

## Subject index

- ab initio calculation  
Methane partial oxidation in iron zeolites: theory versus experiment (Knops-Gerrits, P.P. (166) 135)
- Ab-initio  
Theoretical study of nitrile hydrolysis reaction on Zn(II) ion exchanged zeolites (Barbosa, L.A.M.M. (166) 101)
- Acid catalysis  
Gas phase dehydration of C<sub>6</sub> alcohols promoted by Y zeolite and supported nafion catalysts (Park, C. (166) 303)
- Addition polymerization  
Metal catalysts for the vinyl polymerization of norbornene (Janiak, C. (166) 193)
- Adsorption  
An ab initio study of adsorption related properties of diatomic molecules in zeolites (Tielens, F. (166) 175)
- Alcohol dehydration  
Gas phase dehydration of C<sub>6</sub> alcohols promoted by Y zeolite and supported nafion catalysts (Park, C. (166) 303)
- Aldol-condensation  
Dinuclear pincer-palladium(II) complexes and their use as homogeneous or heterogeneous catalyst for the aldol reaction of methyl isocynoacetate (Giménez, R. (166) 265)
- Alkene hydroformylation  
1-Heptene hydroformylation over phosphinated silica-anchored rhodium thiolate complexes (Fierro, J.L.G. (166) 255)
- Alumina  
Controlled stepwise preparation of alumina supported Re<sub>2</sub>(CO)<sub>10</sub> catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)
- Aluminium phosphates  
Acid and redox properties of Co-substituted aluminium phosphates (Corà, F. (166) 87)
- Aluminophosphate  
Approximation of the Mulliken charges and dipole moments of the oxygen atoms of aluminophosphate sieves (Larin, A.V. (166) 73)
- Alumino-silicate zeolites  
Design of microporous transition metal oxide catalysts and investigation of their synthesis conditions (Corà, F. (166) 123)
- Autowaves  
Monte Carlo model of oscillatory CO oxidation having regard to the change of catalytic properties due to the adsorbate-induced Pt(1 0 0) structural transformation (Latkin, E.I. (166) 23)
- Barium hydroxyapatite  
Nitrous oxide as oxidant for the oxidation of methane on barium hydroxyapatites in the presence and absence of tetrachloromethane (Sugiyama, S. (166) 323)
- Benzene  
Dynamics of benzene in zeolite KL (Hansenne, C. (166) 147)  
Photooxidation of benzene to phenol by ruthenium bipyridine complexes grafted on mesoporous silica FSM-16 (Fujishima, K. (166) 211)
- Bimetal complex catalyst  
In situ FT-IR studies on the CO<sub>2</sub> hydrogenation over the SiO<sub>2</sub>-supported RhM (M = Cr, Mo, W) complex catalysts (Shao, C. (166) 331)
- Bimetallic complex  
Dinuclear pincer-palladium(II) complexes and their use as homogeneous or heterogeneous catalyst for the aldol reaction of methyl isocynoacetate (Giménez, R. (166) 265)
- Brønsted acidity  
Gas phase dehydration of C<sub>6</sub> alcohols promoted by Y zeolite and supported nafion catalysts (Park, C. (166) 303)
- Butadiene  
The effects of reaction variables on the palladium-catalyzed reactions of butadiene with water (Lee, B.I. (166) 233)
- Carbonylation of  
Ship-in-bottle synthesis of anionic Rh carbonyls in faujasites (Brabec, L. (166) 283)
- Catalyst deactivation  
Gas phase dehydration of C<sub>6</sub> alcohols promoted by Y zeolite and supported nafion catalysts (Park, C. (166) 303)
- cis*-Bis(glycinato)copper(II)  
Oxidative oligomerisation of 2-naphthol by *cis*-bis(glycinato)-copper(II) (Handique, J.G. (166) 225)
- CO<sub>2</sub> hydrogenation  
In situ FT-IR studies on the CO<sub>2</sub> hydrogenation over the SiO<sub>2</sub>-supported RhM (M = Cr, Mo, W) complex catalysts (Shao, C. (166) 331)
- CO oxidation  
Monte Carlo model of oscillatory CO oxidation having regard to the change of catalytic properties due to the adsorbate-induced Pt(1 0 0) structural transformation (Latkin, E.I. (166) 23)
- Co  
Electrocatalytic behavior of the Co<sub>33</sub>Zr<sub>67</sub> metallic glass for hydrogen evolution (Jukic, A. (166) 293)

## Controlled gas-phase preparation

Controlled stepwise preparation of alumina supported  $\text{Re}_2(\text{CO})_{10}$  catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)

## Co–Zr alloys

Electrocatalytic behavior of the  $\text{Co}_{33}\text{Zr}_{67}$  metallic glass for hydrogen evolution (Jukic, A. (166) 293)

## Cyclodimerization

The effects of reaction variables on the palladium-catalyzed reactions of butadiene with water (Lee, B.I. (166) 233)

## DFT method

Electronic structure of vanadyl pyrophosphate: cluster model studies (Witko, M. (166) 59)

## DFT

An ab initio study of adsorption related properties of diatomic molecules in zeolites (Tielens, F. (166) 175)

The role of tungsten in formation of active sites for no SCR on the V–W–O catalyst surface — quantum chemical modeling (DFT) (Broclawik, E. (166) 31)

## Diatomic molecules

An ab initio study of adsorption related properties of diatomic molecules in zeolites (Tielens, F. (166) 175)

## Dipole moments

Approximation of the Mulliken charges and dipole moments of the oxygen atoms of aluminophosphate sieves (Larin, A.V. (166) 73)

## Electrocatalysis

Electrocatalytic behavior of the  $\text{Co}_{33}\text{Zr}_{67}$  metallic glass for hydrogen evolution (Jukic, A. (166) 293)

## Electrocatalytic reduction

The catalytic and photocatalytic autoxidation of  $\text{S}_x^{2-}$  to  $\text{SO}_4^{2-}$  by water-soluble cobalt porphyrin (Chen, S.-M. (166) 243)

## Electronic structure

Electrocatalytic behavior of the  $\text{Co}_{33}\text{Zr}_{67}$  metallic glass for hydrogen evolution (Jukic, A. (166) 293)

Electronic structure of vanadyl pyrophosphate: cluster model studies (Witko, M. (166) 59)

## Energetics

Reactivity of methane mono-oxygenase, insights from quantum mechanic studies on synthetic iron model complexes (Knops-Gerrits, P.-P. (166) 3)

## Entropy

Dynamics of benzene in zeolite KL (Hansenne, C. (166) 147)

## Epoxidation

Epoxidation of olefins catalyzed by  $[\pi\text{-C}_5\text{H}_5\text{NC}_{16}\text{H}_{33}]_3\text{-}[\text{PW}_4\text{O}_{16}]$  with molecular oxygen and a recyclable reductant 2-ethylanthrahydroquinone (Sun, Y. (166) 219)

## EXAFS analysis

Reactivity of methane mono-oxygenase, insights from quantum mechanic studies on synthetic iron model complexes (Knops-Gerrits, P.-P. (166) 3)

## Faujasite

An ab initio study of adsorption related properties of diatomic molecules in zeolites (Tielens, F. (166) 175)

## Force field

Methane partial oxidation in iron zeolites: theory versus experiment (Knops-Gerrits, P.P. (166) 135)

## FSM-16

Photooxidation of benzene to phenol by ruthenium bipyridine complexes grafted on mesoporous silica FSM-16 (Fujishima, K. (166) 211)

## Gallium phosphate

Acid and redox properties of Co-substituted aluminium phosphates (Corà, F. (166) 87)

## Heterogeneous catalysis

Dinuclear pincer-palladium(II) complexes and their use as homogeneous or heterogeneous catalyst for the aldol reaction of methyl isocyanoacetate (Giménez, R. (166) 265)

## Heterogeneous catalysts

Design of microporous transition metal oxide catalysts and investigation of their synthesis conditions (Corà, F. (166) 123)

## 1-Hexene

Hydroformylation of propene and 1-hexene catalysed by a  $\alpha$ -zirconium phosphate supported rhodium-phosphine complex (Karlsson, M. (166) 337)

## Homogeneous catalysis

Dinuclear pincer-palladium(II) complexes and their use as homogeneous or heterogeneous catalyst for the aldol reaction of methyl isocyanoacetate (Giménez, R. (166) 265)

## Homogeneous catalyst

Direct synthesis of 2-phenylethanol by hydrogenation of methyl phenylacetate using homogeneous ruthenium-phosphine catalysis under low hydrogen pressure (Nomura, K. (166) 345)

## Hydroformylation

Hydroformylation of propene and 1-hexene catalysed by a  $\alpha$ -zirconium phosphate supported rhodium-phosphine complex (Karlsson, M. (166) 337)

## Hydrogen evolution

Electrocatalytic behavior of the  $\text{Co}_{33}\text{Zr}_{67}$  metallic glass for hydrogen evolution (Jukic, A. (166) 293)

## Hydrogen peroxide

Epoxidation of olefins catalyzed by  $[\pi\text{-C}_5\text{H}_5\text{NC}_{16}\text{H}_{33}]_3\text{-}[\text{PW}_4\text{O}_{16}]$  with molecular oxygen and a recyclable reductant 2-ethylanthrahydroquinone (Sun, Y. (166) 219)

## Hydrogenation of ester

Direct synthesis of 2-phenylethanol by hydrogenation of methyl phenylacetate using homogeneous ruthenium-phosphine catalysis under low hydrogen pressure (Nomura, K. (166) 345)

## Hydrolysis

Theoretical study of nitrile hydrolysis reaction on Zn(II) ion exchanged zeolites (Barbosa, L.A.M.M. (166) 101)

## Impulse oscillation

A study on energy and time description of the catalytic act with the selective energy transfer and impulse oscillation models (Larsson, R. (166) 39)

## In situ FT-IR

In situ FT-IR studies on the  $\text{CO}_2$  hydrogenation over the  $\text{SiO}_2$ -supported  $\text{RhM}$  ( $\text{M} = \text{Cr}, \text{Mo}, \text{W}$ ) complex catalysts (Shao, C. (166) 331)

- Interaction energy  
An ab initio study of adsorption related properties of diatomic molecules in zeolites (Tielens, F. (166) 175)
- Iron zeolites  
Methane partial oxidation in iron zeolites: theory versus experiment (Knops-Gerrits, P.P. (166) 135)
- Kinetic Monte Carlo  
Kinetic Monte Carlo simulation of oxygen exchange of SnO<sub>2</sub> surface (Pulkkinen, U. (166) 15)
- Lewis acid site  
Theoretical study of nitrile hydrolysis reaction on Zn(II) ion exchanged zeolites (Barbosa, L.A.M.M. (166) 101)
- MCM-41  
Structure simulation of MCM-41 type materials (Kleestorfer, K. (166) 53)
- Mesoporous  
Structure simulation of MCM-41 type materials (Kleestorfer, K. (166) 53)
- Metal catalysts  
Metal catalysts for the vinyl polymerization of norbornene (Janiak, C. (166) 193)
- Metal nuclearity  
Methane partial oxidation in iron zeolites: theory versus experiment (Knops-Gerrits, P.P. (166) 135)
- Metallic glasses  
Electrocatalytic behavior of the Co<sub>33</sub>Zr<sub>67</sub> metallic glass for hydrogen evolution (Jukic, A. (166) 293)
- Methane conversion  
Methane partial oxidation in iron zeolites: theory versus experiment (Knops-Gerrits, P.P. (166) 135)
- Methane mono-oxygenase  
Reactivity of methane mono-oxygenase, insights from quantum mechanic studies on synthetic iron model complexes (Knops-Gerrits, P.-P. (166) 3)
- Methane oxidation  
Nitrous oxide as oxidant for the oxidation of methane on barium hydroxyapatites in the presence and absence of tetrachloromethane (Sugiyama, S. (166) 323)
- Microporous materials  
Design of microporous transition metal oxide catalysts and investigation of their synthesis conditions (Corà, F. (166) 123)
- Mobility  
Dynamic behaviour of azonia-spiro-alkanes within the MOR and MTW zeolite pore structures (Frigerio, F. (166) 167)
- Molecular dynamics  
Dynamic behaviour of azonia-spiro-alkanes within the MOR and MTW zeolite pore structures (Frigerio, F. (166) 167)
- Molecular oxygen  
Epoxidation of olefins catalyzed by [ $\pi$ -C<sub>5</sub>H<sub>5</sub>NC<sub>16</sub>H<sub>33</sub>]<sub>3</sub>-[PW<sub>4</sub>O<sub>16</sub>] with molecular oxygen and a recyclable reductant 2-ethylanthrahydroquinone (Sun, Y. (166) 219)
- Monte Carlo model  
Monte Carlo model of oscillatory CO oxidation having regard to the change of catalytic properties due to the adsorbate-induced Pt(1 0 0) structural transformation (Latkin, E.I. (166) 23)
- Monte Carlo  
Dynamic behaviour of azonia-spiro-alkanes within the MOR and MTW zeolite pore structures (Frigerio, F. (166) 167)
- Mulliken charges  
Approximation of the Mulliken charges and dipole moments of the oxygen atoms of aluminophosphate sieves (Larin, A.V. (166) 73)
- Multipole analysis  
Approximation of the Mulliken charges and dipole moments of the oxygen atoms of aluminophosphate sieves (Larin, A.V. (166) 73)
- Nafion composite  
Gas phase dehydration of C<sub>6</sub> alcohols promoted by Y zeolite and supported nafion catalysts (Park, C. (166) 303)
- Nanotubes  
The quantum structure of carbon tori (Bovin, S.A. (166) 47)
- 2-Naphthol  
Oxidative oligomerisation of 2-naphthol by *cis*-bis(glycinato)-copper(II) (Handique, J.G. (166) 225)
- Nickel exchanged zeolite  
Gas phase dehydration of C<sub>6</sub> alcohols promoted by Y zeolite and supported nafion catalysts (Park, C. (166) 303)
- N<sub>2</sub>O  
Nitrous oxide as oxidant for the oxidation of methane on barium hydroxyapatites in the presence and absence of tetrachloromethane (Sugiyama, S. (166) 323)
- Norbornene  
Metal catalysts for the vinyl polymerization of norbornene (Janiak, C. (166) 193)
- Octadienol  
The effects of reaction variables on the palladium-catalyzed reactions of butadiene with water (Lee, B.I. (166) 233)
- Oligomerisation  
Oxidative oligomerisation of 2-naphthol by *cis*-bis(glycinato)-copper(II) (Handique, J.G. (166) 225)
- Orbital description  
Reactivity of methane mono-oxygenase, insights from quantum mechanic studies on synthetic iron model complexes (Knops-Gerrits, P.-P. (166) 3)
- Oscillations  
Monte Carlo model of oscillatory CO oxidation having regard to the change of catalytic properties due to the adsorbate-induced Pt(1 0 0) structural transformation (Latkin, E.I. (166) 23)
- Oxygen  
Kinetic Monte Carlo simulation of oxygen exchange of SnO<sub>2</sub> surface (Pulkkinen, U. (166) 15)
- Palladium catalysts  
The effects of reaction variables on the palladium-catalyzed reactions of butadiene with water (Lee, B.I. (166) 233)
- Palladium  
Dinuclear pincer-palladium(II) complexes and their use as homogeneous or heterogeneous catalyst for the aldol reaction of methyl isocynoacetate (Giménez, R. (166) 265)

- PCO<sub>2</sub>  
Controlled stepwise preparation of alumina supported Re<sub>2</sub>(CO)<sub>10</sub> catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)
- Phenol  
Photooxidation of benzene to phenol by ruthenium bipyridine complexes grafted on mesoporous silica FSM-16 (Fujishima, K. (166) 211)
- Phosphinated silica  
1-Heptene hydroformylation over phosphinated silica-anchored rhodium thiolate complexes (Fierro, J.L.G. (166) 255)
- Phosphine  
Hydroformylation of propene and 1-hexene catalysed by a  $\alpha$ -zirconium phosphate supported rhodium-phosphine complex (Karlsson, M. (166) 337)
- Photocatalytic autoxidation  
The catalytic and photocatalytic autoxidation of S<sub>x</sub><sup>2-</sup> to SO<sub>4</sub><sup>2-</sup> by water-soluble cobalt porphyrin (Chen, S.-M. (166) 243)
- Photooxidation  
Photooxidation of benzene to phenol by ruthenium bipyridine complexes grafted on mesoporous silica FSM-16 (Fujishima, K. (166) 211)
- Physico-chemical characterisation  
Methane partial oxidation in iron zeolites: theory versus experiment (Knops-Gerrits, P.P. (166) 135)
- Polynorbornene  
Metal catalysts for the vinyl polymerization of norbornene (Janiak, C. (166) 193)
- Polysulfide ions  
The catalytic and photocatalytic autoxidation of S<sub>x</sub><sup>2-</sup> to SO<sub>4</sub><sup>2-</sup> by water-soluble cobalt porphyrin (Chen, S.-M. (166) 243)
- Propene  
Hydroformylation of propene and 1-hexene catalysed by a  $\alpha$ -zirconium phosphate supported rhodium-phosphine complex (Karlsson, M. (166) 337)
- Pulse chemisorption  
Controlled stepwise preparation of alumina supported Re<sub>2</sub>(CO)<sub>10</sub> catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)
- Quantum mechanics  
Reactivity of methane mono-oxygenase, insights from quantum mechanic studies on synthetic iron model complexes (Knops-Gerrits, P.-P. (166) 3)
- Re<sub>2</sub>(CO)<sub>10</sub>  
Controlled stepwise preparation of alumina supported Re<sub>2</sub>(CO)<sub>10</sub> catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)
- Reaction variables  
The effects of reaction variables on the palladium-catalyzed reactions of butadiene with water (Lee, B.I. (166) 233)
- Reactivity  
Reactivity of methane mono-oxygenase, insights from quantum mechanic studies on synthetic iron model complexes (Knops-Gerrits, P.-P. (166) 3)
- Recyclable reductant (2-ethylanthrahydroquinone)  
Epoxidation of olefins catalyzed by [ $\pi$ -C<sub>5</sub>H<sub>5</sub>NC<sub>16</sub>H<sub>33</sub>]<sub>3</sub>-[PW<sub>4</sub>O<sub>16</sub>] with molecular oxygen and a recyclable reductant 2-ethylanthrahydroquinone (Sun, Y. (166) 219)
- Redox properties  
Acid and redox properties of Co-substituted aluminium phosphates (Corà, F. (166) 87)
- Rh carbonyls of different charges  
Ship-in-bottle synthesis of anionic Rh carbonyls in faujasites (Brabec, L. (166) 283)
- [Rh(NH<sub>3</sub>)<sub>5</sub>Cl] in alkali faujasites  
Ship-in-bottle synthesis of anionic Rh carbonyls in faujasites (Brabec, L. (166) 283)
- Rhenium carbonyl  
Controlled stepwise preparation of alumina supported Re<sub>2</sub>(CO)<sub>10</sub> catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)
- Rhodium thiolate complexes  
1-Heptene hydroformylation over phosphinated silica-anchored rhodium thiolate complexes (Fierro, J.L.G. (166) 255)
- Rhodium  
Hydroformylation of propene and 1-hexene catalysed by a  $\alpha$ -zirconium phosphate supported rhodium-phosphine complex (Karlsson, M. (166) 337)
- Ru complex  
Photooxidation of benzene to phenol by ruthenium bipyridine complexes grafted on mesoporous silica FSM-16 (Fujishima, K. (166) 211)
- Ruthenium  
Direct synthesis of 2-phenylethanol by hydrogenation of methyl phenylacetate using homogeneous ruthenium-phosphine catalysis under low hydrogen pressure (Nomura, K. (166) 345)
- Selective energy transfer  
A study on energy and time description of the catalytic act with the selective energy transfer and impulse oscillation models (Larsson, R. (166) 39)
- Silica-supported catalyst  
Dinuclear pincer-palladium(II) complexes and their use as homogeneous or heterogeneous catalyst for the aldol reaction of methyl isocynoacetate (Giménez, R. (166) 265)
- Simulation  
Dynamics of benzene in zeolite KL (Hansenne, C. (166) 147)
- Solvent  
Dynamics of benzene in zeolite KL (Hansenne, C. (166) 147)
- Structure simulation  
Structure simulation of MCM-41 type materials (Kleestorfer, K. (166) 53)
- Structure  
Reactivity of methane mono-oxygenase, insights from quantum mechanic studies on synthetic iron model complexes (Knops-Gerrits, P.-P. (166) 3)
- Supported metal complexes  
1-Heptene hydroformylation over phosphinated silica-anchored rhodium thiolate complexes (Fierro, J.L.G. (166) 255)

## Surface phase transformation

Monte Carlo model of oscillatory CO oxidation having regard to the change of catalytic properties due to the adsorbate-induced Pt(1 0 0) structural transformation (Latkin, E.I. (166) 23)

## Surface

Kinetic Monte Carlo simulation of oxygen exchange of SnO<sub>2</sub> surface (Pulkkinen, U. (166) 15)

## Telomerization

The effects of reaction variables on the palladium-catalyzed reactions of butadiene with water (Lee, B.I. (166) 233)

## Template

Dynamic behaviour of azonia-spiro-alkanes within the MOR and MTW zeolite pore structures (Frigerio, F. (166) 167)

## Tetrachloromethane

Nitrous oxide as oxidant for the oxidation of methane on barium hydroxyapatites in the presence and absence of tetrachloromethane (Sugiyama, S. (166) 323)

## Tin dioxide

Kinetic Monte Carlo simulation of oxygen exchange of SnO<sub>2</sub> surface (Pulkkinen, U. (166) 15)

## Toroids

The quantum structure of carbon tori (Bovin, S.A. (166) 47)

## TPO

Controlled stepwise preparation of alumina supported Re<sub>2</sub>(CO)<sub>10</sub> catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)

## TPR

Controlled stepwise preparation of alumina supported Re<sub>2</sub>(CO)<sub>10</sub> catalysts by gas-phase adsorption technique: TPR, TPO and pulse chemisorption study (Räty, J. (166) 275)

## Transition metal oxides

Design of microporous transition metal oxide catalysts and investigation of their synthesis conditions (Corà, F. (166) 123)

## Vanadyl pyrophosphate

Electronic structure of vanadyl pyrophosphate: cluster model studies (Witko, M. (166) 59)

## Vinyl polymerization

Metal catalysts for the vinyl polymerization of norbornene (Janiak, C. (166) 193)

## Water adsorption

The role of tungsten in formation of active sites for no SCR on the V-W-O catalyst surface — quantum chemical modeling (DFT) (Broclawik, E. (166) 31)

## Water molecule

Theoretical study of nitrile hydrolysis reaction on Zn(II) ion exchanged zeolites (Barbosa, L.A.M.M. (166) 101)

## Water

The effects of reaction variables on the palladium-catalyzed reactions of butadiene with water (Lee, B.I. (166) 233)

## Wavenumber

A study on energy and time description of the catalytic act with the selective energy transfer and impulse oscillation models (Larsson, R. (166) 39)

WO<sub>3</sub>-V<sub>2</sub>O<sub>5</sub> solid solution

The role of tungsten in formation of active sites for no SCR on the V-W-O catalyst surface — quantum chemical modeling (DFT) (Broclawik, E. (166) 31)

## Zeolite synthesis

Methane partial oxidation in iron zeolites: theory versus experiment (Knops-Gerrits, P.P. (166) 135)

## Zeolite Y

Gas phase dehydration of C<sub>6</sub> alcohols promoted by Y zeolite and supported nafion catalysts (Park, C. (166) 303)

## Zeolite

Dynamic behaviour of azonia-spiro-alkanes within the MOR and MTW zeolite pore structures (Frigerio, F. (166) 167)

Dynamics of benzene in zeolite KL (Hansenne, C. (166) 147)

Acid and redox properties of Co-substituted aluminium phosphates (Corà, F. (166) 87)

Theoretical study of nitrile hydrolysis reaction on Zn(II) ion exchanged zeolites (Barbosa, L.A.M.M. (166) 101)

 $\alpha$ -Zirconium phosphate

Hydroformylation of propene and 1-hexene catalysed by a  $\alpha$ -zirconium phosphate supported rhodium-phosphine complex (Karlsson, M. (166) 337)

## Zone folding

The quantum structure of carbon tori (Bovin, S.A. (166) 47)

## Zr

Electrocatalytic behavior of the Co<sub>33</sub>Zr<sub>67</sub> metallic glass for hydrogen evolution (Jukic, A. (166) 293)
