

Subject index

Accessibility

Generating palladium nanoclusters inside functional cross-linked polymer frameworks (Corain, B. (173) 99)

Acetylenes

Hydrogenation of carbon–carbon multiple bonds: chemo-, regio- and stereo-selectivity (Molnár, Á. (173) 185)

Agglomeration

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Alloying

Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)

Azobenzene

Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F. (173) 223)

Azoxy compounds

Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F. (173) 223)

Bimetallic catalysts

Supported bimetallic palladium catalysts for water-phase nitrate reduction (Prüsse, U. (173) 313)

Bimetallics

Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)

C–Cl hydrogenolysis

Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)

C–C coupling

Supported palladium catalysts for fine chemicals synthesis (Blaser, H.-U. (173) 3)

Carbon supports

Synthesis of supported palladium catalysts — a review (Toebes, M.L. (173) 75)

Carbon

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Catalysis

Generating palladium nanoclusters inside functional cross-linked polymer frameworks (Corain, B. (173) 99)

Catalyst deactivation

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Catalyst synthesis

Synthesis of supported palladium catalysts — a review (Toebes, M.L. (173) 75)

Catalysts

Synthesis of supported palladium catalysts — a review (Toebes, M.L. (173) 75)

Catalytic hydrodehalogenation

Hydrogenolysis of organohalogen compounds over palladium supported catalysts (Urbano, F.J. (173) 329)

Catalytic membrane

Membrane reactors for hydrogenation and dehydrogenation processes based on supported palladium (Dittmeyer, R. (173) 135)

Chemoselectivity

Catalysis with supported palladium metal, selectivity in the hydrogenation of C=C, C=O and C=N bonds, from chemo- to enantioselectivity (Tungler, A. (173) 231)

Coking

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Composite palladium membrane

Membrane reactors for hydrogenation and dehydrogenation processes based on supported palladium (Dittmeyer, R. (173) 135)

Crystalline structure of palladium nanoparticles

High resolution TEM studies on palladium nanoparticles (José-Yacamán, M. (173) 61)

Diastereoselectivity

Catalysis with supported palladium metal, selectivity in the hydrogenation of C=C, C=O and C=N bonds, from chemo- to enantioselectivity (Tungler, A. (173) 231)

Dienes

Hydrogenation of carbon–carbon multiple bonds: chemo-, regio- and stereo-selectivity (Molnár, Á. (173) 185)

Drinking water

Supported bimetallic palladium catalysts for water-phase nitrate reduction (Prüsse, U. (173) 313)

Electron microscopy of nanoparticles

High resolution TEM studies on palladium nanoparticles (José-Yacamán, M. (173) 61)

Electronic structure of clusters

Implication of palladium geometric and electronic structures to hydrogen activation on bulk surfaces and clusters (Efremenko, I. (173) 19)

- Enantioselectivity
Catalysis with supported palladium metal, selectivity in the hydrogenation of C=C, C=O and C=N bonds, from chemo- to enantioselectivity (Tungler, A. (173) 231)
- Fine chemicals manufacture
Supported palladium catalysts for fine chemicals synthesis (Blaser, H.-U. (173) 3)
- Functional resins
Generating palladium nanoclusters inside functional cross-linked polymer frameworks (Corain, B. (173) 99)
- Gas-phase hydrocarbon dehydrogenation
Membrane reactors for hydrogenation and dehydrogenation processes based on supported palladium (Dittmeyer, R. (173) 135)
- Greenhouse gas
Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)
- Halocarbons
Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)
- Heck reaction
Metal palladium catalysts in Heck C–C coupling reactions (Biffis, A. (173) 249)
- Heterogeneous catalysts
Metal palladium catalysts in Heck C–C coupling reactions (Biffis, A. (173) 249)
- Hydrogen
Implication of palladium geometric and electronic structures to hydrogen activation on bulk surfaces and clusters (Efremenko, I. (173) 19)
Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)
- Hydrogen-gas hydrogenolysis
Hydrogenolysis of organohalogen compounds over palladium supported catalysts (Urbano, F.J. (173) 329)
- Hydrogen-transfer hydrogenolysis
Hydrogenolysis of organohalogen compounds over palladium supported catalysts (Urbano, F.J. (173) 329)
- Hydrogenation of alkynes
Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)
- Hydrogenation of aromatics
Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)
- Hydrogenation of CO
Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)
- Hydrogenation of N-containing compounds
Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)
- Hydrogenation
Supported palladium catalysts for fine chemicals synthesis (Blaser, H.-U. (173) 3)
Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)
- Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F.V. (173) 223)
Catalysis with supported palladium metal, selectivity in the hydrogenation of C=C, C=O and C=N bonds, from chemo- to enantioselectivity (Tungler, A. (173) 231)
Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)
- Hydroxylamines
Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F. (173) 223)
- Impregnation
Synthesis of supported palladium catalysts — a review (Toebes, M.L. (173) 75)
- Ion-exchange
Synthesis of supported palladium catalysts — a review (Toebes, M.L. (173) 75)
- Leaching
Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)
- Liquid-phase hydrogenation
Membrane reactors for hydrogenation and dehydrogenation processes based on supported palladium (Dittmeyer, R. (173) 135)
- Mechanism
Supported bimetallic palladium catalysts for water-phase nitrate reduction (Prüsse, U. (173) 313)
- Membrane reactor
Membrane reactors for hydrogenation and dehydrogenation processes based on supported palladium (Dittmeyer, R. (173) 135)
- Metal palladium catalysts
Metal palladium catalysts in Heck C–C coupling reactions (Biffis, A. (173) 249)
- Methane
Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)
- N₂O
Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)
- Nanomorphology
High resolution TEM studies on palladium nanoparticles (José-Yacamán, M. (173) 61)
Generating palladium nanoclusters inside functional cross-linked polymer frameworks (Corain, B. (173) 99)
- Nitrate reduction
Supported bimetallic palladium catalysts for water-phase nitrate reduction (Prüsse, U. (173) 313)
- Nitro compounds
Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F. (173) 223)

Nitrosobenzene

Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F. (173) 223)

NO_x

Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)

Oxidation

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Oxide supports

Synthesis of supported palladium catalysts — a review (Toebe, M.L. (173) 75)

Palladium catalyst

Membrane reactors for hydrogenation and dehydrogenation processes based on supported palladium (Dittmeyer, R. (173) 135)

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Hydrogenolysis of organohalogen compounds over palladium supported catalysts (Urbano, F.J. (173) 329)

Palladium nanoclusters

Generating palladium nanoclusters inside functional cross-linked polymer frameworks (Corain, B. (173) 99)

Palladium nanoparticles

High resolution TEM studies on palladium nanoparticles (José-Yacamán, M. (173) 61)

Palladium

Implication of palladium geometric and electronic structures to hydrogen activation on bulk surfaces and clusters (Efremenko, I. (173) 19)

Synthesis of supported palladium catalysts — a review (Toebe, M.L. (173) 75)

Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)

Hydrogenation of carbon–carbon multiple bonds: chemo-, regio- and stereo-selectivity (Molnár, Á. (173) 185)

Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F. (173) 223)

Catalysis with supported palladium metal, selectivity in the hydrogenation of C=C, C=O and C=N bonds, from chemo- to enantioselectivity (Tungler, A. (173) 231)

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)

Supported bimetallic palladium catalysts for water-phase nitrate reduction (Prüsse, U. (173) 313)

Partial hydrogenation

Hydrogenation of carbon–carbon multiple bonds: chemo-, regio- and stereo-selectivity (Molnár, Á. (173) 185)

Poisoning

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Quantum mechanics

Implication of palladium geometric and electronic structures to hydrogen activation on bulk surfaces and clusters (Efremenko, I. (173) 19)

Selectivity

Hydrogenation of carbon–carbon multiple bonds: chemo-, regio- and stereo-selectivity (Molnár, Á. (173) 185)

Sintering

Poisoning and deactivation of palladium catalysts (Albers, P. (173) 275)

Solvent effects

Hydrogenation and hydrogenolysis of nitro-, nitroso-, azo-, azoxy- and other nitrogen-containing compounds on palladium (Figueras, F. (173) 223)

Supported palladium catalysts

Supported palladium catalysts for fine chemicals synthesis (Blaser, H.-U. (173) 3)

Surface structure

Implication of palladium geometric and electronic structures to hydrogen activation on bulk surfaces and clusters (Efremenko, I. (173) 19)

Thioresistance

Bimetallic palladium catalysts: influence of the co-metal on the catalyst performance (Coq, B. (173) 117)

Treatment of emissions

Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)

VOC

Supported palladium catalysts in environmental catalytic technologies for gaseous emissions (Centi, G. (173) 287)
