

Subject index

Activation

Spin effects in activation of hydrocarbons . The role of triplet states in catalysis (Minaev, B.F. (171) 53)

Aerobic oxidation

Effect of substituents on the Mn(III)Salen catalyzed oxidation of styrene (Zsigmond, A. (171) 95)

Air pollutants

Effects of air pollutants on the cerium exchanged high silica zeolite catalyst: a Fourier transform infrared study (Kladis, C. (171) 243)

Alkene epoxidation

Cytochrome P-450 model reactions: a kinetic study of epoxidation of alkenes by iron phthalocyanine (Safari, N. (171) 115)

Alkenes

Multigram scale cobalt catalyzed photochemical methoxycarbonylation of alkenes (Dragojlovic, V. (171) 43)

Alkylation

Alkylations of benzene in room temperature ionic liquids modified with HCl (Qiao, K. (171) 81)

Synthesis, characterization and catalytic activity of actinide Th-MCM-41 and U-MCM-41 hexagonal packed mesoporous molecular sieves (Tismaneanu, R. (171) 229)

Arene hydrogenation

Sol-gel entrapped Rh₂Co₂(CO)₁₂: a catalyst precursor for efficient arene hydrogenation (Gelman, F. (171) 191)

Aromatic hydrogenation

Strong effect of transitional metals on the sulfur resistance of Pd/HY-Al₂O₃ catalysts for aromatic hydrogenation (Hu, L. (171) 169)

Aromatics

The adsorption of a series of aromatics in ITQ-1: grand canonical Monte Carlo simulations (Hou, T. (171) 103)

Asymmetric oxidations

⁵¹V and ¹³C NMR spectroscopic study of the peroxovanadium intermediates in vanadium catalyzed enantioselective oxidation of sulfides (Bryliakov, K.P. (171) 73)

Basic catalysts

Liquid-phase heterogeneous catalytic transfer hydrogenation of citral on basic catalysts (Aramendía, M.A. (171) 153)

Benzene

Alkylations of benzene in room temperature ionic liquids modified with HCl (Qiao, K. (171) 81)

Bimetallic catalyst

Strong effect of transitional metals on the sulfur resistance of Pd/

HY-Al₂O₃ catalysts for aromatic hydrogenation (Hu, L. (171) 169)

C–H bond

Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)

Carbon monoxide

Multigram scale cobalt catalyzed photochemical methoxycarbonylation of alkenes (Dragojlovic, V. (171) 43)

Studies on new palladium(II) catalyst system for copolymerization of CO with ethylene (Luo, H.-K. (171) 23)

Carbonylation

Iridium-formic acid based system for hydroxycarbonylation without CO gas (Simonato, J.-P. (171) 91)

Catalysis

Spin effects in activation of hydrocarbons . The role of triplet states in catalysis (Minaev, B.F. (171) 53)

Synthesis, characterization and catalytic activity of actinide Th-MCM-41 and U-MCM-41 hexagonal packed mesoporous molecular sieves (Tismaneanu, R. (171) 229)

Catalytic degradation

A combined kinetic and mechanistic modelling of the catalytic degradation of polymers (Lin, Y.-H. (171) 143)

Ce-ZSM-5

Effects of air pollutants on the cerium exchanged high silica zeolite catalyst: a Fourier transform infrared study (Kladis, C. (171) 243)

Cerium

Effects of air pollutants on the cerium exchanged high silica zeolite catalyst: a Fourier transform infrared study (Kladis, C. (171) 243)

Chiral Schiff bases

⁵¹V and ¹³C NMR spectroscopic study of the peroxovanadium intermediates in vanadium catalyzed enantioselective oxidation of sulfides (Bryliakov, K.P. (171) 73)

Chromium

Catalytic activity and stability of a chromium containing silicate in liquid phase cyclohexane oxidation (da Cruz, R.S. (171) 251)

Citral

Liquid-phase heterogeneous catalytic transfer hydrogenation of citral on basic catalysts (Aramendía, M.A. (171) 153)

Cloud point

Thermoregulated phase transfer ligands and catalysis XIV. Synthesis of *N,N*-dipolyoxyethylene-substituted-4-(diphenylphosphino) benzenesulfonamide (PEO-DPPSA) and the cataly-

- tic activity of its rhodium complex in hydroformylation of 1-decene (Jiang, J. (171) 85)
- CO**
Effects of air pollutants on the cerium exchanged high silica zeolite catalyst: a Fourier transform infrared study (Kladis, C. (171) 243)
- Cobalt**
Multigram scale cobalt catalyzed photochemical methoxycarbonylation of alkenes (Dragojlovic, V. (171) 43)
Sol-gel entrapped $\text{Rh}_2\text{Co}_2(\text{CO})_{12}$: a catalyst precursor for efficient arene hydrogenation (Gelman, F. (171) 191)
- Copolymerization**
Studies on new palladium(II) catalyst system for copolymerization of CO with ethylene (Luo, H.-K. (171) 23)
- Cracking catalysts**
A combined kinetic and mechanistic modelling of the catalytic degradation of polymers (Lin, Y.-H. (171) 143)
- Cyclohexane oxidation**
Catalytic activity and stability of a chromium containing silicate in liquid phase cyclohexane oxidation (da Cruz, R.S. (171) 251)
- 1-Decene**
Thermoregulated phase transfer ligands and catalysis XIV. Synthesis of *N,N*-dipolyoxyethylene-substituted-4-(diphenylphosphino) benzenesulfonamide (PEO-DPPSA) and the catalytic activity of its rhodium complex in hydroformylation of 1-decene (Jiang, J. (171) 85)
- Deuterated methanol**
Transient isotopic study of methanol oxidation on unsupported V_2O_5 . Mechanism of methylal formation (Tatibouët, J.-M. (171) 205)
- Dioxygenase model**
Radical-initiated oxygenation of flavonols by dioxygen (Kaizer, J. (171) 33)
- Epoxidation**
Synthesis and catalytic activity of Fe(III) anchored to a polystyrene-Schiff base support (Antony, R. (171) 159)
- Ethane oxidative dehydrogenation to ethene**
Halo-oxide $\text{ACuO}_{2-\delta}\text{X}_\sigma$ ($A = \text{Sr}_{0.63}\text{Ca}_{0.27}$, $X = \text{F, Cl}$) catalysts active and durable for ethane selective oxidation to ethene (Dai, H.X. (171) 217)
- Ethylene**
Studies on new palladium(II) catalyst system for copolymerization of CO with ethylene (Luo, H.-K. (171) 23)
- Extended Hückel molecular orbital (EHMO) method**
A combined theoretical and experimental study of the effects of residual chlorine on the behavior of Pd/ γ - Al_2O_3 catalysts for methane oxidation (Tonetto, G. (171) 123)
- Fenton**
Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)
- Flavonol oxidation**
Radical-initiated oxygenation of flavonols by dioxygen (Kaizer, J. (171) 33)
- Formaldehyde**
Modified W/HZSM-5 catalysts: structure and catalytic properties (de Lucas, A. (171) 195)
- Formic acid**
Iridium-formic acid based system for hydroxycarbonylation without CO gas (Simonato, J.-P. (171) 91)
- FT-IR**
Effects of air pollutants on the cerium exchanged high silica zeolite catalyst: a Fourier transform infrared study (Kladis, C. (171) 243)
- Galvinoxyl**
Radical-initiated oxygenation of flavonols by dioxygen (Kaizer, J. (171) 33)
- Gif**
Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)
- GMC**
The adsorption of a series of aromatics in ITQ-1: grand canonical Monte Carlo simulations (Hou, T. (171) 103)
- Hemimethylal**
Transient isotopic study of methanol oxidation on unsupported V_2O_5 . Mechanism of methylal formation (Tatibouët, J.-M. (171) 205)
- Heteronuclear catalyst**
Sol-gel entrapped $\text{Rh}_2\text{Co}_2(\text{CO})_{12}$: a catalyst precursor for efficient arene hydrogenation (Gelman, F. (171) 191)
- Hexafluoroacetone**
Highly efficient cascade-oxygen-transfer from H_2O_2 to olefins mediated by halogenated carbonyl compounds and metalloporphyrins (Campestrini, S. (171) 37)
- Homogeneous catalysis**
Iridium-formic acid based system for hydroxycarbonylation without CO gas (Simonato, J.-P. (171) 91)
- Hydrocarbon**
Spin effects in activation of hydrocarbons. The role of triplet states in catalysis (Minaev, B.F. (171) 53)
- Hydroformylation**
Thermoregulated phase transfer ligands and catalysis XIV. Synthesis of *N,N*-dipolyoxyethylene-substituted-4-(diphenylphosphino) benzenesulfonamide (PEO-DPPSA) and the catalytic activity of its rhodium complex in hydroformylation of 1-decene (Jiang, J. (171) 85)
- Hydrogen peroxide**
Highly efficient cascade-oxygen-transfer from H_2O_2 to olefins mediated by halogenated carbonyl compounds and metalloporphyrins (Campestrini, S. (171) 37)
- Hydrogen transfer**
Liquid-phase heterogeneous catalytic transfer hydrogenation of citral on basic catalysts (Aramendía, M.A. (171) 153)
- Hydroxycarbonylation**
Iridium-formic acid based system for hydroxycarbonylation without CO gas (Simonato, J.-P. (171) 91)
- Hydroxyl radical**
Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)

Hydroxylation

Synthesis, characterization and catalytic activity of actinide Th-MCM-41 and U-MCM-41 hexagonal packed mesoporous molecular sieves (Tismaneanu, R. (171) 229)

Infinite-layer halo-oxide catalyst

Halo-oxide $ACuO_{2-\delta}X_{\sigma}$ ($A = Sr_{0.63}Ca_{0.27}$, $X = F, Cl$) catalysts active and durable for ethane selective oxidation to ethene (Dai, H.X. (171) 217)

Intermediates

^{51}V and ^{13}C NMR spectroscopic study of the peroxovanadium intermediates in vanadium catalyzed enantioselective oxidation of sulfides (Bryliakov, K.P. (171) 73)

Intrazeolite synthesis

Effect of substituents on the Mn(III)Salen catalyzed oxidation of styrene (Zsigmond, A. (171) 95)

Ionic liquids

Alkylations of benzene in room temperature ionic liquids modified with HCl (Qiao, K. (171) 81)

Iridium

Iridium-formic acid based system for hydroxycarbonylation without CO gas (Simonato, J.-P. (171) 91)

Iron

Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)

Iron catalysts

Synthesis and catalytic activity of Fe(III) anchored to a polystyrene-Schiff base support (Antony, R. (171) 159)

Iron phthalocyanine

Cytochrome P-450 model reactions: a kinetic study of epoxidation of alkenes by iron phthalocyanine (Safari, N. (171) 115)

ITQ-1

The adsorption of a series of aromatics in ITQ-1: grand canonical Monte Carlo simulations (Hou, T. (171) 103)

Ketonization

Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)

Kinetic

Cytochrome P-450 model reactions: a kinetic study of epoxidation of alkenes by iron phthalocyanine (Safari, N. (171) 115)
A combined kinetic and mechanistic modelling of the catalytic degradation of polymers (Lin, Y.-H. (171) 143)

Ligands

Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)

Liquid crystal templating

Synthesis, characterization and catalytic activity of actinide Th-MCM-41 and U-MCM-41 hexagonal packed mesoporous molecular sieves (Tismaneanu, R. (171) 229)

Mechanism

Transient isotopic study of methanol oxidation on unsupported V_2O_5 . Mechanism of methylal formation (Tatibouët, J.-M. (171) 205)

Mesoporous materials

Synthesis, characterization and catalytic activity of actinide Th-MCM-41 and U-MCM-41 hexagonal packed mesoporous molecular sieves (Tismaneanu, R. (171) 229)

Metallosilicates

Catalytic activity and stability of a chromium containing silicate in liquid phase cyclohexane oxidation (da Cruz, R.S. (171) 251)

Methanol oxidation

Transient isotopic study of methanol oxidation on unsupported V_2O_5 . Mechanism of methylal formation (Tatibouët, J.-M. (171) 205)

Methylal

Transient isotopic study of methanol oxidation on unsupported V_2O_5 . Mechanism of methylal formation (Tatibouët, J.-M. (171) 205)

Mn(III)Salen

Effect of substituents on the Mn(III)Salen catalyzed oxidation of styrene (Zsigmond, A. (171) 95)

Modelling

A combined kinetic and mechanistic modelling of the catalytic degradation of polymers (Lin, Y.-H. (171) 143)

Molecular adsorption

The adsorption of a series of aromatics in ITQ-1: grand canonical Monte Carlo simulations (Hou, T. (171) 103)

NMR

^{51}V and ^{13}C NMR spectroscopic study of the peroxovanadium intermediates in vanadium catalyzed enantioselective oxidation of sulfides (Bryliakov, K.P. (171) 73)

NO

Effects of air pollutants on the cerium exchanged high silica zeolite catalyst: a Fourier transform infrared study (Kladis, C. (171) 243)

Nonionic water-soluble phosphine

Thermoregulated phase transfer ligands and catalysis XIV. Synthesis of *N,N*-dipolyoxyethylene-substituted-4-(diphenylphosphino) benzenesulfonamide (PEO-DPPSA) and the catalytic activity of its rhodium complex in hydroformylation of 1-decene (Jiang, J. (171) 85)

N-hexane aromatization

The influence of Fe on the dispersion, electronic state, sulfur-resistance and catalysis of platinum supported on KL zeolite (Zheng, J. (171) 181)

ODE reaction

Halo-oxide $ACuO_{2-\delta}X_{\sigma}$ ($A = Sr_{0.63}Ca_{0.27}$, $X = F, Cl$) catalysts active and durable for ethane selective oxidation to ethene (Dai, H.X. (171) 217)

Oxidation of methane (partial)

Modified W/HZSM-5 catalysts: structure and catalytic properties (de Lucas, A. (171) 195)

Oxidation

Radical and non-radical chemistry of the Fenton-like systems in the presence of organic substrates (Gozzo, F. (171) 1)
Highly efficient cascade-oxygen-transfer from H_2O_2 to olefins mediated by halogenated carbonyl compounds and metalloporphyrins (Campestrini, S. (171) 37)

Palladium

Strong effect of transitional metals on the sulfur resistance of Pd/HY-Al₂O₃ catalysts for aromatic hydrogenation (Hu, L. (171) 169)

Palladium(II) catalyst

Studies on new palladium(II) catalyst system for copolymerization of CO with ethylene (Luo, H.-K. (171) 23)

Pd supported catalyst

A combined theoretical and experimental study of the effects of residual chlorine on the behavior of Pd/ γ -Al₂O₃ catalysts for methane oxidation (Tonetto, G. (171) 123)

Pentasil zeolite

Effects of air pollutants on the cerium exchanged high silica zeolite catalyst: a Fourier transform infrared study (Kladis, C. (171) 243)

Peroxo complexes of vanadium

⁵¹V and ¹³C NMR spectroscopic study of the peroxovanadium intermediates in vanadium catalyzed enantioselective oxidation of sulfides (Bryliakov, K.P. (171) 73)

Photochemical carbonylation

Multigram scale cobalt catalyzed photochemical methoxycarbonylation of alkenes (Dragojlovic, V. (171) 43)

 β -Pinene

Multigram scale cobalt catalyzed photochemical methoxycarbonylation of alkenes (Dragojlovic, V. (171) 43)

Poly(styrene-divinylbenzene)-Schiff base support

Synthesis and catalytic activity of Fe(III) anchored to a polystyrene-Schiff base support (Antony, R. (171) 159)

Polyketone

Studies on new palladium(II) catalyst system for copolymerization of CO with ethylene (Luo, H.-K. (171) 23)

Polymers

A combined kinetic and mechanistic modelling of the catalytic degradation of polymers (Lin, Y.-H. (171) 143)

Porphyrin

Highly efficient cascade-oxygen-transfer from H₂O₂ to olefins mediated by halogenated carbonyl compounds and metalloporphyrins (Campestrini, S. (171) 37)

Pt-Fe/KL zeolite

The influence of Fe on the dispersion, electronic state, sulfur-resistance and catalysis of platinum supported on KL zeolite (Zheng, J. (171) 181)

Quercetinase

Radical-initiated oxygenation of flavonols by dioxygen (Kaizer, J. (171) 33)

Relative rate

Cytochrome P-450 model reactions: a kinetic study of epoxidation of alkenes by iron phthalocyanine (Safari, N. (171) 115)

Rhodium

Sol-gel entrapped Rh₂Co₂(CO)₁₂: a catalyst precursor for efficient arene hydrogenation (Gelman, F. (171) 191)

Ship-in-a-bottle complexes

Effect of substituents on the Mn(III)Salen catalyzed oxidation of styrene (Zsigmond, A. (171) 95)

Sol-gel matrix

Sol-gel entrapped Rh₂Co₂(CO)₁₂: a catalyst precursor for efficient arene hydrogenation (Gelman, F. (171) 191)

Sol-gel process

Catalytic activity and stability of a chromium containing silicate in liquid phase cyclohexane oxidation (da Cruz, R.S. (171) 251)

Spin effects

Spin effects in activation of hydrocarbons. The role of triplet states in catalysis (Minaev, B.F. (171) 53)

(Sr_{0.63}Ca_{0.27})CuO_{2- δ} X _{σ} (X = F, Cl)

Halo-oxide ACuO_{2- δ} X _{σ} (A = Sr_{0.63}Ca_{0.27}, X = F, Cl) catalysts active and durable for ethane selective oxidation to ethene (Dai, H.X. (171) 217)

Styrene oxidation

Effect of substituents on the Mn(III)Salen catalyzed oxidation of styrene (Zsigmond, A. (171) 95)

Sulfoxides

⁵¹V and ¹³C NMR spectroscopic study of the peroxovanadium intermediates in vanadium catalyzed enantioselective oxidation of sulfides (Bryliakov, K.P. (171) 73)

Sulfur resistance

Strong effect of transitional metals on the sulfur resistance of Pd/HY-Al₂O₃ catalysts for aromatic hydrogenation (Hu, L. (171) 169)

The influence of Fe on the dispersion, electronic state, sulfur-resistance and catalysis of platinum supported on KL zeolite (Zheng, J. (171) 181)

Superacidity

Alkylations of benzene in room temperature ionic liquids modified with HCl (Qiao, K. (171) 81)

Superconducting cuprate material

Halo-oxide ACuO_{2- δ} X _{σ} (A = Sr_{0.63}Ca_{0.27}, X = F, Cl) catalysts active and durable for ethane selective oxidation to ethene (Dai, H.X. (171) 217)

Supported tungsten species

Modified W/HZSM-5 catalysts: structure and catalytic properties (de Lucas, A. (171) 195)

TEMPO

Radical-initiated oxygenation of flavonols by dioxygen (Kaizer, J. (171) 33)

Tert-butyl hydroperoxide

Catalytic activity and stability of a chromium containing silicate in liquid phase cyclohexane oxidation (da Cruz, R.S. (171) 251)

Th-MCM-41

Synthesis, characterization and catalytic activity of actinide Th-MCM-41 and U-MCM-41 hexagonal packed mesoporous molecular sieves (Tismaneanu, R. (171) 229)

Thermoregulated phase transfer catalysis

Thermoregulated phase transfer ligands and catalysis XIV. Synthesis of *N,N*-dipolyoxyethylene-substituted-4-(diphenylphosphino) benzenesulfonamide (PEO-DPPSA) and the catalytic activity of its rhodium complex in hydroformylation of 1-decene (Jiang, J. (171) 85)

Transient isotopic experiments

Transient isotopic study of methanol oxidation on unsupported V₂O₅. Mechanism of methylal formation (Tatibouët, J.-M. (171) 205)

Triplet states

Spin effects in activation of hydrocarbons . The role of triplet states in catalysis (Minaev, B.F. (171) 53)

U-MCM-41

Synthesis, characterization and catalytic activity of actinide Th-MCM-41 and U-MCM-41 hexagonal packed mesoporous molecular sieves (Tismaneanu, R. (171) 229)

V₂O₅

Transient isotopic study of methanol oxidation on unsupported V₂O₅. Mechanism of methylal formation (Tatibouët, J.-M. (171) 205)

W/HZSM-5 catalyst

Modified W/HZSM-5 catalysts: structure and catalytic properties (de Lucas, A. (171) 195)

XPS characterization

Halo-oxide ACuO_{2-δ}X_σ (A = Sr_{0.63}Ca_{0.27}, X = F, Cl) catalysts active and durable for ethane selective oxidation to ethene (Dai, H.X. (171) 217)

Y-zeolite

Strong effect of transitional metals on the sulfur resistance of Pd/HY-Al₂O₃ catalysts for aromatic hydrogenation (Hu, L. (171) 169)
