

Subject index

Ab initio

Ab initio study of the isocyanate surface complex over silica and alumina (Ferullo, R.M. (167) 115)

Acidity sol–gel catalysts

Synthesis, characterization and catalytic properties of Pt/CeO₂–Al₂O₃ and Pt/La₂O₃–Al₂O₃ sol–gel derived catalysts (Vazquez, A. (167) 91)

Adsorbed films

Ionic surfactant films imaged by atomic force microscopy (Ceotto, G. (167) 225)

Adsorption dynamics

Ionic surfactant films imaged by atomic force microscopy (Ceotto, G. (167) 225)

Adsorption

Study of adsorption of binary mixtures on disordered substrates (Bulnes, F. (167) 129)

AES

The behavior of vapor deposited Co layers on MoO₃ surfaces at 90 and 300 K (Viscido, L. (167) 199)

AFM imaging

Ionic surfactant films imaged by atomic force microscopy (Ceotto, G. (167) 225)

Ag(1 1 1)

Spectroscopic studies of ethylene adsorption on oxygen-modified Ag(1 1 1) at high pressures (Stacchiola, D. (167) 13)

Alumina

Ab initio study of the isocyanate surface complex over silica and alumina (Ferullo, R.M. (167) 115)

Aluminium oxide

Low temperature FT-IR studies of NO adsorption on aluminum oxide and supported palladium (Paul, D.K. (167) 67)

Atomic force microscopy

Dielectric constant measurements of interfacial aqueous solutions using atomic force microscopy (de Souza, E.F. (167) 235)

Atomistic simulations

Computer simulation of surface-point defects interaction in hcp metals (Pascuet, M.I. (167) 165)

Auger electron spectroscopy

The nucleation and growth of gold on silica (Luo, K. (167) 191)

Carbon dioxide

A statistical model for flash thermal desorption of carbon dioxide from polycrystalline molybdenum (López-Carreño, L.D. (167) 157)

Carbon monoxide

A statistical model for flash thermal desorption of carbon dioxide from polycrystalline molybdenum (López-Carreño, L.D. (167) 157)

Carbon tetrachloride

Phosgene formation from adsorption of carbon tetrachloride on oxygen modified Ir(111) (Meyer, R.J. (167) 59)

Catalysis

Phosgene formation from adsorption of carbon tetrachloride on oxygen modified Ir(111) (Meyer, R.J. (167) 59)

Catalytic kinetics

Surface intermediates during the catalytic reduction of NO on rhodium catalysts: a kinetic inference (Zaera, F. (167) 23)

Chemisorption

Chemisorption of molecular oxygen on Cu(1 0 0): a Hartree–Fock and density functional study (Torrás, J. (167) 109)

Chiral surface

Chiral single crystal surface chemistry (Gellman, A.J. (167) 3)

Cluster model

Ab initio study of the isocyanate surface complex over silica and alumina (Ferullo, R.M. (167) 115)

Co catalyst

CO hydrogenation with Co catalyst supported on porous media (Sapag, K. (167) 81)

Cobalt overlayers oxidation

The behavior of vapor deposited Co layers on MoO₃ surfaces at 90 and 300 K (Viscido, L. (167) 199)

Cobalt site

An inelastic neutron scattering study of the interaction of dihydrogen with the cobalt site of a cobalt aluminophosphate catalyst. Two-dimensional quantum rotation of adsorbed dihydrogen (Ramirez-Cuesta, A.J. (167) 217)

Contaminant species

Toward the study of catalytic reactions under industrial conditions: a contaminated CO oxidation model (Bustos, V. (167) 121)

DeNO_x

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodríguez, J.A. (167) 47)

Density functional method

Chemisorption of molecular oxygen on Cu(1 0 0): a Hartree–Fock and density functional study (Torrás, J. (167) 109)

DeSO_x

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodriguez, J.A. (167) 47)

Dielectric exchange force

Dielectric constant measurements of interfacial aqueous solutions using atomic force microscopy (de Souza, E.F. (167) 235)

Diffusion

Computer simulation of surface-point defects interaction in hcp metals (Pascuet, M.I. (167) 165)

2,4-Dinitroaniline decomposition on titania

Photodecomposition of 2,4-dinitroaniline on Li/TiO₂ and Rb/TiO₂ nanocrystallite sol-gel derived catalysts (López, T. (167) 101)

Dual site-bond model

Everett's sorption hysteresis domain theory revisited from the point of view of the dual site-bond model of disordered media (Rojas, F. (167) 141)

Electric field

An inelastic neutron scattering study of the interaction of dihydrogen with the cobalt site of a cobalt aluminophosphate catalyst. Two-dimensional quantum rotation of adsorbed dihydrogen (Ramirez-Cuesta, A.J. (167) 217)

Enantioselective catalysis

Chiral single crystal surface chemistry (Gellman, A.J. (167) 3)

Environmental catalysis

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodriguez, J.A. (167) 47)

Epoxidation

Spectroscopic studies of ethylene adsorption on oxygen-modified Ag(1 1 1) at high pressures (Stacchiola, D. (167) 13)

Ethylene oxide

Spectroscopic studies of ethylene adsorption on oxygen-modified Ag(1 1 1) at high pressures (Stacchiola, D. (167) 13)

Ethylene

Spectroscopic studies of ethylene adsorption on oxygen-modified Ag(1 1 1) at high pressures (Stacchiola, D. (167) 13)

Fischer-Tropsch

CO hydrogenation with Co catalyst supported on porous media (Sapag, K. (167) 81)

Free surfaces

Computer simulation of surface-point defects interaction in hcp metals (Pascuet, M.I. (167) 165)

FT-IR studies

Low temperature FT-IR studies of NO adsorption on aluminum oxide and supported palladium (Paul, D.K. (167) 67)

hcp Lattices

Computer simulation of surface-point defects interaction in hcp metals (Pascuet, M.I. (167) 165)

Heterogeneous surfaces

Study of adsorption of binary mixtures on disordered substrates (Bulnes, F. (167) 129)

High miller index

Chiral single crystal surface chemistry (Gellman, A.J. (167) 3)

Hydration force

Dielectric constant measurements of interfacial aqueous solutions using atomic force microscopy (de Souza, E.F. (167) 235)

Independent sorption domain theory

Everett's sorption hysteresis domain theory revisited from the point of view of the dual site-bond model of disordered media (Rojas, F. (167) 141)

2-Iodoethanol

Spectroscopic studies of ethylene adsorption on oxygen-modified Ag(1 1 1) at high pressures (Stacchiola, D. (167) 13)

Ionic surfactant

Ionic surfactant films imaged by atomic force microscopy (Ceotto, G. (167) 225)

Iridium

Low translational energy mechanisms in the dissociative chemisorption of methane on iridium and platinum surfaces (Reeves, C.T. (167) 207)

Phosgene formation from adsorption of carbon tetrachloride on oxygen modified Ir(111) (Meyer, R.J. (167) 59)

Isocyanate

Ab initio study of the isocyanate surface complex over silica and alumina (Ferullo, R.M. (167) 115)

Li and Rb doped titania

Photodecomposition of 2,4-dinitroaniline on Li/TiO₂ and Rb/TiO₂ nanocrystallite sol-gel derived catalysts (López, T. (167) 101)

MAS-NMR sol-gel catalysts

Synthesis, characterization and catalytic properties of Pt/CeO₂-Al₂O₃ and Pt/La₂O₃-Al₂O₃ sol-gel derived catalysts (Vazquez, A. (167) 91)

Methane

Low translational energy mechanisms in the dissociative chemisorption of methane on iridium and platinum surfaces (Reeves, C.T. (167) 207)

Modeling flash desorption

A statistical model for flash thermal desorption of carbon dioxide from polycrystalline molybdenum (López-Carreño, L.D. (167) 157)

Molecular beam

Low translational energy mechanisms in the dissociative chemisorption of methane on iridium and platinum surfaces (Reeves, C.T. (167) 207)

Surface intermediates during the catalytic reduction of NO on rhodium catalysts: a kinetic inference (Zaera, F. (167) 23)

Molecular oxygen

Chemisorption of molecular oxygen on Cu(1 0 0): a Hartree-Fock and density functional study (Torrás, J. (167) 109)

Molybdenum oxides reduction

The behavior of vapor deposited Co layers on MoO₃ surfaces at 90 and 300 K (Viscido, L. (167) 199)

Molybdenum

A statistical model for flash thermal desorption of carbon dioxide from polycrystalline molybdenum (López-Carreño, L.D. (167) 157)

Monte Carlo simulations

Toward the study of catalytic reactions under industrial conditions: a contaminated CO oxidation model (Bustos, V. (167) 121)

Study of adsorption of binary mixtures on disordered substrates (Bulnes, F. (167) 129)

Monte-Carlo modelling

STM investigation and Monte-Carlo modelling of spillover in a supported metal catalyst (Ramirez-Cuesta, A.J. (167) 171)

Nanoparticles

STM investigation and Monte-Carlo modelling of spillover in a supported metal catalyst (Ramirez-Cuesta, A.J. (167) 171)

Neutron scattering

An inelastic neutron scattering study of the interaction of dihydrogen with the cobalt site of a cobalt aluminophosphate catalyst. Two-dimensional quantum rotation of adsorbed dihydrogen (Ramirez-Cuesta, A.J. (167) 217)

Nitrogen dioxide

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodriguez, J.A. (167) 47)

NO adsorption

Low temperature FT-IR studies of NO adsorption on aluminum oxide and supported palladium (Paul, D.K. (167) 67)

NO Reduction

Surface intermediates during the catalytic reduction of NO on rhodium catalysts: a kinetic inference (Zaera, F. (167) 23)

N₂O surface intermediate

Surface intermediates during the catalytic reduction of NO on rhodium catalysts: a kinetic inference (Zaera, F. (167) 23)

NO-CO reaction kinetics

NO-CO reaction kinetics on Pd/MgO model catalysts: morphology and support effects (Piccolo, L. (167) 181)

NO

Single crystal and high area titania supported rhodium: the interaction of supported Rh(CO)₂ with NO (Hayden, B.E. (167) 33)

Nucleation

The nucleation and growth of gold on silica (Luo, K. (167) 191)

Oxygen

STM investigation and Monte-Carlo modelling of spillover in a supported metal catalyst (Ramirez-Cuesta, A.J. (167) 171)

Palladium

Low temperature FT-IR studies of NO adsorption on aluminum oxide and supported palladium (Paul, D.K. (167) 67)

STM investigation and Monte-Carlo modelling of spillover in a supported metal catalyst (Ramirez-Cuesta, A.J. (167) 171)

Phosgene

Phosgene formation from adsorption of carbon tetrachloride on oxygen modified Ir(111) (Meyer, R.J. (167) 59)

Photoelectron spectroscopy

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodriguez, J.A. (167) 47)

Pillared clays

CO hydrogenation with Co catalyst supported on porous media (Sapag, K. (167) 81)

Platinum cerium-alumina

Synthesis, characterization and catalytic properties of Pt/CeO₂-Al₂O₃ and Pt/La₂O₃-Al₂O₃ sol-gel derived catalysts (Vazquez, A. (167) 91)

Platinum lanthanum-alumina

Synthesis, characterization and catalytic properties of Pt/CeO₂-Al₂O₃ and Pt/La₂O₃-Al₂O₃ sol-gel derived catalysts (Vazquez, A. (167) 91)

Platinum

Low translational energy mechanisms in the dissociative chemisorption of methane on iridium and platinum surfaces (Reeves, C.T. (167) 207)

Point defect properties

Computer simulation of surface-point defects interaction in hcp metals (Pascuet, M.I. (167) 165)

Pulsed molecular beam technique

NO-CO reaction kinetics on Pd/MgO model catalysts: morphology and support effects (Piccolo, L. (167) 181)

Reflection-absorption infrared spectroscopy

Spectroscopic studies of ethylene adsorption on oxygen-modified Ag(1 1 1) at high pressures (Stacchiola, D. (167) 13)

Rh(CO)₂

Single crystal and high area titania supported rhodium: the interaction of supported Rh(CO)₂ with NO (Hayden, B.E. (167) 33)

Rhodium

Single crystal and high area titania supported rhodium: the interaction of supported Rh(CO)₂ with NO (Hayden, B.E. (167) 33)

Selective oxidation

Spectroscopic studies of ethylene adsorption on oxygen-modified Ag(1 1 1) at high pressures (Stacchiola, D. (167) 13)

Shape selectivity

CO hydrogenation with Co catalyst supported on porous media (Sapag, K. (167) 81)

Silica

Ab initio study of the isocyanate surface complex over silica and alumina (Ferullo, R.M. (167) 115)

The nucleation and growth of gold on silica (Luo, K. (167) 191)

Single crystal

Low translational energy mechanisms in the dissociative chemisorption of methane on iridium and platinum surfaces (Reeves, C.T. (167) 207)

Sol-gel catalysts

Synthesis, characterization and catalytic properties of Pt/CeO₂-Al₂O₃ and Pt/La₂O₃-Al₂O₃ sol-gel derived catalysts (Vazquez, A. (167) 91)

Sorption hysteresis

Everett's sorption hysteresis domain theory revisited from the point of view of the dual site-bond model of disordered media (Rojas, F. (167) 141)

Spillover

STM investigation and Monte-Carlo modelling of spillover in a supported metal catalyst (Ramirez-Cuesta, A.J. (167) 171)

Sulfur dioxide

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodriguez, J.A. (167) 47)

Supported model catalyst

NO-CO reaction kinetics on Pd/MgO model catalysts: morphology and support effects (Piccolo, L. (167) 181)

Surface attractive and repulsive forces

Dielectric constant measurements of interfacial aqueous solutions using atomic force microscopy (de Souza, E.F. (167) 235)

Surface islands

Surface intermediates during the catalytic reduction of NO on rhodium catalysts: a kinetic inference (Zaera, F. (167) 23)

Surface reaction

Phosgene formation from adsorption of carbon tetrachloride on oxygen modified Ir(111) (Meyer, R.J. (167) 59)

Syngas reaction

CO hydrogenation with Co catalyst supported on porous media (Sapag, K. (167) 81)

TiO₂

STM investigation and Monte-Carlo modelling of spillover in a supported metal catalyst (Ramirez-Cuesta, A.J. (167) 171)

Titania sol-gel catalysts

Photodecomposition of 2,4-dinitroaniline on Li/TiO₂ and Rb/TiO₂ nanocrystallite sol-gel derived catalysts (López, T. (167) 101)

Turnover number

NO-CO reaction kinetics on Pd/MgO model catalysts: morphology and support effects (Piccolo, L. (167) 181)

UV-VIS band gap on titania

Photodecomposition of 2,4-dinitroaniline on Li/TiO₂ and Rb/TiO₂ nanocrystallite sol-gel derived catalysts (López, T. (167) 101)

Waters double layer variable dielectric constant

Dielectric constant measurements of interfacial aqueous solutions using atomic force microscopy (de Souza, E.F. (167) 235)

XPS

The behavior of vapor deposited Co layers on MoO₃ surfaces at 90 and 300 K (Viscido, L. (167) 199)

X-ray absorption spectroscopy

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodriguez, J.A. (167) 47)

XRD of doped titania

Photodecomposition of 2,4-dinitroaniline on Li/TiO₂ and Rb/TiO₂ nanocrystallite sol-gel derived catalysts (López, T. (167) 101)

ZGB model

Toward the study of catalytic reactions under industrial conditions: a contaminated CO oxidation model (Bustos, V. (167) 121)

Zinc oxide

Chemistry of SO₂ and NO₂ on ZnO(0001)-Zn and ZnO powders: changes in reactivity with surface structure and composition (Rodriguez, J.A. (167) 47)
