

## 13th International Symposium on Homogeneous Catalysis

International symposia on homogeneous catalysis are at the forefront of promoting studies into this area of chemistry. They provide industrialists and academics with a forum in which to discuss recent advances in catalysis and how these advances can be applied to new industrial processes. Previous meetings have been held in Stockholm (Sweden), St Andrews (Scotland), Princeton (New Jersey, USA), Jerusalem (Israel) and Amsterdam (The Netherlands).

You are cordially invited to attend the 13th International Symposium on Homogeneous Catalysis which will be held in Tarragona (Spain) from September 3 to September 7. The meeting will be chaired by Prof. Dr. Luis A. Oro (Zaragoza University) and Prof. Dr. Carmen Claver (Rovira i Virgili University).

Tarragona is a beautiful city on the Mediterranean coast 100 km south of Barcelona. It is well connected with Barcelona airport and the European railway system.

The call for papers and the registration forms will be mailed in the autumn of 2001 to all those who complete and return this page, by post or e-mail, to:
