

## Subject index

### Acetic acid

Reaction of *N-tert*-butyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. II. Spectral studies (Štolcová, M. (172) 175)

### Acetic anhydride

Reaction of *N*-alkyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. I. Technological aspects (Štolcová, M. (172) 165)

Reaction of *N-tert*-butyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. II. Spectral studies (Štolcová, M. (172) 175)

### Acid catalysis

Reaction of *N*-alkyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. I. Technological aspects (Štolcová, M. (172) 165)

### Adsorption

Adsorption and photocatalytic decomposition of odor compounds containing sulfur using TiO<sub>2</sub>/SiO<sub>2</sub> bead (Nishikawa, H. (172) 247)

### Aggregation

Investigation of the physico-chemical state and aggregation mechanism of surface Cr species on a Phillips CrO<sub>x</sub>/SiO<sub>2</sub> catalyst by XPS and EPMA (Liu, B. (172) 227)

### alkylbis(2-benzothiazoly)sulphen)amide

Reaction of *N*-alkyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. I. Technological aspects (Štolcová, M. (172) 165)

### Alumina

Quantum chemical analysis of coordination of nitroxide probes to acid sites on the surfaces of oxides (Tokmachev, A.M. (172) 253)

### Aluminoxane

Synchrotron XAS studies on a half-sandwich titanium-based polyethylene catalyst (Wasserman, E.P. (172) 67)

### Argon

Influence of an additional gas on the hydroformylation of cyclohexene with Co<sub>2</sub>(CO)<sub>8</sub>(PBu<sub>3</sub>)<sub>2</sub> (Salvini, A. (172) 127)

### 1-Arylethanols

Carbonylation of 1-arylethanols using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

### 2-Arylpropionic acid

Carbonylation of 1-arylethanols using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

### Benzaldehyde

Oxidation of benzyl alcohol under a synergism of phase transfer catalysis and heteropolyacids (Yadav, G.D. (172) 135)

### Benzyl alcohol

Oxidation of benzyl alcohol under a synergism of phase transfer catalysis and heteropolyacids (Yadav, G.D. (172) 135)

### Borate

Autocatalysis in the sodium perborate oxidation of anilines in acetic acid–ethylene glycol (Karunakaran, C. (172) 9)

### Bromofluorobenzene isomerization

Characterization of the balance between metallic and acidic properties of Cu–MFI catalysts by using the transformation of haloaromatic compounds: effect of copper loading and Si/Al ratio (Vol, S. (172) 241)

### Carbonylation

Carbonylation of 1-arylethanols using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

### (+)-3-Carene

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

### Catalysis

Synthesis and characterization of unbridged metallocene dichloride complexes with two differently mono-substituted indenyl ligands and their application as catalysts for the polymerization of ethene and propene (Schmidt, R. (172) 43)

A molecular mechanism for Fischer–Tropsch catalysis (Carter, M.K. (172) 193)

### Catalytic cycle

Carbonylation of 1-arylethanols using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

### Characterization

Characterization of the balance between metallic and acidic properties of Cu–MFI catalysts by using the transformation of haloaromatic compounds: effect of copper loading and Si/Al ratio (Vol, S. (172) 241)

### Chemical grafting

Epoxidation of cyclohexene on Ti/SiO<sub>2</sub> catalysts prepared by chemical grafting TiCl<sub>4</sub> on deboronated silica xerogel (Wang, S. (172) 219)

### Cinnamyl alcohol

Liquid phase selective oxidation of alcohols over modified molecular sieves (Srinivas, N. (172) 187)

### Cobalt carbonyl

Influence of an additional gas on the hydroformylation of cyclohexene with Co<sub>2</sub>(CO)<sub>8</sub>(PBu<sub>3</sub>)<sub>2</sub> (Salvini, A. (172) 127)

## Copper(II)

The oligomer of 1,6-naphthalenediol as a support in oxidative reactions of *cis*-bisglycinato copper(II) and hydrogenperoxide (Handique, J.G. (172) 19)

## Cu–MFI

Characterization of the balance between metallic and acidic properties of Cu–MFI catalysts by using the transformation of haloaromatic compounds: effect of copper loading and Si/Al ratio (Vol, S. (172) 241)

## Cyclohexene

Epoxidation of cyclohexene on Ti/SiO<sub>2</sub> catalysts prepared by chemical grafting TiCl<sub>4</sub> on deboronated silica xerogel (Wang, S. (172) 219)

Cytochrome *c*<sub>3</sub>-viologen linked ruthenium(II) complex

Photoinduced hydrogen evolution with cytochrome *c*<sub>3</sub>-viologen-ruthenium(II) triad complex and hydrogenase (Asakura, N. (172) 1)

## Deboronation

Epoxidation of cyclohexene on Ti/SiO<sub>2</sub> catalysts prepared by chemical grafting TiCl<sub>4</sub> on deboronated silica xerogel (Wang, S. (172) 219)

## Dinitrogen

Influence of an additional gas on the hydroformylation of cyclohexene with Co<sub>2</sub>(CO)<sub>8</sub>(PBU<sub>3</sub>)<sub>2</sub> (Salvini, A. (172) 127)

## Dioxygenase

Kinetics and mechanism of the stoichiometric oxygenation of the ionic zinc(II) flavonolate complex [Zn(fla)(idpa)]ClO<sub>4</sub> (fla = flavonolate; idpa = 3,3'-iminobis(*N,N*-dimethylpropylamine)) (Barhács, L. (172) 117)

## Electron probe microanalysis

Investigation of the physico-chemical state and aggregation mechanism of surface Cr species on a Phillips CrO<sub>x</sub>/SiO<sub>2</sub> catalyst by XPS and EPMA (Liu, B. (172) 227)

## Epoxidation

Photooxidation of propylene with oxygen over TiO<sub>2</sub>–SiO<sub>2</sub> composite oxides prepared by rapid hydrolysis (Kanai, H. (172) 25)

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

Epoxidation of cyclohexene on Ti/SiO<sub>2</sub> catalysts prepared by chemical grafting TiCl<sub>4</sub> on deboronated silica xerogel (Wang, S. (172) 219)

## EPR spectra

Reaction of *N-tert*-butyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. II. Spectral studies (Štolcová, M. (172) 175)

## ESR

Photooxidation of propylene with oxygen over TiO<sub>2</sub>–SiO<sub>2</sub> composite oxides prepared by rapid hydrolysis (Kanai, H. (172) 25)

## EXAFS

Synchrotron XAS studies on a half-sandwich titanium-based polyethylene catalyst (Wasserman, E.P. (172) 67)

## Fischer–Tropsch

A molecular mechanism for Fischer–Tropsch catalysis (Carter, M.K. (172) 193)

## Flavonol 2,4-dioxygenase

Kinetics and mechanism of the stoichiometric oxygenation of the ionic zinc(II) flavonolate complex [Zn(fla)(idpa)]ClO<sub>4</sub> (fla = flavonolate; idpa = 3,3'-iminobis(*N,N*-dimethylpropylamine)) (Barhács, L. (172) 117)

## Flavonol

Kinetics and mechanism of the stoichiometric oxygenation of the ionic zinc(II) flavonolate complex [Zn(fla)(idpa)]ClO<sub>4</sub> (fla = flavonolate; idpa = 3,3'-iminobis(*N,N*-dimethylpropylamine)) (Barhács, L. (172) 117)

## Gallia

Quantum chemical analysis of coordination of nitroxide probes to acid sites on the surfaces of oxides (Tokmachev, A.M. (172) 253)

## GC–MS

Reaction of *N-tert*-butyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. II. Spectral studies (Štolcová, M. (172) 175)

## Geraniol

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

## Haloaromatics

Characterization of the balance between metallic and acidic properties of Cu–MFI catalysts by using the transformation of haloaromatic compounds: effect of copper loading and Si/Al ratio (Vol, S. (172) 241)

## Halogen exchange

Characterization of the balance between metallic and acidic properties of Cu–MFI catalysts by using the transformation of haloaromatic compounds: effect of copper loading and Si/Al ratio (Vol, S. (172) 241)

## Heteropolyacids

Oxidation of benzyl alcohol under a synergism of phase transfer catalysis and heteropolyacids (Yadav, G.D. (172) 135)

## Homogeneous catalysis

Carbonylation of 1-arylethanol using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

## Hydroformylation

Influence of an additional gas on the hydroformylation of cyclohexene with Co<sub>2</sub>(CO)<sub>8</sub>(PBU<sub>3</sub>)<sub>2</sub> (Salvini, A. (172) 127)

## Hydrogen peroxide

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

## Hydrogenase

Photoinduced hydrogen evolution with cytochrome *c*<sub>3</sub>-viologen-ruthenium(II) triad complex and hydrogenase (Asakura, N. (172) 1)

## Hydrogenation catalysts

Characterisation of catalysts and their precursors prepared from supported palladium phosphine complexes (Cairns, G.R. (172) 207)

**Hydrogenation**

Hydrogenation and isomerization of 1-hexene with  $\text{Ru}_3(\text{CO})_{12}$  and  $\text{Ru}_3(\text{CO})_9(\text{PPh}_3)_3$  (Dallmann, K. (172) 81)

**Hydrogenperoxide**

The oligomer of 1,6-naphthalenediol as a support in oxidative reactions of *cis*-bisglycinato copper(II) and hydrogenperoxide (Handique, J.G. (172) 19)

**Ibuprofen**

Carbonylation of 1-arylethanols using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

**Immobilization**

A theoretical and experimental study about the effect of different organosilanes on immobilization of  $(n\text{BuCp})_2\text{ZrCl}_2$  on pre-treated  $\text{SiO}_2$  (Ferreira, M.L. (172) 97)

**In situ studies**

In situ studies of atomic, nano- and macroscale order during  $\text{VOHPO}_4 \cdot 0.5\text{H}_2\text{O}$  transformation to  $(\text{VO})_2\text{P}_2\text{O}_7$  (Gulians, V.V. (172) 265)

**Intramolecular electron transfer**

Photoinduced hydrogen evolution with cytochrome  $c_3$ -viologen-ruthenium(II) triad complex and hydrogenase (Asakura, N. (172) 1)

**1-(4-Isobutylphenyl)ethanol**

Carbonylation of 1-arylethanols using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

**Isomerization**

Hydrogenation and isomerization of 1-hexene with  $\text{Ru}_3(\text{CO})_{12}$  and  $\text{Ru}_3(\text{CO})_9(\text{PPh}_3)_3$  (Dallmann, K. (172) 81)

**Kinetic model**

Oxidation of benzyl alcohol under a synergism of phase transfer catalysis and heteropolyacids (Yadav, G.D. (172) 135)

**Kinetics**

Kinetics and mechanism of the stoichiometric oxygenation of the ionic zinc(II) flavonolate complex  $[\text{Zn}(\text{fla})(\text{idpa})]\text{ClO}_4$  (fla = flavonolate; idpa = 3,3'-iminobis(*N,N*-dimethylpropylamine)) (Barhács, L. (172) 117)

**Linear backbone**

A molecular mechanism for Fischer–Tropsch catalysis (Carter, M.K. (172) 193)

**Manganese(III)**

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

**Molecular mechanism**

A molecular mechanism for Fischer–Tropsch catalysis (Carter, M.K. (172) 193)

**Monoterpenes**

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

***N*-alkyl-2-benzothiazolesulphenamides**

Reaction of *N*-alkyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. I. Technological aspects (Štolcová, M. (172) 165)

***N*-tert-butyl-2-benzothiazolesulphenamides**

Reaction of *N*-tert-butyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. II. Spectral studies (Štolcová, M. (172) 175)

**Nerol**

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

**Nitroxides adsorption**

Quantum chemical analysis of coordination of nitroxide probes to acid sites on the surfaces of oxides (Tokmachev, A.M. (172) 253)

**NMR**

Reaction of *N*-tert-butyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. II. Spectral studies (Štolcová, M. (172) 175)

**Odor treatment**

Adsorption and photocatalytic decomposition of odor compounds containing sulfur using  $\text{TiO}_2/\text{SiO}_2$  bead (Nishikawa, H. (172) 247)

**Olefin polymerization**

Synthesis and characterization of unbridged metallocene dichloride complexes with two differently mono-substituted indenyl ligands and their application as catalysts for the polymerization of ethene and propene (Schmidt, R. (172) 43)

Synchrotron XAS studies on a half-sandwich titanium-based polyethylene catalyst (Wasserman, E.P. (172) 67)

Ziegler–Natta  $\text{MgCl}_2$ -supported catalysts: relationship between titanium oxidation states distribution and activity in olefin polymerization (Fregonese, D. (172) 89)

**Oligomer**

The oligomer of 1,6-naphthalenediol as a support in oxidative reactions of *cis*-bisglycinato copper(II) and hydrogenperoxide (Handique, J.G. (172) 19)

**Organosilanes**

A theoretical and experimental study about the effect of different organosilanes on immobilization of  $(n\text{BuCp})_2\text{ZrCl}_2$  on pre-treated  $\text{SiO}_2$  (Ferreira, M.L. (172) 97)

**Oxidation**

Oxidation of benzyl alcohol under a synergism of phase transfer catalysis and heteropolyacids (Yadav, G.D. (172) 135)

Liquid phase selective oxidation of alcohols over modified molecular sieves (Srinivas, N. (172) 187)

**Oxygen radical**

Photooxidation of propylene with oxygen over  $\text{TiO}_2$ – $\text{SiO}_2$  composite oxides prepared by rapid hydrolysis (Kanai, H. (172) 25)

**Oxygenation**

Kinetics and mechanism of the stoichiometric oxygenation of the ionic zinc(II) flavonolate complex  $[\text{Zn}(\text{fla})(\text{idpa})]\text{ClO}_4$  (fla = flavonolate; idpa = 3,3'-iminobis(*N,N*-dimethylpropylamine)) (Barhács, L. (172) 117)

**Palladium phosphine complexes**

Characterisation of catalysts and their precursors prepared from supported palladium phosphine complexes (Cairns, G.R. (172) 207)

## Palladium

Carbonylation of 1-arylethanols using homogeneous Pd complex catalysts (Seayad, A. (172) 151)

## Perborate

Autocatalysis in the sodium perborate oxidation of anilines in acetic acid–ethylene glycol (Karunakaran, C. (172) 9)

## Phase transfer catalysis

Oxidation of benzyl alcohol under a synergism of phase transfer catalysis and heteropolyacids (Yadav, G.D. (172) 135)

Phillips  $\text{CrO}_x/\text{SiO}_2$  catalyst

Investigation of the physico-chemical state and aggregation mechanism of surface Cr species on a Phillips  $\text{CrO}_x/\text{SiO}_2$  catalyst by XPS and EPMA (Liu, B. (172) 227)

## Photocatalysis

Adsorption and photocatalytic decomposition of odor compounds containing sulfur using  $\text{TiO}_2/\text{SiO}_2$  bead (Nishikawa, H. (172) 247)

## Photoinduced hydrogen evolution

Photoinduced hydrogen evolution with cytochrome  $c_3$ -viologen-ruthenium(II) triad complex and hydrogenase (Asakura, N. (172) 1)

## Photooxidation

Photooxidation of propylene with oxygen over  $\text{TiO}_2$ - $\text{SiO}_2$  composite oxides prepared by rapid hydrolysis (Kanai, H. (172) 25)

## Polymer properties

Synthesis and characterization of unbridged metallocene dichloride complexes with two differently mono-substituted indenyl ligands and their application as catalysts for the polymerization of ethene and propene (Schmidt, R. (172) 43)

## Polymerization

A theoretical and experimental study about the effect of different organosilanes on immobilization of  $(n\text{BuCp})_2\text{ZrCl}_2$  on pre-treated  $\text{SiO}_2$  (Ferreira, M.L. (172) 97)

## Porphyrins

Oxidation of unsaturated monoterpenes with hydrogen peroxide catalysed by manganese(III) porphyrin complexes (Martins, R.R.L. (172) 33)

## Propylene oxide

Photooxidation of propylene with oxygen over  $\text{TiO}_2$ - $\text{SiO}_2$  composite oxides prepared by rapid hydrolysis (Kanai, H. (172) 25)

## Quantum chemical analysis

Quantum chemical analysis of coordination of nitroxide probes to acid sites on the surfaces of oxides (Tokmachev, A.M. (172) 253)

## Quercetinase

Kinetics and mechanism of the stoichiometric oxygenation of the ionic zinc(II) flavonolate complex  $[\text{Zn}(\text{fla})(\text{idpa})]\text{ClO}_4$  (fla = flavonolate; idpa = 3,3'-iminobis(*N,N*-dimethylpropylamine)) (Barhács, L. (172) 117)

## Raman

In situ studies of atomic, nano- and macroscale order during  $\text{VOHPO}_4 \cdot 0.5\text{H}_2\text{O}$  transformation to  $(\text{VO})_2\text{P}_2\text{O}_7$  (Gulianti, V.V. (172) 265)

## Rietveld refinement

In situ studies of atomic, nano- and macroscale order during  $\text{VOHPO}_4 \cdot 0.5\text{H}_2\text{O}$  transformation to  $(\text{VO})_2\text{P}_2\text{O}_7$  (Gulianti, V.V. (172) 265)

 $\text{Ru}_3(\text{CO})_9(\text{PPh}_3)_3$ 

Hydrogenation and isomerization of 1-hexene with  $\text{Ru}_3(\text{CO})_{12}$  and  $\text{Ru}_3(\text{CO})_9(\text{PPh}_3)_3$  (Dallmann, K. (172) 81)

## Selective epoxidation

Liquid phase selective oxidation of alcohols over modified molecular sieves (Srinivas, N. (172) 187)

## Silica

Quantum chemical analysis of coordination of nitroxide probes to acid sites on the surfaces of oxides (Tokmachev, A.M. (172) 253)

## Spectroscopy

Characterisation of catalysts and their precursors prepared from supported palladium phosphine complexes (Cairns, G.R. (172) 207)

## Substituent

Autocatalysis in the sodium perborate oxidation of anilines in acetic acid–ethylene glycol (Karunakaran, C. (172) 9)

## Supported catalysts

Ziegler–Natta  $\text{MgCl}_2$ -supported catalysts: relationship between titanium oxidation states distribution and activity in olefin polymerization (Fregonese, D. (172) 89)

## Surface Cr species

Investigation of the physico-chemical state and aggregation mechanism of surface Cr species on a Phillips  $\text{CrO}_x/\text{SiO}_2$  catalyst by XPS and EPMA (Liu, B. (172) 227)

## Synergism

Oxidation of benzyl alcohol under a synergism of phase transfer catalysis and heteropolyacids (Yadav, G.D. (172) 135)

*Tert*-butylbis(2-benzothiazolyl-sulphen)amide

Reaction of *N-tert*-butyl-2-benzothiazolesulphenamide with acetic anhydride in the presence of acids. II. Spectral studies (Štolcová, M. (172) 175)

 $\text{Ti}/\text{de}[\text{B}]\text{SiO}_2$ 

Epoxidation of cyclohexene on  $\text{Ti}/\text{SiO}_2$  catalysts prepared by chemical grafting  $\text{TiCl}_4$  on deboronated silica xerogel (Wang, S. (172) 219)

## Titania-silica

Photooxidation of propylene with oxygen over  $\text{TiO}_2$ - $\text{SiO}_2$  composite oxides prepared by rapid hydrolysis (Kanai, H. (172) 25)

## Titanium oxidation states

Ziegler–Natta  $\text{MgCl}_2$ -supported catalysts: relationship between titanium oxidation states distribution and activity in olefin polymerization (Fregonese, D. (172) 89)

## Transition metal

A molecular mechanism for Fischer–Tropsch catalysis (Carter, M.K. (172) 193)

## TS-1

Photooxidation of propylene with oxygen over  $\text{TiO}_2$ - $\text{SiO}_2$  composite oxides prepared by rapid hydrolysis (Kanai, H. (172) 25)

## Unbridged metallocene complexes

Synthesis and characterization of unbridged metallocene dichloride complexes with two differently mono-substituted indenyl ligands and their application as catalysts for the polymerization of ethene and propene (Schmidt, R. (172) 43)

## Vanadium pyrophosphate

In situ studies of atomic, nano- and macroscale order during  $\text{VOHPO}_4 \cdot 0.5\text{H}_2\text{O}$  transformation to  $(\text{VO})_2\text{P}_2\text{O}_7$  (Gulians, V.V. (172) 265)

## X-ray photoelectron spectroscopy

Investigation of the physico-chemical state and aggregation mechanism of surface Cr species on a Phillips  $\text{CrO}_x/\text{SiO}_2$  catalyst by XPS and EPMA (Liu, B. (172) 227)

## XANES

Synchrotron XAS studies on a half-sandwich titanium-based polyethylene catalyst (Wasserman, E.P. (172) 67)

## Xenon

Influence of an additional gas on the hydroformylation of cyclohexene with  $\text{Co}_2(\text{CO})_6(\text{PBU}_3)_2$  (Salvini, A. (172) 127)

## XRD

In situ studies of atomic, nano- and macroscale order during  $\text{VOHPO}_4 \cdot 0.5\text{H}_2\text{O}$  transformation to  $(\text{VO})_2\text{P}_2\text{O}_7$  (Gulians, V.V. (172) 265)

## Zeolites

Liquid phase selective oxidation of alcohols over modified molecular sieves (Srinivas, N. (172) 187)

## Ziegler–Natta catalysis

Ziegler–Natta  $\text{MgCl}_2$ -supported catalysts: relationship between titanium oxidation states distribution and activity in olefin polymerization (Fregonese, D. (172) 89)

## Zinc complexes

Kinetics and mechanism of the stoichiometric oxygenation of the ionic zinc(II) flavonolate complex  $[\text{Zn}(\text{fla})(\text{idpa})]\text{ClO}_4$  (fla = flavonolate; idpa = 3,3'-iminobis(*N,N*-dimethylpropylamine)) (Barhács, L. (172) 117)
