Subject index

Acetic anhydride

Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)

Acetylglycosylated metalloporphyrins

Synthesis of acetylglycosylated metalloporphyrins and their catalysis for cyclohexane oxidation with PhIO under mild conditions (Zhang, X.-B. (154) 31)

Acidity

Influence of mild dealumination on physicochemical, acidic and catalytic properties of H-ZSM-5 (Kumar, S. (154) 115)

Activity–acidity relationship in zeolite ZSM-5. Application of Brønsted-type equations (Costa, C. (154) 193)

Activity

Activity–acidity relationship in zeolite ZSM-5. Application of Brønsted-type equations (Costa, C. (154) 193)

Acylation

Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)

Adsorption

Synthesis of resorcinol from *meta*-phenylenediamine in the presence of zeolites (Brack, B. (154) 73)

Alkene epoxidation

Epoxidation of alkenes by ozone catalysed by Fe(TMP)Cl (Waller, F.J. (154) 85)

Alumina

Group 6 hexacarbonyls supported on alumina: temperature-programmed decomposition and reduction (Kurhinen, M. (154) 229)

Aluminophosphate molecular sieve

Synthesis of butyl propionate using novel aluminophosphate molecular sieve as catalyst (Zhao, Z. (154) 131)

Ammonia

Photocatalytic reduction of hydrazine to ammonia catalysed by $[\text{Ru}^{\text{III}}(\text{edta})(\text{H}_2\text{O})]^-$ complex in a Pt/TiO₂ semiconductor particulate system (Chatterjee, D. (154) 1)

Asymmetric synthesis

Styrene hydroformylation over modified Rh/SiO₂ · Al₂O₃ catalysts (Fellow, J.M.C.R.S.R. (154) 143)

Benzeneacetic acid

Carbonylation of benzyl bromide to benzeneacetic acid and its esters catalysed by water-soluble palladium complexes (Trzeciak, A.M. (154) 93)

Benzoate ion

Inverse phase transfer catalysis: kinetics of the pyridine 1-oxide-catalyzed two-phase reactions of fluoro- and butyl-benzoyl chlorides and benzoate ions (Hung, S.-M. (154) 55)

Benzyl bromide

Carbonylation of benzyl bromide to benzeneacetic acid and its esters catalysed by water-soluble palladium complexes (Trzeciak, A.M. (154) 93)

Branched polyethylene

Substituted 1-(2-pyridyl)-2-azaethene-(*N,N*)-nickel dibromide complexes as catalyst precursors for homogeneous and heterogeneous ethylene polymerization (Köppel, A. (154) 45)

n-Butanol

Synthesis of butyl propionate using novel aluminophosphate molecular sieve as catalyst (Zhao, Z. (154) 131)

Butylbenzoyl chloride

Inverse phase transfer catalysis: kinetics of the pyridine 1-oxide-catalyzed two-phase reactions of fluoro- and butyl-benzoyl chlorides and benzoate ions (Hung, S.-M. (154) 55)

Butyl propionate

Synthesis of butyl propionate using novel aluminophosphate molecular sieve as catalyst (Zhao, Z. (154) 131)

Carbohydrate

Phase transfer catalysis toward the synthesis of O-, S-, Se- and C-glycosides (Carrière, D. (154) 9)

Carbon dioxide

A comparative study on hydrogenation of carbon dioxide and carbon monoxide over iron catalyst (Ando, H. (154) 23)

Carbon monoxide

A comparative study on hydrogenation of carbon dioxide and carbon monoxide over iron catalyst (Ando, H. (154) 23)

Carbonylation

Carbonylation of benzyl bromide to benzeneacetic acid and its esters catalysed by water-soluble palladium complexes (Trzeciak, A.M. (154) 93)

Catalysis

Substituted 1-(2-pyridyl)-2-azaethene-(*N,N*)-nickel dibromide complexes as catalyst precursors for homogeneous and heterogeneous ethylene polymerization (Köppel, A. (154) 45)

Metallacyclic zirconocene complexes as catalysts for homogeneous and heterogeneous ethylene polymerization (Licht, E.H. (154) 65)

Catalyst

Synthesis of butyl propionate using novel aluminophosphate molecular sieve as catalyst (Zhao, Z. (154) 131)

Catalytic mechanisms

How catalytic mechanisms reveal themselves in multiple steady-state data: II. An ethylene hydrogenation example (Ellison, P. (154) 169)

- Catalytic selectivity
Some problems of catalytic selectivity and geometrical changes of coordinated ligands caused by pseudo Jahn–Teller's effect (Budnikov, S.S. (154) 137)
- Chelating ion exchange resins
Some molybdenum-containing chelating ion-exchange resins (polyampholites) as catalysts for the epoxidation of alkenes by organic hydroperoxides (Kotov, St.V. (154) 121)
- Chiral phosphines
Styrene hydroformylation over modified Rh/SiO₂ · Al₂O₃ catalysts (Fellow, J.M.C.R.S.R. (154) 143)
- Comparative study
A comparative study on hydrogenation of carbon dioxide and carbon monoxide over iron catalyst (Ando, H. (154) 23)
- Copper(II)
Copper(II)-catalyzed aerobic oxidation of indane in the presence of aldehydes: intermediate formation of hydroperoxides (Rudler, H. (154) 277)
- Cr(CO)₆
Group 6 hexacarbonyls supported on alumina: temperature-programmed decomposition and reduction (Kurhinen, M. (154) 229)
- Cyclohexane
Synthesis of acetylglycosylated metalloporphyrins and their catalysis for cyclohexane oxidation with PhIO under mild conditions (Zhang, X.-B. (154) 31)
- Cyclohexene
Epoxidation of olefins with sodium hypochlorite catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)
Some molybdenum-containing chelating ion-exchange resins (polyampholites) as catalysts for the epoxidation of alkenes by organic hydroperoxides (Kotov, St.V. (154) 121)
- Cyclohexene oxide yield
Some molybdenum-containing chelating ion-exchange resins (polyampholites) as catalysts for the epoxidation of alkenes by organic hydroperoxides (Kotov, St.V. (154) 121)
- Deactivation
Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)
- Dealumination
Influence of mild dealumination on physicochemical, acidic and catalytic properties of H-ZSM-5 (Kumar, S. (154) 115)
- DEMS
Electrocatalytic reduction of NO₃⁻ on palladium/copper electrodes (De Vooy, A.C.A. (154) 203)
- DFT
Quasimolecular stable forms of oxygen on silver surface. Theoretical analysis by the density functional theory method (Avdeev, V.I. (154) 257)
- Dimethoxyacetophenones
Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)
- Dimethoxybenzenes
Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)
- Diphenyl carbonate
Oxidative carbonylation of phenol to diphenyl carbonate over supported palladium catalysts (Song, H.Y. (154) 243)
- Disproportionation
Influence of mild dealumination on physicochemical, acidic and catalytic properties of H-ZSM-5 (Kumar, S. (154) 115)
- Dissociative and associative oxygen forms
Quasimolecular stable forms of oxygen on silver surface. Theoretical analysis by the density functional theory method (Avdeev, V.I. (154) 257)
- Electrocatalytic reduction
Electrocatalytic reduction of NO₃⁻ on palladium/copper electrodes (De Vooy, A.C.A. (154) 203)
- Eley–Rideal type process
Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)
- Enantio-differentiating
Enantio-differentiating hydrogenation of methyl acetoacetate over fine nickel powder with in situ modification (Osawa, T. (154) 271)
- Epoxidation
Some molybdenum-containing chelating ion-exchange resins (polyampholites) as catalysts for the epoxidation of alkenes by organic hydroperoxides (Kotov, St.V. (154) 121)
- Esterification
Synthesis of butyl propionate using novel aluminophosphate molecular sieve as catalyst (Zhao, Z. (154) 131)
- Ethylene epoxidation
Quasimolecular stable forms of oxygen on silver surface. Theoretical analysis by the density functional theory method (Avdeev, V.I. (154) 257)
- Ethylene hydrogenation
How catalytic mechanisms reveal themselves in multiple steady-state data: II. An ethylene hydrogenation example (Ellison, P. (154) 169)
- Ethylene polymerization
Metallacyclic zirconocene complexes as catalysts for homogeneous and heterogeneous ethylene polymerization (Licht, E.H. (154) 65)
- Exocyclic ketones
Selective hydrogenation of exocyclic α,β-unsaturated ketones: Part I. Hydrogenations over palladium (Fogassy, G. (154) 237)
- Fine nickel powder
Enantio-differentiating hydrogenation of methyl acetoacetate over fine nickel powder with in situ modification (Osawa, T. (154) 271)
- Fluorobenzoyl chloride
Inverse phase transfer catalysis: kinetics of the pyridine 1-oxide-catalyzed two-phase reactions of fluoro- and butyl-benzoyl chlorides and benzoate ions (Hung, S.-M. (154) 55)
- Heterogeneous catalysts
Styrene hydroformylation over modified Rh/SiO₂ · Al₂O₃ catalysts (Fellow, J.M.C.R.S.R. (154) 143)
- Heterogenization
Metallacyclic zirconocene complexes as catalysts for homogeneous and heterogeneous ethylene polymerization (Licht, E.H. (154) 65)

Heteropolyanion

Lignin aerobic oxidation promoted by molybdovanadophosphate polyanion $[\text{PMo}_7\text{V}_5\text{O}_{40}]^{8-}$. Study on the oxidative cleavage of β -O-4 aryl ether structures using model compounds (Evtuguin, D.V. (154) 217)

Hexamethylene glycol

Catalytic reactions of pentamethylene and hexamethylene glycols over an iron oxide (Grabowska, H. (154) 225)

1-Hexene

Epoxidation of olefins with sodium hypochloride catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)

Homogeneous catalysis

Epoxidation of olefins with sodium hypochloride catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)

Hydrazine reduction

Photocatalytic reduction of hydrazine to ammonia catalysed by $[\text{Ru}^{\text{III}}(\text{edta})(\text{H}_2\text{O})]^-$ complex in a Pt/TiO₂ semiconductor particulate system (Chatterjee, D. (154) 1)

Hydroformylation

Styrene hydroformylation over modified Rh/SiO₂ · Al₂O₃ catalysts (Fellow, J.M.C.R.S.R. (154) 143)

Hydrogenation

A comparative study on hydrogenation of carbon dioxide and carbon monoxide over iron catalyst (Ando, H. (154) 23)

Enantio-differentiating hydrogenation of methyl acetoacetate over fine nickel powder with in situ modification (Osawa, T. (154) 271)

Hydrolysis

Synthesis of resorcinol from *meta*-phenylenediamine in the presence of zeolites (Brack, B. (154) 73)

Hydroperoxides

Copper(II)-catalyzed aerobic oxidation of indane in the presence of aldehydes: intermediate formation of hydroperoxides (Rudler, H. (154) 277)

Hydrophobicity

Oxidative carbonylation of phenol to diphenyl carbonate over supported palladium catalysts (Song, H.Y. (154) 243)

Hypochlorite

Epoxidation of olefins with sodium hypochloride catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)

Indane

Copper(II)-catalyzed aerobic oxidation of indane in the presence of aldehydes: intermediate formation of hydroperoxides (Rudler, H. (154) 277)

Indene

Epoxidation of olefins with sodium hypochloride catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)

In situ modification

Enantio-differentiating hydrogenation of methyl acetoacetate over fine nickel powder with in situ modification (Osawa, T. (154) 271)

Iron catalyst

A comparative study on hydrogenation of carbon dioxide and carbon monoxide over iron catalyst (Ando, H. (154) 23)

Catalytic reactions of pentamethylene and hexamethylene glycols over an iron oxide (Grabowska, H. (154) 225)

Iron tetramesitylporphyrin complexes

Epoxidation of alkenes by ozone catalysed by Fe(TMP)Cl (Waller, F.J. (154) 85)

Isomerization

Influence of mild dealumination on physicochemical, acidic and catalytic properties of H-ZSM-5 (Kumar, S. (154) 115)

Ketonization

Catalytic reactions of pentamethylene and hexamethylene glycols over an iron oxide (Grabowska, H. (154) 225)

Kinetic law

Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)

Lignin

Lignin aerobic oxidation promoted by molybdovanadophosphate polyanion $[\text{PMo}_7\text{V}_5\text{O}_{40}]^{8-}$. Study on the oxidative cleavage of β -O-4 aryl ether structures using model compounds (Evtuguin, D.V. (154) 217)

Lignin model compound

Lignin aerobic oxidation promoted by molybdovanadophosphate polyanion $[\text{PMo}_7\text{V}_5\text{O}_{40}]^{8-}$. Study on the oxidative cleavage of β -O-4 aryl ether structures using model compounds (Evtuguin, D.V. (154) 217)

Mechanism discrimination

How catalytic mechanisms reveal themselves in multiple steady-state data: I. Basic principles (Ellison, P. (154) 155)

How catalytic mechanisms reveal themselves in multiple steady-state data: II. An ethylene hydrogenation example (Ellison, P. (154) 169)

Metallacycles

Metallacyclic zirconocene complexes as catalysts for homogeneous and heterogeneous ethylene polymerization (Licht, E.H. (154) 65)

Meta-phenylenediamine

Synthesis of resorcinol from *meta*-phenylenediamine in the presence of zeolites (Brack, B. (154) 73)

Methyl acetoacetate

Enantio-differentiating hydrogenation of methyl acetoacetate over fine nickel powder with in situ modification (Osawa, T. (154) 271)

Methylaluminoxane

Organosilicon-modified silicas as support for zirconocene catalyst (Dos Santos, J.H.Z. (154) 103)

Mo(CO)₆

Group 6 hexacarbonyls supported on alumina: temperature-programmed decomposition and reduction (Kurhinen, M. (154) 229)

Molybdenum-containing cation exchanger

Some molybdenum-containing chelating ion-exchange resins (polyampholites) as catalysts for the epoxidation of alkenes by organic hydroperoxides (Kotov, St.V. (154) 121)

Multiple steady states

How catalytic mechanisms reveal themselves in multiple steady-state data: I. Basic principles (Ellison, P. (154) 155)

Nickel

Substituted 1-(2-pyridyl)-2-azaethene-(*N,N*)-nickel dibromide complexes as catalyst precursors for homogeneous and heterogeneous ethylene polymerization (Köppel, A. (154) 45)

- Nitrate reduction**
Electrocatalytic reduction of NO_3^- on palladium/copper electrodes (De Vooy, A.C.A. (154) 203)
- Nitrite**
Electrocatalytic reduction of NO_3^- on palladium/copper electrodes (De Vooy, A.C.A. (154) 203)
- Olefin epoxidation**
Epoxidation of olefins with sodium hypochloride catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)
- Organosilanes**
Organosilicon-modified silicas as support for zirconocene catalyst (Dos Santos, J.H.Z. (154) 103)
- Oxidation catalysis**
Lignin aerobic oxidation promoted by molybdovanadophosphate polyanion $[\text{PMo}_7\text{V}_5\text{O}_{40}]^{8-}$. Study on the oxidative cleavage of β -O-4 aryl ether structures using model compounds (Evtuguin, D.V. (154) 217)
- Oxidative carbonylation**
Oxidative carbonylation of phenol to diphenyl carbonate over supported palladium catalysts (Song, H.Y. (154) 243)
- Oxygen**
Lignin aerobic oxidation promoted by molybdovanadophosphate polyanion $[\text{PMo}_7\text{V}_5\text{O}_{40}]^{8-}$. Study on the oxidative cleavage of β -O-4 aryl ether structures using model compounds (Evtuguin, D.V. (154) 217)
- Oxygen transfer**
Titanium-catalysed oxidation of thianthrene 5-oxide in heterogeneous (zeolites) versus homogeneous media: electrophilic versus template-mediated oxygen transfer (Adam, W. (154) 251)
- Ozonolysis**
Epoxidation of alkenes by ozone catalysed by $\text{Fe}(\text{TMP})\text{Cl}$ (Waller, F.J. (154) 85)
- Palladium**
Carbonylation of benzyl bromide to benzenoacetic acid and its esters catalysed by water-soluble palladium complexes (Trzeciak, A.M. (154) 93)
Selective hydrogenation of exocyclic α,β -unsaturated ketones: Part I. Hydrogenations over palladium (Fogassy, G. (154) 237)
- Palladium/copper**
Electrocatalytic reduction of NO_3^- on palladium/copper electrodes (De Vooy, A.C.A. (154) 203)
- Paraffin transformation**
Activity–acidity relationship in zeolite ZSM-5. Application of Brønsted-type equations (Costa, C. (154) 193)
- Pd/C**
Oxidative carbonylation of phenol to diphenyl carbonate over supported palladium catalysts (Song, H.Y. (154) 243)
- Pentamethylene glycol**
Catalytic reactions of pentamethylene and hexamethylene glycols over an iron oxide (Grabowska, H. (154) 225)
- Phase transfer**
Inverse phase transfer catalysis: kinetics of the pyridine 1-oxide-catalyzed two-phase reactions of fluoro- and butyl-benzoyl chlorides and benzoate ions (Hung, S.-M. (154) 55)
- Phenol**
Oxidative carbonylation of phenol to diphenyl carbonate over supported palladium catalysts (Song, H.Y. (154) 243)
- PhIO**
Synthesis of acetylglycosylated metalloporphyrins and their catalysis for cyclohexane oxidation with PhIO under mild conditions (Zhang, X.-B. (154) 31)
- Photocatalysis**
Photocatalytic reduction of hydrazine to ammonia catalysed by $[\text{Ru}^{\text{III}}(\text{edta})(\text{H}_2\text{O})]^-$ complex in a Pt/TiO₂ semiconductor particulate system (Chatterjee, D. (154) 1)
- Platinum/titania**
Photocatalytic reduction of hydrazine to ammonia catalysed by $[\text{Ru}^{\text{III}}(\text{edta})(\text{H}_2\text{O})]^-$ complex in a Pt/TiO₂ semiconductor particulate system (Chatterjee, D. (154) 1)
- ³¹P NMR**
Styrene hydroformylation over modified $\text{Rh}/\text{SiO}_2 \cdot \text{Al}_2\text{O}_3$ catalysts (Fellow, J.M.C.R.S.R. (154) 143)
- Polymerization**
Substituted 1-(2-pyridyl)-2-azaethene-(*N,N*)-nickel dibromide complexes as catalyst precursors for homogeneous and heterogeneous ethylene polymerization (Köppel, A. (154) 45)
Organosilicon-modified silicas as support for zirconocene catalyst (Dos Santos, J.H.Z. (154) 103)
- Propionic acid**
Synthesis of butyl propionate using novel aluminophosphate molecular sieve as catalyst (Zhao, Z. (154) 131)
- Pseudo Jahn–Teller’s effect**
Some problems of catalytic selectivity and geometrical changes of coordinated ligands caused by pseudo Jahn–Teller’s effect (Budnikov, S.S. (154) 137)
- PTC**
Phase transfer catalysis toward the synthesis of O-, S-, Se- and C-glycosides (Carrière, D. (154) 9)
- Pyridine**
Substituted 1-(2-pyridyl)-2-azaethene-(*N,N*)-nickel dibromide complexes as catalyst precursors for homogeneous and heterogeneous ethylene polymerization (Köppel, A. (154) 45)
- Pyridine 1-oxide**
Inverse phase transfer catalysis: kinetics of the pyridine 1-oxide-catalyzed two-phase reactions of fluoro- and butyl-benzoyl chlorides and benzoate ions (Hung, S.-M. (154) 55)
- Quantum chemical calculations**
Quasimolecular stable forms of oxygen on silver surface. Theoretical analysis by the density functional theory method (Avdeev, V.I. (154) 257)
- Quasimolecular ozone-like oxygen species**
Quasimolecular stable forms of oxygen on silver surface. Theoretical analysis by the density functional theory method (Avdeev, V.I. (154) 257)
- Resorcinol**
Synthesis of resorcinol from *meta*-phenylenediamine in the presence of zeolites (Brack, B. (154) 73)
- Rhodium**
Styrene hydroformylation over modified $\text{Rh}/\text{SiO}_2 \cdot \text{Al}_2\text{O}_3$ catalysts (Fellow, J.M.C.R.S.R. (154) 143)
- Ru–edta complex**
Photocatalytic reduction of hydrazine to ammonia catalysed by $[\text{Ru}^{\text{III}}(\text{edta})(\text{H}_2\text{O})]^-$ complex in a Pt/TiO₂ semiconductor particulate system (Chatterjee, D. (154) 1)

- Ruthenium porphyrin complexes
Epoxidation of alkenes by ozone catalysed by Fe(TMP)Cl (Waller, F.J. (154) 85)
- Schiff base Ni(II) complex
Epoxidation of olefins with sodium hypochlorite catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)
- Selective hydrogenation
Selective hydrogenation of exocyclic α,β -unsaturated ketones: Part I. Hydrogenations over palladium (Fogassy, G. (154) 237)
- Selenoglycoside
Phase transfer catalysis toward the synthesis of O-, S-, Se- and C-glycosides (Carrière, D. (154) 9)
- Sialic acid
Phase transfer catalysis toward the synthesis of O-, S-, Se- and C-glycosides (Carrière, D. (154) 9)
- Silica
Organosilicon-modified silicas as support for zirconocene catalyst (Dos Santos, J.H.Z. (154) 103)
- Silver
Quasimolecular stable forms of oxygen on silver surface. Theoretical analysis by the density functional theory method (Avdeev, V.I. (154) 257)
- Stilbenes
Epoxidation of olefins with sodium hypochlorite catalysed by new Nickel(II)–Schiff base complexes (Chatterjee, D. (154) 5)
- Substitution
Phase transfer catalysis toward the synthesis of O-, S-, Se- and C-glycosides (Carrière, D. (154) 9)
- Sulfoxide coordination
Titanium-catalysed oxidation of thianthrene 5-oxide in heterogeneous (zeolites) versus homogeneous media: electrophilic versus template-mediated oxygen transfer (Adam, W. (154) 251)
- Synthesis
Synthesis of butyl propionate using novel aluminophosphate molecular sieve as catalyst (Zhao, Z. (154) 131)
- Thianthrene 5-oxide
Titanium-catalysed oxidation of thianthrene 5-oxide in heterogeneous (zeolites) versus homogeneous media: electrophilic versus template-mediated oxygen transfer (Adam, W. (154) 251)
- Thioglycoside
Phase transfer catalysis toward the synthesis of O-, S-, Se- and C-glycosides (Carrière, D. (154) 9)
- Titanium
Titanium-catalysed oxidation of thianthrene 5-oxide in heterogeneous (zeolites) versus homogeneous media: electrophilic versus template-mediated oxygen transfer (Adam, W. (154) 251)
- TPDE
Group 6 hexacarbonyls supported on alumina: temperature-programmed decomposition and reduction (Kurhinen, M. (154) 229)
- TPR
Group 6 hexacarbonyls supported on alumina: temperature-programmed decomposition and reduction (Kurhinen, M. (154) 229)
- Variations of geometry
Some problems of catalytic selectivity and geometrical changes of coordinated ligands caused by pseudo Jahn–Teller's effect (Budnikov, S.S. (154) 137)
- Water soluble catalyst
Carbonylation of benzyl bromide to benzenoacetic acid and its esters catalysed by water-soluble palladium complexes (Trzeciak, A.M. (154) 93)
- W(CO)₆
Group 6 hexacarbonyls supported on alumina: temperature-programmed decomposition and reduction (Kurhinen, M. (154) 229)
- XPS
A comparative study on hydrogenation of carbon dioxide and carbon monoxide over iron catalyst (Ando, H. (154) 23)
- XRD
A comparative study on hydrogenation of carbon dioxide and carbon monoxide over iron catalyst (Ando, H. (154) 23)
- m*-Xylene
Influence of mild dealumination on physicochemical, acidic and catalytic properties of H-ZSM-5 (Kumar, S. (154) 115)
- Zeolites
Synthesis of resorcinol from *meta*-phenylenediamine in the presence of zeolites (Brack, B. (154) 73)
Activity–acidity relationship in zeolite ZSM-5. Application of Brønsted-type equations (Costa, C. (154) 193)
Titanium-catalysed oxidation of thianthrene 5-oxide in heterogeneous (zeolites) versus homogeneous media: electrophilic versus template-mediated oxygen transfer (Adam, W. (154) 251)
Acetylation of dimethoxybenzenes with acetic anhydride in the presence of acidic zeolites (Moreau, P. (154) 185)
- Zirconium
Metallacyclic zirconocene complexes as catalysts for homogeneous and heterogeneous ethylene polymerization (Licht, E.H. (154) 65)
- Zirconocenes
Organosilicon-modified silicas as support for zirconocene catalyst (Dos Santos, J.H.Z. (154) 103)
- ZSM-5
Influence of mild dealumination on physicochemical, acidic and catalytic properties of H-ZSM-5 (Kumar, S. (154) 115)
- ZSM-5 zeolite
Activity–acidity relationship in zeolite ZSM-5. Application of Brønsted-type equations (Costa, C. (154) 193)
