75)

Homogeneous catalysis

Methyltrioxorhenium: oxidative cleavage of CC-double bonds and its application in a highly efficient synthesis of vanillin from biological waste (Herrmann, W.A. (153) 49)

HYD

Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)

Hydrodechlorination

Liquid phase catalytic hydrodechlorination of chlorobenzene over supported nickel and palladium catalysts: an NMR insight into solvent function (Yakovlev, V.A. (153) 231)

Hydroformylation

Biphasic hydroformylation of olefins using a novel water soluble rhodium polyethylene glycolate catalyst (Borrmann, T. (153) 31)

Hydrogenation

Catalytic hydrogenation of acrylonitrile–butadiene copolymers by a series of osmium complexes (Mao, T.-F. (153) 63)

Effect of carbon support properties on enantioselective hydrogenation of isophorone over palladium catalysts modified with (–)-dihydroapovincaminic acid ethyl ester (Farkas, G. (153) 215)

- The gas phase hydrogenation of 2-butanone over supported nickel catalysts: introduction of enantioselectivity (López-Martínez, A. (153) 257)
- Hydrogen peroxide**
Cobalt(II) diacetylmonoxime complex-catalysed oxidative coupling reactions of few aromatic compounds (Puzari, A. (153) 1)
Epoxidation of cyclohexene with polymethacrylate-based peroxotungstic catalysts (Gelbard, G. (153) 7)
Production of hydrogen peroxide from oxygen and alcohols, catalyzed by palladium complexes (Bortolo, R. (153) 25)
Niobium peroxo compounds as catalysts for liquid-phase oxidation with hydrogen peroxide (Passoni, L.C. (153) 103)
- Iron oxide**
The reactivity of a Fe–Ti–O mixed oxide under different atmospheres: study of the interaction with simple alcohol molecules (Glisenti, A. (153) 169)
- Isophorone**
Effect of carbon support properties on enantioselective hydrogenation of isophorone over palladium catalysts modified with (–)-dihydroapovincaminic acid ethyl ester (Farkas, G. (153) 215)
- Isosynthesis**
Influences of preparation parameters on the structural and catalytic performance of zirconia in isosynthesis (Caili, S. (153) 139)
- Kinetic**
Biphasic hydroformylation of olefins using a novel water soluble rhodium polyethylene glycolate catalyst (Borrmann, T. (153) 31)
- Kinetics**
Phase-transfer catalyzed allylation of sodium phenoxide in a solid–liquid system (Yang, H.-M. (153) 83)
- Lactams**
The effect of water on the rhodium-catalyzed carbonylation of isopropylallylamine (Da Rosa, R.G. (153) 19)
- Low index single crystal surfaces**
Investigation of the energetics of the decomposition of methyl iodide on Ni(111) surface by the method of BOC–MP (Azizian, S. (153) 191)
- MAS NMR**
Alkylation of benzene by propene on a series of Beta zeolites: toward a better understanding of the mechanisms (Siffert, S. (153) 267)
- Mechanism**
Alkylation of benzene by propene on a series of Beta zeolites: toward a better understanding of the mechanisms (Siffert, S. (153) 267)
- Metallocene catalysts**
Homopolymerization of ethylene and copolymerization of ethylene and 1-hexene with bridged metallocene/methylaluminumoxane catalysts: the influence of the bridging moiety (Köpl, A. (153) 109)
- Methanol decomposition**
Interaction between palladium and the support in Pd/CeO₂ prepared by deposition–precipitation method and the catalytic activity for methanol decomposition (Shen, W.-J. (153) 165)
- Methyl iodide**
Investigation of the energetics of the decomposition of methyl iodide on Ni(111) surface by the method of BOC–MP (Azizian, S. (153) 191)
- Methyltrioxorhenium**
Methyltrioxorhenium: oxidative cleavage of CC-double bonds and its application in a highly efficient synthesis of vanillin from biological waste (Herrmann, W.A. (153) 49)
- Molecular oxygen**
Catalytic oxidation of 2,6-dialkylphenols to the corresponding 2,6-dialkyl-1,4-benzoquinones by molecular oxygen in the presence of P–Mo–V heteropoly acids (Kolesnik, I.G. (153) 147)
- Nickel**
Investigation of the energetics of the decomposition of methyl iodide on Ni(111) surface by the method of BOC–MP (Azizian, S. (153) 191)
- Nickel and palladium catalysts**
Liquid phase catalytic hydrodechlorination of chlorobenzene over supported nickel and palladium catalysts: an NMR insight into solvent function (Yakovlev, V.A. (153) 231)
- Nickel/silica**
The gas phase hydrogenation of 2-butanone over supported nickel catalysts: introduction of enantioselectivity (López-Martínez, A. (153) 257)
- Nickel/zeolite Y**
The gas phase hydrogenation of 2-butanone over supported nickel catalysts: introduction of enantioselectivity (López-Martínez, A. (153) 257)
- Niobium**
Niobium peroxo compounds as catalysts for liquid-phase oxidation with hydrogen peroxide (Passoni, L.C. (153) 103)
- Nitrile-butadiene rubber**
Catalytic hydrogenation of acrylonitrile–butadiene copolymers by a series of osmium complexes (Mao, T.-F. (153) 63)
- α-Nitroso-β-naphthol**
Decomposition of H₂O₂ using ion exchange resin with a spacer containing α-nitroso-β-naphthol as a functional group (Deshmukh, A.P. (153) 75)
- N-ligands**
Production of hydrogen peroxide from oxygen and alcohols, catalyzed by palladium complexes (Bortolo, R. (153) 25)
- Osmium complexes**
Catalytic hydrogenation of acrylonitrile–butadiene copolymers by a series of osmium complexes (Mao, T.-F. (153) 63)
- Oxidation**
Methyltrioxorhenium: oxidative cleavage of CC-double bonds and its application in a highly efficient synthesis of vanillin from biological waste (Herrmann, W.A. (153) 49)
Niobium peroxo compounds as catalysts for liquid-phase oxidation with hydrogen peroxide (Passoni, L.C. (153) 103)
- Oxidation, 2,6-Di-*tert*-butylphenol**
Catalytic activity of Cu ion-exchanged Na·MCM-41 in the liquid-phase oxidation of 2,6-di-*tert*-butylphenol (Kohara, I. (153) 93)
- Oxidation mediator**
Preparation and properties of an electrode coated with a cerium poly(allyl ether *p*-benzenesulfonate) film for electroorganic reactions (Lofrano, R.C.Z. (153) 237)

- Oxidation state**
 Non-linear change in oxidation state of Cu during Co oxidation on supported copper catalysts measured by the forced-oscillating reaction method (Ono, Y. (153) 53)
- Oxidative coupling**
 Cobalt(II) diacetylmonoxime complex-catalysed oxidative coupling reactions of few aromatic compounds (Puzari, A. (153) 1)
- Oxidative dehydrogenation of ethane**
 Oxidative dehydrogenation of ethane on Cr, mixed Al/Cr and mixed Ga/Cr oxide pillared zirconium phosphate materials (Solsona, B. (153) 199)
- Oxygen chemisorption**
 Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)
- Palladium**
 Production of hydrogen peroxide from oxygen and alcohols, catalyzed by palladium complexes (Bortolo, R. (153) 25)
 [PdCl₂(NH₂(CH₂)₁₂CH₃)₂]
 [PdCl₂(NH₂(CH₂)₁₂CH₃)₂] supported on an active carbon: effect of the carbon properties on the catalytic activity of cyclohexene hydrogenation (Díaz-Auñón, J.A. (153) 243)
- Peroxoniobate**
 Niobium peroxo compounds as catalysts for liquid-phase oxidation with hydrogen peroxide (Passoni, L.C. (153) 103)
- Phase-transfer catalysis**
 Phase-transfer catalyzed allylation of sodium phenoxide in a solid–liquid system (Yang, H.-M. (153) 83)
- Phosphines**
 Catalytic hydrogenation of acrylonitrile–butadiene copolymers by a series of osmium complexes (Mao, T.-F. (153) 63)
- Phosphotriamide**
 Epoxidation of cyclohexene with polymethacrylate-based peroxotungstic catalysts (Gelbard, G. (153) 7)
- Photocatalysis**
 Photochemical transformations of sodium anthracene-1-sulfonate in oxygen-saturated aqueous titanium dioxide suspensions (Blažková, A. (153) 129)
- Photooxidation**
 Photooxidation mechanism of dye alizarin red in TiO₂ dispersions under visible illumination: an experimental and theoretical examination (Liu, G. (153) 221)
- Phototransformation**
 Photochemical transformations of sodium anthracene-1-sulfonate in oxygen-saturated aqueous titanium dioxide suspensions (Blažková, A. (153) 129)
- P–Mo–V heteropoly acids**
 Catalytic oxidation of 2,6-dialkylphenols to the corresponding 2,6-dialkyl-1,4-benzoquinones by molecular oxygen in the presence of P–Mo–V heteropoly acids (Kolesnik, I.G. (153) 147)
- Polyaniline**
 Cobalt(II) diacetylmonoxime complex-catalysed oxidative coupling reactions of few aromatic compounds (Puzari, A. (153) 1)
- Polyethylene glycol**
 Biphasic hydroformylation of olefins using a novel water soluble rhodium polyethylene glycolate catalyst (Borrmann, T. (153) 31)
- Polymethacrylate peroxotungstic**
 Epoxidation of cyclohexene with polymethacrylate-based peroxotungstic catalysts (Gelbard, G. (153) 7)
- Pore-size selectivity**
 Catalytic activity of Cu ion-exchanged Na·MCM-41 in the liquid-phase oxidation of 2,6-di-*tert*-butylphenol (Kohara, I. (153) 93)
- Renewable resources**
 Methyltrioxorhenium: oxidative cleavage of CC-double bonds and its application in a highly efficient synthesis of vanillin from biological waste (Herrmann, W.A. (153) 49)
- Rh catalyst**
 Biphasic hydroformylation of olefins using a novel water soluble rhodium polyethylene glycolate catalyst (Borrmann, T. (153) 31)
- Rhodium**
 The effect of water on the rhodium-catalyzed carbonylation of isopropylallylamine (Da Rosa, R.G. (153) 19)
- Ru-red**
 Effect of immobilization and activity analysis of water oxidation catalysts adsorbed into clay (Yamashita, S. (153) 209)
- Scanning electron microscopy**
 Decomposition of H₂O₂ using ion exchange resin with a spacer containing α -nitroso- β -naphthol as a functional group (Deshmukh, A.P. (153) 75)
- Sodium anthracene-1-sulfonate**
 Photochemical transformations of sodium anthracene-1-sulfonate in oxygen-saturated aqueous titanium dioxide suspensions (Blažková, A. (153) 129)
- Sodium phenoxide**
 Phase-transfer catalyzed allylation of sodium phenoxide in a solid–liquid system (Yang, H.-M. (153) 83)
- Solid–liquid system**
 Phase-transfer catalyzed allylation of sodium phenoxide in a solid–liquid system (Yang, H.-M. (153) 83)
- Spillover of carbon monoxide**
 Interaction between palladium and the support in Pd/CeO₂ prepared by deposition–precipitation method and the catalytic activity for methanol decomposition (Shen, W.-J. (153) 165)
- Structure sensitivity**
 The gas phase hydrogenation of 2-butanone over supported nickel catalysts: introduction of enantioselectivity (López-Martínez, A. (153) 257)
- Supported PHT**
 Homopolymerization of ethylene and copolymerization of ethylene and 1-hexene with bridged metallocene/methylaluminumoxane catalysts: the influence of the bridging moiety (Köpl, A. (153) 109)
- Surface chemical reaction**
 Investigation of the energetics of the decomposition of methyl iodide on Ni(111) surface by the method of BOC–MP (Azizian, S. (153) 191)
- Surface thermodynamics**
 Investigation of the energetics of the decomposition of methyl iodide on Ni(111) surface by the method of BOC–MP (Azizian, S. (153) 191)

TiO₂

Photochemical transformations of sodium anthracene-1-sulfonate in oxygen-saturated aqueous titanium dioxide suspensions (Blažková, A. (153) 129)

Photooxidation mechanism of dye alizarin red in TiO₂ dispersions under visible illumination: an experimental and theoretical examination (Liu, G. (153) 221)

Titania

The reactivity of a Fe–Ti–O mixed oxide under different atmospheres: study of the interaction with simple alcohol molecules (Glisenti, A. (153) 169)

TPD of carbon monoxide

Interaction between palladium and the support in Pd/CeO₂ prepared by deposition–precipitation method and the catalytic activity for methanol decomposition (Shen, W.-J. (153) 165)

TPR

Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)

Vanillin

Methyltrioxorhenium: oxidative cleavage of CC-double bonds and its application in a highly efficient synthesis of vanillin from biological waste (Herrmann, W.A. (153) 49)

Visible light

Photooxidation mechanism of dye alizarin red in TiO₂ disper-

sions under visible illumination: an experimental and theoretical examination (Liu, G. (153) 221)

Water oxidation

Effect of immobilization and activity analysis of water oxidation catalysts adsorbed into clay (Yamashita, S. (153) 209)

XPS

Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)

Interaction between palladium and the support in Pd/CeO₂ prepared by deposition–precipitation method and the catalytic activity for methanol decomposition (Shen, W.-J. (153) 165)

XRD

Characterization and evaluation of ZrO₂ supported hydrotreating catalysts (Maity, S.K. (153) 121)

Zeolite A

Non-linear change in oxidation state of Cu during Co oxidation on supported copper catalysts measured by the forced-oscillating reaction method (Ono, Y. (153) 53)

Zirconia

Influences of preparation parameters on the structural and catalytic performance of zirconia in isosynthesis (Caili, S. (153) 139)
