

Subject index

Ab initio

Studies on diisopropyl-naphthalene substitutional isomerism (Brzozowski, R. (170) 95)

Acetylation of toluene

Selective acetylation of toluene to 4-methylacetophenone over zeolite catalysts (Jaimol, T. (170) 117)

Acetylation over H-ZSM-5

Selective acetylation of toluene to 4-methylacetophenone over zeolite catalysts (Jaimol, T. (170) 117)

Acidity

Acidity enhancement of SBA mesoporous molecular sieve by modification with $\text{SO}_4^{2-}/\text{ZrO}_2$ (Hua, W. (170) 195)

Activated carbon

$[\text{Rh}(\mu\text{-Cl})(\text{COD})_2]$ supported on activated carbons for the hydroformylation of 1-octene: effects of support surface chemistry and solvent (Díaz-Auñón, J.A. (170) 81)

AgOAc-(S)-BINAP systems

Mechanism of silver(I)-catalyzed Mukaiyama aldol reaction: active species in solution in AgPF₆-(S)-BINAP versus AgOAc-(S)-BINAP systems (Ohkouchi, M. (170) 1)

AgPF₆-(S)-BINAP systems

Mechanism of silver(I)-catalyzed Mukaiyama aldol reaction: active species in solution in AgPF₆-(S)-BINAP versus AgOAc-(S)-BINAP systems (Ohkouchi, M. (170) 1)

Alcohols

Carbonylation of *tert*-butyl alcohol over H-zeolites (Xu, Q. (170) 147)

Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)

Alkanes

Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)

Alkoxy ligand

Steric and electronic effects of the R in IndTiCl₂(OR) catalysts on the syndiospecific polymerization of styrene (Ma, H. (170) 67)

Alkyl hydroperoxides

Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)

Alkylated polystyrene

The catalysis of some novel polystyrene-supported porphyrinatomanganese(III) in hydroxylation of cyclohexane with molecular oxygen (Huang, J.-W. (170) 261)

Alkynes

Iminophosphine-palladium(0) complexes as catalysts in the alkoxycarbonylation of terminal alkynes (Scrivanti, A. (170) 51)

Allylic coupling

Vitamin B₁₂-catalyzed conversion of some γ - and δ -bromoalkanoles to polyhydroxy alkanols (Petrović, Z. (170) 267)

Alumina

Mono- and heterometallic carbonyl precursor based RuMo/Al₂O₃ catalysts: hydrodesulfurization activity and temperature programmed studies (Pinto, P. (170) 209)

Amidocarbonylation

Amidocarbonylation of cyclohexene and 1-pentene with Co₂(CO)₈ modified with triarylstibines in very mild conditions (Gómez, R.M. (170) 271)

Aminoacids

Amidocarbonylation of cyclohexene and 1-pentene with Co₂(CO)₈ modified with triarylstibines in very mild conditions (Gómez, R.M. (170) 271)

Benzoate ions

Inverse phase transfer catalysis: kinetics of the pyridine-1-oxide-catalyzed two-phase reactions of methyl-, methoxy-, iodo-, and nitro-benzoyl chlorides and benzoate ions (Lu, Y.L. (170) 57)

Bimetal complex catalyst

In situ FT-IR study on CO₂ hydrogenation over SiO₂-supported PtM (M = Cr, Mo, W) complex catalysts (Shao, C. (170) 245)

Bromoalkanols

Vitamin B₁₂-catalyzed conversion of some γ - and δ -bromoalkanoles to polyhydroxy alkanols (Petrović, Z. (170) 267)

Calculations

Host–guest interactions and their role in enantioselective hydrogenation of α -keto esters. An analysis of model systems (Carneiro, J.W.d.M. (170) 235)

Calculations (ab initio)

Vibrational frequencies of CO adsorbed on silica supported Mo atoms from density functional calculations (López, N. (170) 175)

Carbon monoxide

Vibrational frequencies of CO adsorbed on silica supported Mo atoms from density functional calculations (López, N. (170) 175)

Carbon nanofibers

Carbon nanofiber supported palladium catalyst for liquid-phase reactions. An active and selective catalyst for hydrogenation of cinnamaldehyde into hydrocinnamaldehyde (Pham-Huu, C. (170) 155)

Carbonylation

Carbonylation of *tert*-butyl alcohol over H-zeolites (Xu, Q. (170) 147)

Iminophosphine-palladium(0) complexes as catalysts in the alkoxy-carbonylation of terminal alkynes (Scrivanti, A. (170) 51)

Carboxylic acids

Carbonylation of *tert*-butyl alcohol over H-zeolites (Xu, Q. (170) 147)

Oxidations by the system "hydrogen peroxide–manganese(IV) complex–carboxylic acid". Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul'pin, G.B. (170) 17)

Catalysis

Efficient homogeneous catalysis of heteropoly acid and its characterization through etherifications of alcohol (Liu, J.F. (170) 109)

Host–guest interactions and their role in enantioselective hydrogenation of α -keto esters. An analysis of model systems (Carneiro, J.W.d.M. (170) 235)

Study of the selective catalysis of metalloporphyrins for 2-methyl-butane oxidation with PhIO under mild conditions (Guo, C.-C. (170) 43)

The catalysis of some novel polystyrene-supported porphyrinatomanganese(III) in hydroxylation of cyclohexane with molecular oxygen (Huang, J.-W. (170) 261)

The first application of titanocenes in the asymmetric oxidation of sulfides (Sala, G.D. (170) 219)

Catalyst

Synthesis of PEG–iridium conjugates and their use as hydrogenation catalysts in a water/substrate two-phase medium (Loch, J.A. (170) 75)

Characterization

Efficient homogeneous catalysis of heteropoly acid and its characterization through etherifications of alcohol (Liu, J.F. (170) 109)

o-Chloronitrobenzene

Metal complex effect on the hydrogenation of *o*-chloronitrobenzene over polymer-stabilized colloidal ruthenium clusters (Yan, X. (170) 203)

Cinchonidine

Enantioselective hydrogenation of ethyl pyruvate catalyzed by PVP-stabilized rhodium nanoclusters (Huang, Y. (170) 143)

Cinnamaldehyde hydrogenation

Carbon nanofiber supported palladium catalyst for liquid-phase reactions. An active and selective catalyst for hydrogenation of cinnamaldehyde into hydrocinnamaldehyde (Pham-Huu, C. (170) 155)

CO₂ hydrogenation

In situ FT-IR study on CO₂ hydrogenation over SiO₂-supported PtM (M = Cr, Mo, W) complex catalysts (Shao, C. (170) 245)

Co-adsorption

First-principles study of the adsorption of formaldehyde on the clean and atomic oxygen covered Cu(1 1 1) surface (Gomes, J.R.B. (170) 187)

Cobalt

Amidocarbonylation of cyclohexene and 1-pentene with Co₂(CO)₈ modified with triarylstibines in very mild conditions (Gómez, R.M. (170) 271)

Colloidal ruthenium clusters

Metal complex effect on the hydrogenation of *o*-chloronitrobenzene over polymer-stabilized colloidal ruthenium clusters (Yan, X. (170) 203)

Conjugates

Synthesis of PEG–iridium conjugates and their use as hydrogenation catalysts in a water/substrate two-phase medium (Loch, J.A. (170) 75)

Copper

First-principles study of the adsorption of formaldehyde on the clean and atomic oxygen covered Cu(1 1 1) surface (Gomes, J.R.B. (170) 187)

Cu₂(OH)₃Cl

Synthesis of dimethyl carbonate by vapor phase oxidative carbonylation of methanol over Cu-based catalysts (Han, M.S. (170) 225)

Cu-based catalysts

Synthesis of dimethyl carbonate by vapor phase oxidative carbonylation of methanol over Cu-based catalysts (Han, M.S. (170) 225)

Cyclohexane

The catalysis of some novel polystyrene-supported porphyrinatomanganese(III) in hydroxylation of cyclohexane with molecular oxygen (Huang, J.-W. (170) 261)

Dehydrobromination

Vitamin B₁₂-catalyzed conversion of some γ - and δ -bromoalkanoles to polyhydroxy alkanols (Petrović, Z. (170) 267)

Density functional calculations

First-principles study of the adsorption of formaldehyde on the clean and atomic oxygen covered Cu(1 1 1) surface (Gomes, J.R.B. (170) 187)

DFT

Studies on diisopropylnaphthalene substitutional isomerism (Brzozowski, R. (170) 95)

Diisopropylnaphthalene (DIPN)

Studies on diisopropylnaphthalene substitutional isomerism (Brzozowski, R. (170) 95)

Dimethyl carbonate (DMC)

Synthesis of dimethyl carbonate by vapor phase oxidative carbonylation of methanol over Cu-based catalysts (Han, M.S. (170) 225)

Dioxymethylene

First-principles study of the adsorption of formaldehyde on the clean and atomic oxygen covered Cu(1 1 1) surface (Gomes, J.R.B. (170) 187)

Etherification

Efficient homogeneous catalysis of heteropoly acid and its characterization through etherifications of alcohol (Liu, J.F. (170) 109)

Enantioselective

Enantioselective hydrogenation of ethyl pyruvate catalyzed by PVP-stabilized rhodium nanoclusters (Huang, Y. (170) 143)

Heterogeneous asymmetric reactions. Part 21. Amino acid derived modifiers in the enantioselective hydrogenation of ethyl pyruvate over supported platinum catalyst (Szöllösi, G. (170) 165)

Host–guest interactions and their role in enantioselective hydrogenation of α -keto esters. An analysis of model systems (Carneiro, J.W.d.M. (170) 235)

Enantioselective hydrogenation

Enantioselective hydrogenation of isophorone over Pd catalysts in the presence of (–)-dihydroapovincaminic acid ethyl ester. The effect of reduction method of Pd blacks on the enantiomeric excess (Farkas, G. (170) 101)

Formaldehyde

First-principles study of the adsorption of formaldehyde on the clean and atomic oxygen covered Cu(1 1 1) surface (Gomes, J.R.B. (170) 187)

GaCl₃ supported on Mont.-K10

Polycondensation of benzyl chloride over Ga- and In-modified ZSM-5 type zeolites and Si-MCM-41 or Montmorillonite-K10 supported GaCl₃ and InCl₃ catalysts (Choudhary, V.R. (170) 251)

GaCl₃ supported on Si-MCM-41

Polycondensation of benzyl chloride over Ga- and In-modified ZSM-5 type zeolites and Si-MCM-41 or Montmorillonite-K10 supported GaCl₃ and InCl₃ catalysts (Choudhary, V.R. (170) 251)

Ga-modified ZSM-5

Polycondensation of benzyl chloride over Ga- and In-modified ZSM-5 type zeolites and Si-MCM-41 or Montmorillonite-K10 supported GaCl₃ and InCl₃ catalysts (Choudhary, V.R. (170) 251)

Gas phase deposition

Mono- and heterometallic carbonyl precursor based RuMo/Al₂O₃ catalysts: hydrodesulfurization activity and temperature programmed studies (Pinto, P. (170) 209)

HDS

Mono- and heterometallic carbonyl precursor based RuMo/Al₂O₃ catalysts: hydrodesulfurization activity and temperature programmed studies (Pinto, P. (170) 209)

Heterogeneous

[Rh(μ -Cl)(COD)]₂ supported on activated carbons for the hydroformylation of 1-octene: effects of support surface chemistry and solvent (Díaz-Auñón, J.A. (170) 81)

Heterogeneous

Host–guest interactions and their role in enantioselective hydrogenation of α -keto esters. An analysis of model systems (Carneiro, J.W.d.M. (170) 235)

Heterogeneous catalysis

First-principles study of the adsorption of formaldehyde on the clean and atomic oxygen covered Cu(1 1 1) surface (Gomes, J.R.B. (170) 187)

Heterogeneous catalysts

Immobilization of η^5 -cyclopentadienyltris(dimethylamido)zirconium polymerization catalysts on a chlorosilane- and HMDS-modified mesoporous silica surface: a new concept for supporting metallocene amides towards heterogeneous single-site-catalysts (Schneider, H. (170) 127)

High surface area

Carbon nanofiber supported palladium catalyst for liquid-phase reactions. An active and selective catalyst for hydrogenation of cinnamaldehyde into hydrocinnamaldehyde (Pham-Huu, C. (170) 155)

Homogeneous catalysis

Amidocarbonylation of cyclohexene and 1-pentene with Co₂(CO)₈ modified with triarylstibines in very mild conditions (Gómez, R.M. (170) 271)

Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)

Heteropoly acid

Efficient homogeneous catalysis of heteropoly acid and its characterization through etherifications of alcohol (Liu, J.F. (170) 109)

Hydration

Vitamin B₁₂-catalyzed conversion of some γ - and δ -bromoalkanoles to polyhydroxy alkanols (Petrović, Z. (170) 267)

Hydroformylation

[Rh(μ -Cl)(COD)]₂ supported on activated carbons for the hydroformylation of 1-octene: effects of support surface chemistry and solvent (Díaz-Auñón, J.A. (170) 81)

Hydrogen peroxide

Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)

Hydrogenation

Enantioselective hydrogenation of ethyl pyruvate catalyzed by PVP-stabilized rhodium nanoclusters (Huang, Y. (170) 143)

Heterogeneous asymmetric reactions. Part 21. Amino acid derived modifiers in the enantioselective hydrogenation of ethyl pyruvate over supported platinum catalyst (Szöllösi, G. (170) 165)

Metal complex effect on the hydrogenation of *o*-chloronitrobenzene over polymer-stabilized colloidal ruthenium clusters (Yan, X. (170) 203)

Hydroxylation

The catalysis of some novel polystyrene-supported porphyrinato-manganese(III) in hydroxylation of cyclohexane with molecular oxygen (Huang, J.-W. (170) 261)

Iminophosphine-palladium(0) complexes

Iminophosphine-palladium(0) complexes as catalysts in the alkoxy-carbonylation of terminal alkynes (Scrivanti, A. (170) 51)

- In situ FT-IR
In situ FT-IR study on CO₂ hydrogenation over SiO₂-supported PtM (M = Cr, Mo, W) complex catalysts (Shao, C. (170) 245)
- InCl₃ supported on Mont.-K10
Polycondensation of benzyl chloride over Ga- and In-modified ZSM-5 type zeolites and Si-MCM-41 or Montmorillonite-K10 supported GaCl₃ and InCl₃ catalysts (Choudhary, V.R. (170) 251)
- InCl₃ supported on Si-MCM-41
Polycondensation of benzyl chloride over Ga- and In-modified ZSM-5 type zeolites and Si-MCM-41 or Montmorillonite-K10 supported GaCl₃ and InCl₃ catalysts (Choudhary, V.R. (170) 251)
- In-modified ZSM-5
Polycondensation of benzyl chloride over Ga- and In-modified ZSM-5 type zeolites and Si-MCM-41 or Montmorillonite-K10 supported GaCl₃ and InCl₃ catalysts (Choudhary, V.R. (170) 251)
- Inverse phase transfer catalysis
Inverse phase transfer catalysis: kinetics of the pyridine-1-oxide-catalyzed two-phase reactions of methyl-, methoxy-, iodo-, and nitro-benzoyl chlorides and benzoate ions (Lu, Y.L. (170) 57)
- Isomer population
Studies on diisopropylnaphthalene substitutional isomerism (Brzozowski, R. (170) 95)
- Isophorone
Enantioselective hydrogenation of isophorone over Pd catalysts in the presence of (–)-dihydroapovincaminic acid ethyl ester. The effect of reduction method of Pd blacks on the enantiomeric excess (Farkas, G. (170) 101)
- α-Keto esters
Heterogeneous asymmetric reactions. Part 21. Amino acid derived modifiers in the enantioselective hydrogenation of ethyl pyruvate over supported platinum catalyst (Szöllösi, G. (170) 165)
- Ketones
Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)
- Leaching
Immobilization of η⁵-cyclopentadienyltris(dimethylamido)zirconium polymerization catalysts on a chlorosilane- and HMDS-modified mesoporous silica surface: a new concept for supporting metallocene amides towards heterogeneous single-site-catalysts (Schneider, H. (170) 127)
- L-Tryptophane
Heterogeneous asymmetric reactions. Part 21. Amino acid derived modifiers in the enantioselective hydrogenation of ethyl pyruvate over supported platinum catalyst (Szöllösi, G. (170) 165)
- Manganese complexes
Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)
- Mechanisms
Host–guest interactions and their role in enantioselective hydrogenation of α-keto esters. An analysis of model systems (Carneiro, J.W.d.M. (170) 235)
- Mesoporous molecular sieve
Acidity enhancement of SBA mesoporous molecular sieve by modification with SO₄²⁻/ZrO₂ (Hua, W. (170) 195)
- Metal complex
Metal complex effect on the hydrogenation of *o*-chloronitrobenzene over polymer-stabilized colloidal ruthenium clusters (Yan, X. (170) 203)
Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul’pin, G.B. (170) 17)
- Metallocene
Immobilization of η⁵-cyclopentadienyltris(dimethylamido)zirconium polymerization catalysts on a chlorosilane- and HMDS-modified mesoporous silica surface: a new concept for supporting metallocene amides towards heterogeneous single-site-catalysts (Schneider, H. (170) 127)
- Methanol
Synthesis of dimethyl carbonate by vapor phase oxidative carbonylation of methanol over Cu-based catalysts (Han, M.S. (170) 225)
- Methyl α-D-glucopyranoside
TEMPO-derivatives as catalysts in the oxidation of primary alcohol groups in carbohydrates (Bragd, P.L. (170) 35)
- Methyl-, methoxy-, iodo-, and nitro-benzoyl chlorides
Inverse phase transfer catalysis: kinetics of the pyridine-1-oxide-catalyzed two-phase reactions of methyl-, methoxy-, iodo-, and nitro-benzoyl chlorides and benzoate ions (Lu, Y.L. (170) 57)
- 2-Methyl-butane
Study of the selective catalysis of metalloporphyrins for 2-methyl-butane oxidation with PhIO under mild conditions (Guo, C.-C. (170) 43)
- Molibdenum
Vibrational frequencies of CO adsorbed on silica supported Mo atoms from density functional calculations (López, N. (170) 175)
Mono- and heterometallic carbonyl precursor based RuMo/Al₂O₃ catalysts: hydrodesulfurization activity and temperature programmed studies (Pinto, P. (170) 209)
- Mukaiyama aldol reaction
Mechanism of silver(I)-catalyzed Mukaiyama aldol reaction: active species in solution in AgPF₆-(S)-BINAP versus AgOAc-(S)-BINAP systems (Ohkouchi, M. (170) 1)
- Nanocluster
Enantioselective hydrogenation of ethyl pyruvate catalyzed by PVP-stabilized rhodium nanoclusters (Huang, Y. (170) 143)
- Oxidation
Oxidations by the system “hydrogen peroxide–manganese(IV) complex–carboxylic acid”. Part 3. Oxygenation of ethane,

- higher alkanes, alcohols, olefins and sulfides (Shul'pin, G.B. (170) 17)
- Study of the selective catalysis of metalloporphyrins for 2-methyl-butane oxidation with PhIO under mild conditions (Guo, C.-C. (170) 43)
- The first application of titanocenes in the asymmetric oxidation of sulfides (Sala, G.D. (170) 219)
- Oxidation of primary alcohol groups
- TEMPO-derivatives as catalysts in the oxidation of primary alcohol groups in carbohydrates (Bragd, P.L. (170) 35)
- Oxidative carbonylation
- Synthesis of dimethyl carbonate by vapor phase oxidative carbonylation of methanol over Cu-based catalysts (Han, M.S. (170) 225)
- Oxygen pulse chemisorption
- Mono- and heterometallic carbonyl precursor based RuMo/Al₂O₃ catalysts: hydrodesulfurization activity and temperature programmed studies (Pinto, P. (170) 209)
- Oxygenation
- Oxidations by the system "hydrogen peroxide–manganese(IV) complex–carboxylic acid". Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul'pin, G.B. (170) 17)
- Palladium catalyst
- Carbon nanofiber supported palladium catalyst for liquid-phase reactions. An active and selective catalyst for hydrogenation of cinnamaldehyde into hydrocinnamaldehyde (Pham-Huu, C. (170) 155)
- Pd black catalysts
- Enantioselective hydrogenation of isophorone over Pd catalysts in the presence of (–)-dihydroapovincaminic acid ethyl ester. The effect of reduction method of Pd blacks on the enantiomeric excess (Farkas, G. (170) 101)
- PEG–iridium conjugates
- Synthesis of PEG–iridium conjugates and their use as hydrogenation catalysts in a water/substrate two-phase medium (Loch, J.A. (170) 75)
- Platinum catalyst
- Heterogeneous asymmetric reactions. Part 21. Amino acid derived modifiers in the enantioselective hydrogenation of ethyl pyruvate over supported platinum catalyst (Szöllösi, G. (170) 165)
- Polycondensation of benzyl chloride
- Polycondensation of benzyl chloride over Ga- and In-modified ZSM-5 type zeolites and Si-MCM-41 or Montmorillonite-K10 supported GaCl₃ and InCl₃ catalysts (Choudhary, V.R. (170) 251)
- Polyhydroxy alkanols
- Vitamin B₁₂-catalyzed conversion of some γ - and δ -bromoalkanol to polyhydroxy alkanols (Petrović, Z. (170) 267)
- Polymerization
- Immobilization of η^5 -cyclopentadienyltris(dimethylamido)zirconium polymerization catalysts on a chlorosilane- and HMDs-modified mesoporous silica surface: a new concept for supporting metallocene amides towards heterogeneous single-site-catalysts (Schneider, H. (170) 127)
- Polystyrene-supported porphyrinatomanganese(III)
- The catalysis of some novel polystyrene-supported porphyrinatomanganese(III) in hydroxylation of cyclohexane with molecular oxygen (Huang, J.-W. (170) 261)
- Porphyrins
- Study of the selective catalysis of metalloporphyrins for 2-methyl-butane oxidation with PhIO under mild conditions (Guo, C.-C. (170) 43)
- Preparation of 4-methylacetophenone
- Selective acetylation of toluene to 4-methylacetophenone over zeolite catalysts (Jaimol, T. (170) 117)
- Pullulan
- TEMPO-derivatives as catalysts in the oxidation of primary alcohol groups in carbohydrates (Bragd, P.L. (170) 35)
- Pyridine-1-oxide
- Inverse phase transfer catalysis: kinetics of the pyridine-1-oxide-catalyzed two-phase reactions of methyl-, methoxy-, iodo-, and nitro-benzoyl chlorides and benzoate ions (Lu, Y.L. (170) 57)
- [Rh(μ -Cl)(COD)]₂
- [Rh(μ -Cl)(COD)]₂ supported on activated carbons for the hydroformylation of 1-octene: effects of support surface chemistry and solvent (Díaz-Auñón, J.A. (170) 81)
- Rhodium
- Enantioselective hydrogenation of ethyl pyruvate catalyzed by PVP-stabilized rhodium nanoclusters (Huang, Y. (170) 143)
- Ruthenium
- Mono- and heterometallic carbonyl precursor based RuMo/Al₂O₃ catalysts: hydrodesulfurization activity and temperature programmed studies (Pinto, P. (170) 209)
- SBA-15
- Acidity enhancement of SBA mesoporous molecular sieve by modification with SO₄²⁻/ZrO₂ (Hua, W. (170) 195)
- Selectivity
- Study of the selective catalysis of metalloporphyrins for 2-methyl-butane oxidation with PhIO under mild conditions (Guo, C.-C. (170) 43)
- Silica
- Vibrational frequencies of CO adsorbed on silica supported Mo atoms from density functional calculations (López, N. (170) 175)
- SO₄²⁻/ZrO₂
- Acidity enhancement of SBA mesoporous molecular sieve by modification with SO₄²⁻/ZrO₂ (Hua, W. (170) 195)
- Solid acids
- Carbonylation of *tert*-butyl alcohol over H-zeolites (Xu, Q. (170) 147)
- Solvents
- [Rh(μ -Cl)(COD)]₂ supported on activated carbons for the hydroformylation of 1-octene: effects of support surface chemistry and solvent (Díaz-Auñón, J.A. (170) 81)
- Starch
- TEMPO-derivatives as catalysts in the oxidation of primary alcohol groups in carbohydrates (Bragd, P.L. (170) 35)

Steric and electronic effects

Steric and electronic effects of the R in $\text{IndTiCl}_2(\text{OR})$ catalysts on the syndiospecific polymerization of styrene (Ma, H. (170) 67)

Stibines

Amidocarbonylation of cyclohexene and 1-pentene with $\text{Co}_2(\text{CO})_8$ modified with triarylstibines in very mild conditions (Gómez, R.M. (170) 271)

Sulfides

The first application of titanocenes in the asymmetric oxidation of sulfides (Sala, G.D. (170) 219)

Sulfoxides

The first application of titanocenes in the asymmetric oxidation of sulfides (Sala, G.D. (170) 219)

Surface chemistry

Immobilization of η^5 -cyclopentadienyltris(dimethylamido)zirconium polymerization catalysts on a chlorosilane- and HMDS-modified mesoporous silica surface: a new concept for supporting metallocene amides towards heterogeneous single-site-catalysts (Schneider, H. (170) 127)

Syndiotactic polystyrene

Steric and electronic effects of the R in $\text{IndTiCl}_2(\text{OR})$ catalysts on the syndiospecific polymerization of styrene (Ma, H. (170) 67)

TEMPO-derivatives

TEMPO-derivatives as catalysts in the oxidation of primary alcohol groups in carbohydrates (Bragd, P.L. (170) 35)

tert-Butyl hydroperoxide

Oxidations by the system "hydrogen peroxide–manganese(IV)

complex–carboxylic acid". Part 3. Oxygenation of ethane, higher alkanes, alcohols, olefins and sulfides (Shul'pin, G.B. (170) 17)

Titanocene

Steric and electronic effects of the R in $\text{IndTiCl}_2(\text{OR})$ catalysts on the syndiospecific polymerization of styrene (Ma, H. (170) 67)

Titanocenes

The first application of titanocenes in the asymmetric oxidation of sulfides (Sala, G.D. (170) 219)

TPR

Mono- and heterometallic carbonyl precursor based $\text{RuMo}/\text{Al}_2\text{O}_3$ catalysts: hydrodesulfurization activity and temperature programmed studies (Pinto, P. (170) 209)

Two-phase catalysis

Synthesis of PEG–iridium conjugates and their use as hydrogenation catalysts in a water/substrate two-phase medium (Loch, J.A. (170) 75)

Vibrational frequency

Vibrational frequencies of CO adsorbed on silica supported Mo atoms from density functional calculations (López, N. (170) 175)

Vitamin B₁₂

Vitamin B₁₂-catalyzed conversion of some γ - and δ -bromoalkanoles to polyhydroxy alkanols (Petrović, Z. (170) 267)

Zeolites

Carbonylation of *tert*-butyl alcohol over H-zeolites (Xu, Q. (170) 147)
